

Watches tested to an AQL of as low as 1.5

We carry out all production processes in-house

We have a 70-member QC team ensuring our watches meet an AQL of between 1.5 and 4, depending on your requirements. And this highly trained team sees to it that each item is fit to bear CE and RoHS marks for easy importation into your market. All processes – from the injection molding of our straps and housings to screen printing, assembly and packaging – are completed in our BSCI-approved facility. Our design team develops three new models each month and can complete samples for you in just three days.

We can handle your volume orders easily and quickly thanks to our monthly capacity of 1.8 million units. With a 30,000m² factory and 1,000 skilled workers, we offer you a wide range of watches and clocks, all customizable to your OEM specifications. Inquire now.
