- Optional NFC compatibility

# We redefine audio listening

## Innovative Bluetooth products and over 120 patents

Cowin is an audio product and electronics innovator that holds more than 100 patents in mainland China and 20 PCT international patents. We are also a Bluetooth® SIG member and all our products are BQB-certified. We specialize in producing vibration speakers that utilize our latest patented vibration drivers and don't contain membranes like conventional speakers. This means that your customers can transform any flat surface, such as a table, door or wall, into a large speaker with 360° omnidirectional sound. What's more, these speakers are easily mountable on any vertical surface.

Our catalog boasts Bluetooth speakers, and speakers for a variety of tablet PCs and smartphones. All the products produced in our BSCI-certified factory are PAHs-free and come with CE, FCC, UL, SAA, RoHS and REACH marks. Plus, you'll find them in Apple stores and Walmart. These big-name buyers trust the quality of our products. To see why they do so, contact us today.

**4W iStage mini for smartphones**

**6W iStage for tablet PCs**

**NFC**

**Bluetooth speakers for a variety of tablet PCs and smartphones**
