

# Home security cameras with the features you seek

Digital wireless camera kit (JMC-DG60)

- Motion-activated recording, even while in quad mode
- Two-way communication
- Even with 4 camera systems there is no Wi-Fi interference
- 10fps VGA and 25fps QVGA overwriting optional
- Night vision as far as 15m

Using their five years of industry know-how, our engineers develop five to eight new security cameras annually. These devices integrate the latest features you're looking for, such as 15-meter night vision and quad mode capabilities. ODM orders are welcome. Our R&D team can work on your specifications, completing a sample for you within 45 days. Our monthly capacity is over 5,000 CE-, FCC- and UL-marked units, all of which undergo a six-step QC process.
