

Over 1,000 styles of mosaics to offer your customers

We offer over 1,000 styles of glass mosaics to choose from. Our products are widely used for interior and exterior decoration projects, and can be applied in bathrooms, kitchens, swimming pools, saunas, fountains and murals. Our 3,500m² factory houses automated production lines and our monthly output is 20,000m² worth of tiles.

Every year, we allocate 30 percent of our annual revenue for R&D projects. This allows us to release two new products monthly. It also means we can create custom samples in as short as seven days. Our 15-member QC team ensures our products are defect-free. Accordingly, 90 percent of our clients place repeat orders. Inquire now.
