

Up to 6 new products designed every month

And a monthly capacity of 160,000 laptops and tablet PCs

Choose us for tablet PCs, mobile phones and laptops, and join our list of more than 80 long-term clients and partners, including a number of well known international brands. Each month our 15 R&D technicians develop up to six new products, allowing you to keep up with market trends. Their skills with Auto CAD, Power PCB, Creo Elements/Pro and Adobe Photoshop result in well-designed models that can be customized with your logo. Available in aluminum and other durable materials, our brightly colored models are sure to stand out from those of the competition.

To meet your performance standards, we use Samsung and Hynix chips in all of our devices. We also test each batch of products to an AQL of 1.0, and subject devices to a series of QC tests such as high- and low-temperature, drop, vibration and aging assessments. For accurate results, we use advanced equipment from Panasonic, including PCB testing, SMT and reflow soldering machines.

Fast delivery is another area where we excel. We produce up to 70,000 laptops, 90,000 tablet PCs and 80,000 mobile phone each month, meaning that no matter how large your order is, we can complete it quickly. Learn more by contacting one of our 30 English-speaking sales representatives today.
