

IP/3G/PSTN security solutions with automated wireless control and remote access

Versatile, intelligent and flexible, our IP/GPRS/GSM residential security system offers the latest total visual monitoring solution, home automation and remote access features that make users' lives safe, simple and manageable.

Our innovative ML-series control panels keep a close watch on users' homes at all times. Services such as security monitoring, event and alarm reporting, visual monitoring, home automation, energy management and remote control are integrated into the 40-zone ML-series panel. Through the Home Portal Server connection, the devices can be operated via web browsers or our Vesta Home app on smartphones. Users can incorporate IP camera for video streaming to remotely monitor household environment, PIR cameras to capture video clips and colored images of alarm scenes. What's more, the power metering switch and dimmer offer Smart Home Control capability to assist in home appliance management and conserve electricity.

Established in 1985, Climax Technology is a leading supplier of wireless security alarms, smart home solutions and visual verification systems. With a sales branch in the US, we provide fast service and language-specific support to customers in North America. Contact us today to source a broad range of security products.
