

Fortune 500 electronics companies

choose from our range of motors

Induction motor (NEW)

Universal AC motors

DC motors

Featuring over 1,000 different types of motors, our selection won't let you down. The fact that Fortune 500 electronics companies choose from our range indicates that you, too, will likely find a model that matches your application. And in the rare chance that you don't, we'll custom build one for you. Our lineup includes:

- AC universal motors: mainly used in kitchen appliances such as food processors, blenders, juicers and choppers
- PM DC motors: widely used in cars, instruments, medical equipment, health care products and water pumps
- Geared motors: used in automatic equipment, instruments, office devices and vending machines
- Brushless motors: used in instruments, precise controllers, power tools and office equipment
- Shaded pole motors: used in cooling systems, medical equipment and air fresheners
- Pump motors: used in water pumps
- Automotive motors: used in automotive parts

When it comes to volume production, we're a major player as well. Each month, we turn out 8 million units, all of which are compliant with the RoHS Directive and carry UL and CE marks for easy distribution in the US and Europe. Regardless of whether you're a volume buyer or a start-up company, we'll offer all these services to you. To join our list of satisfied clients in the US, Europe, Asia and South America, call us today.
