

Water treatment experts since 1999

At Ruiher Alternative Energy Co. Ltd, we're experts in water treatment systems. If you need a trusted source for high-quality products that handle a resource as precious as your drinking water, then check out the catalog we've been building for the last 16 years. We offer over 100 models of water dispensers and coolers, drinking fountains, water filters and RO purifiers, atmospheric water generators, soda water machines and water boilers.

To keep our selection up-to-date, we develop 3 new models every month. All items bear CE, UL, CB and SASO certifications and are RoHS-compliant. Such marks of quality ensure that our goods can be easily imported by buyers in Europe, Australia, the Americas and the Middle East.

As well, we have the production capacity to handle large- and small-quantity orders. In our 5,000m² ISO 9001:2008- and ISO 14001:2004-certified factory, 500 employees turn out up to 600,000 units annually. We deliver orders within 25 days and need only one week to process your sample requests. To learn more about our extensive list of water treatment products, visit our Global Sources online showroom today.
