

Using own equipment to manufacture unique solar PV mounting systems

- Specializing in solar roof and ground racking systems since 2006
- Using 3D design software for fast and cost-effective installation
- 6 patented designs help customers stay above the competition

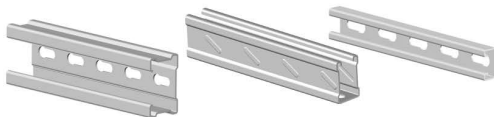

Carbon C steel ground mounting system

- Can be secured by screwing into ground, concrete pads or buried directly
- 80µm hot-dip galvanized steel material

C-type flat roof ballasted mounting system

- Without penetrating roof • Hot-dipped galvanized steel, 80µm
