10W rechargeable LED floodlight (Ray-FL10WC)

50W LED floodlight (Ray-FL50WJA-50W)
• 4,000lm
• -50 to 60°C working temperature range

Established in 2008, our 6,000m² Shenzhen-based factory is manned by more than 400 expert workers and backed by a strong R&D team. We specialize in the design, development, production and sales of LED products, and our selection includes indoor and outdoor spotlights, bulbs, downlights, tubes, panel lights, floodlights, high bay lights, street lights and more. Each of the up to 3 million units we produce every month carries CE and RoHS marks, and these are widely used in home, industrial and commercial applications.

We have established lasting relationships with wholesalers from Europe, South America, Asia, and other areas. This continuing cooperation is

based on honesty, high quality, considerate service and fast delivery time. And we are always on the lookout for additional long-term partners.

We have a strict quality control system. First, all of our drivers are designed and produced in-house, allowing us to control their quality from the beginning. Plus, for the LEDs used in our products, we source only from reliable suppliers such as Cree, Bridgelux, Epistar and Nichia. What's more, every light we produce will be put through a 48-hour high-low voltage test and 20,000 cycle shock test to check the quality and the stability of the driver.
