7" 2G tablet PC with calling function

Up to 800,000 devices produced monthly
Take the hassle out of sifting through a multitude of smartphone suppliers by selecting us – an industry heavyweight. Last year, we exported \$30 million worth of smartphones, phablets and tablet PCs around the globe. With two factories, 1,000 workers and 25 production lines, we manufacture up to 500,000 mobile phones and 300,000 tablet PCs every month.

Designers located in the US and Switzerland
Our 60 designers and engineers have worked for the likes of Louis Vuitton, Fendi and Motorola, so you can be assured that our devices function as well as they look on the outside. We even station designers in the US and Switzerland to keep up with the latest trends. And we produce five new models each month and can have customized samples ready in 15 days. Make the smart choice – contact us now.
