

Comprehensive OEM services for motorcycle and car parts and accessories

From CNC machining to TIG welding

We offer over 5,000 motorcycle and car parts in steel, aluminum, bronze or plastic

Minimize the risks of incompatibilities by having us customize your motorcycle, car and truck parts and accessories. With over 20 years of industry experience, we can develop units that fit together perfectly. Send us your specifications, and our 30 R&D technicians will create a sample out of steel, aluminum, bronze or plastic. Our OEM capabilities include CNC machining, laser cutting, powder coating, injection molding and TIG welding according to AWS standards.

Our collection includes aluminum extrusions and casts, as well as car, truck, trailer and motorcycle parts. In addition, we offer industrial transmissions and can customize machinery components according to your requirements.

With a network of 200 suppliers, we have the resources to handle large projects. Our factory is ISO 9001:2000-certified and our automotive parts are manufactured according to PPAP

standards. Take advantage of our extensive customization services as General Motors and SKF do. Inquire today.
