

CNC wood router,  
with vacuum and  
dust collector system  
(JCUT-1325AV)

## A 13-year CNC router manufacturer ready 24/7

Once you start ordering, we'll start working. We're available 24/7 so your CNC routers are made exactly how you need them, when you want them. For perfect precision, we use imported Z-axis ball screws in the oil lubrication system and 25mm linear guide rails. Fixtures are held sturdily in place by vacuum clamps, and a dust collection system removes potentially hazardous excess particles. A water-cooled motor and high-frequency converter ensure top-level performance, torque and efficiency. Order today.
