

Our transmitters play music files from USB devices

They also act as handsfree kits

Car MP3/WMA FM transmitter

- Plays audio devices through wireless radio connection
- Built-in Bluetooth handsfree kit allows users to listen to music from their mobile phones

Let your customers play any of their MP3 or WMA files without the hassle of cords and cables by sourcing our featured product. This car FM transmitter is available with a USB slot, enabling users to play as much music as they have stored on their flash drives or other memory devices. It's plug-and-play, and comes with an auxiliary input jack for MP3, CD or DVD player connectivity. As an added feature, we've included a built-in Bluetooth® handsfree kit to allow users to listen to their mobile phones through their car radio systems.

For 13 years, our R&D team has been creating bestsellers like this one for you to choose from. Manufacturing is carried out at our ISO 9001:2000-certified factory, where all items are inspected at every step of the production

process. Buyers in Japan, the US and Europe are snapping up these wireless transmitters. To find out why, visit our Global Sources website today.
