

# Eco-friendly bags from a 12-year manufacturer

With 12 years of bag manufacturing experience, we – Mayflower Enterprise – offer eco-friendly items that are targeted at Western markets. In fact, more than 95 percent of our exports go to the US and countries in Europe. This means that we understand the product intricacies and regulations required to meet these markets' demands.

We emphasize eco-friendliness and product safety when making our items. All of our bags' fabrics and accessories are made from EN 71-approved materials that comply with the CPSIA and REACH regulations. And inspections of raw materials and finished products are conducted by third-party agencies such as SGS, ITS and TÜV.

The bags you see here are just some of the 1,000-plus styles in our collection. If you need a new product, we can have it completed for you in just three days. And with 10 production lines, we can fill both large and small orders. Contact us today.
