

Contract manufacturing and component procurement

From a 43-year industry leader

OEM/ODM specialist exporting worldwide

Buyers in the US, Europe, the Middle East and Africa have been relying on our OEM/ODM services since 1972. They value our commitment to quality and service — factors which underline our contract manufacturing and PCB assembly, cable assembly, plastic injection and metal extrusion services. We use stringent quality assurance methodologies and state-of-the-art equipment to ensure continuous product improvement. You can be sure your orders will leave our factory in the best condition possible. In addition, we have a worldwide agent network and several offices internationally to provide aftersales services.

Efficient production and strict QC inspections

We are dedicated to providing you with reliable board-level assemblies and full box builds. From SMT/PTH assemblies with multilayer boards to full box builds using plastic or metal enclosures, we have the manufacturing capabilities you need. We can also provide cable assemblies and component procurement services for active, passive and mechanical components to reduce your costs and lead times. With efficient production and procurement processes that are backed by stringent QC measures, we can ensure high-performance products for your volume orders.

Benefit from our global procurement network

We are committed to being a cornerstone of your supply chain. With a global procurement network, we offer flexible manufacturing options, personalized services and competitive prices. Our catalog offers a wide array of components, which include — but are not limited to — connectors, transformers, active, passive, and mechanical components. Call us today.

Heavy-duty assembly with heatsink

Hybrid IC assembly

BGA assembly

Full box build with metal enclosure

Potted module

Micro BGA assembly

0201 assembly

Special hard metric backplane connector

Full box build with plastic enclosure

Full box build with plastic enclosure for GPS tracker

Plastic injection and metal extrusions

Cable and wire assemblies/connectors

Active components and transformers

LED bulbs and modules

- Consume one-tenth the energy of incandescent bulbs, brightest model only uses 3 watts
- Slightly warm to the touch after extended usage
- Available in E12, E14, E17 and E27
