

# We offer premium services and competitive prices to help support your business

Get a quote in 8 hours about any one of our hundreds of models

Alkaline batteries

Pre-charged NiMH batteries

Rechargeable NiZn batteries

Rechargeable NiMH batteries

Power bank

With over 20 years' experience in this field, we now have many agents all over the world standing by to respond to your inquiries within eight hours. Our collection has hundreds of types of disposable alkaline, ZnCl, rechargeable NiMH, NiZn, Li-ion and Li-polymer batteries and chargers, as well as power banks. We help our agents strategize marketing plans and offer premiums, including promotional T-shirts, notebooks, pens, posters and more. If needed, we can even help them design websites to promote our batteries.

Relying on a wide range of advanced production technology, we meet the needs of many international clients from a wide range of industries. Our annual capacity is 100 million units – all of which are SGS-approved and CE- and RoHS-marked. OEM/ODM projects are welcomed, and our R&D team will respond within 24 hours. Orders can be completed within 20 working days. Work with us, and you will not only get quality products, but also competitive prices, short lead times and bodacious after sale services. For more information, contact us today.
