

Introducing our car DVRs with 120° viewing angles

Made by a 14-year OEM/ODM professional

Established in 1997, TAT Electronics focuses on the structural, hardware and packaging design, as well as the mass production, of memory storage devices. Our latest innovation is a car DVR with a 120° viewing angle. It boasts HD video resolution, a 3MP camera and external SD/TF memory-card support. Many of our engineers have worked for IBM, and they utilize 10 years of experience in NAND flash memory technology when developing our products.

To ensure quality, we conduct a six-step QC process at our ISO 9001:2000-certified factories. All of our products come with CE, FCC and RoHS marks, and are backed by three-year warranties. Join the five OEM clients in the US and mainland China who've cooperated with us for over five years. We can deliver custom samples within three days. Inquire now.
