

Servo motor stabilizers (MSER-30000VA)

- 1-30KVA single phase and 9-200KVA three phase available
- Separate regulation for three phase models for stable output
- In-house production chain

## Our stabilizers, solar inverters and UPS are among the first to use C.R.G.O. toroidal transformer technology

- 13,990m<sup>2</sup> factory with 6 advanced production lines
- Up to 50-60% lower excitation current than competitors' for inverters/solar inverters
- Our items have reduced static loss, long backup power and user-friendly LED displays

Contact us now.

MPPT solar charge controller (SCC-M80)

- Automatically adapts to 12V/24V/48V systems voltage
- Smart LED display for charging current and voltage
- Maximum charging current 80A; PV voltage ≤150V
- Reversed polarity protection of solar panel and battery
- Three stage charging
