

Dual-core tablet PC with Android 4.0 OS and 3G connectivity (T292)

3" touchscreen camera and MP4 player (A11)

13 years' experience as a professional media player manufacturer

We supply to Fortune 500 companies

Established in 1999, we specialize in the design, development and manufacture of MP3/MP4 players, Google's Android-enabled devices, HD video players and more. With an emphasis on personal audio and video products, we have created items which are well-received in various international markets. In fact, we supply electronics to well-known retailers, including several Fortune 500 companies. And, if you need customization services, our English-speaking R&D engineers will work closely with you to integrate the features your market demands.

Production is carried out at our 8,000m² ISO 9001:2008-certified factory equipped with SMT, plastic-injection, hot plastic packing and high-cycle seal machines. And with 600 skilled workers, we can turn out up to 500,000 units every month. We are also a member of the Sisvel licensing program. For more information regarding our CE-, FCC-, REACH- and RoHS-marked items, contact us today.
