

Over three decades in the electronics industry

Now one of the top 25 enterprises in mainland China's electronics capital

As a subsidiary of one of the world's top 500 companies – China Electronics Corporation – we have experienced a steady growth rate since our establishment in 1980. Now, with an annual sales volume of over \$1.6 billion, we have risen to become one of the top 25 enterprises in Shenzhen – mainland China's electronics manufacturing capital. This accomplishment is owed not only to our experience, but also to our devotion to providing innovative and high-quality products.

Our 60-member R&D team has over five years of experience developing set-top boxes, smartphones and tablet PCs – many of them have worked directly with Samsung. With this technical backing, we are able to release the high-quality and stylish CEIEC-branded products featured here. Now let us work with you on your OEM/ODM orders as well. Our products have already gained the attention of big-name companies including Samsung, Walmart, Philips and Sony.

With more than 20 production lines and 2,000 employees at our 30,000m² factory, we are able to complete your order in as quick as 15 days. Our minimum order quantity is 3,000 units. Contact us today for details.
