

# 20 years of expertise in DIY wireless security

## GSM wireless security system

- Allows long distance control via smartphone
- Automatically calls up to 8 preset phone numbers in event of an emergency
- GSM frequencies: 2G/850/900/1,800/1,900MHz
- No landline required

- Specialized in DIY wireless, RF and power supply products for residential and commercial use
- Our Red Shield™ wireless home protection system functions as a standard household intruder alarm or, expanded with accessories, offers protection in garages, sheds and outbuildings
- Our system's smart panel can monitor sensors placed up to 150m or 250m away
- Equipped with 20 assembly lines, and plastic injection molding, tool-making, electronic circuit design and testing facilities
- Produce up to 500,000 sensors and alarms, 200,000 power supplies, chargers and inverters, and 200,000 RF access controls monthly
