

Smartphone Tracking and Security

Smartphone Tracking and Security

Locate and show where a vehicle is by using Google Maps on a smartphone from anywhere in the world, remotely lock/unlock doors, open trunks, safely cut, start or stop the engine, arm/disarm the security system, and receive alarm alerts and status checks using Apple's iPhone, RIM's Blackberry mobile phones, as well as smartphones using Google's Android operating systems. The system is compatible with any brand of alarm devices and can also utilize an interface module to link to a vehicle's CAN bus.
