- Built-in Wi-Fi, Bluetooth®, GPS, 3G and Ethernet connectivity

Mobile data terminals with Freescale i.MX serial processors

Available with Microsoft Windows Embedded Compact 7, Google's Android and Linux BSP OS

For 11 years, we've been designing and manufacturing interactive monitors and mobile data terminals that integrate Freescale's super-fast ARM-based i.MX serial processors. Our devices are widely used in the medical, fleet management, home and industrial automation, telematics and dispatch system industries. They also boast board-support packages and are compatible with a wide range of operating systems and applications such as Microsoft Windows Embedded Compact 7, Google's Android and Linux BSP. Focusing on offering comprehensive services, reliable products and competitive prices, we have attracted a variety of big buyers, including Trimble, Kontron, NEC and Digi. We've already customized our devices for buyers in the US and Europe, and we're ready to do the same for you. Find out why over 95 percent of our buyers have become repeat clients. Contact our experienced multilingual sales and R&D staff today.

- 9.7" stand alone/wall-mounted touch-screen monitor (VT-9788)
- 4:3 HD panel with 1024 x 768 resolution
- High 900:1 contrast and 420cd/m2 brightness
