 • 4-ch. H.264 standalone DVR
 • 4 x 550TVL DIS cameras
 • 4-way 12V DC power adapter
 • 4 x 20m BNC cables
 • USB mouse and remote control

Chips from Sony and Sharp plus a 5-step QC process

Equals a 99% qualification rate

There are several reasons why buyers from all over the US, Europe and the Middle East value our CCTV cameras. First, we source chips only from the best suppliers – Sony, Sharp, Samsung, Hitachi and Toshiba. And to maintain our 99 percent qualification rate, we employ a strict five-step screening process for all of our products. This includes a 48-hour burn-in test, a calibration test, a series of functionality tests, visual inspections and pre-shipment checks.

Our focus on meeting your quality standards is also evident on the production floor. We make use of our

newly acquired Panasonic high-speed SMT machines and adhere to an ERP management system for efficient and accurate manufacturing. These measures also enable us to produce up to 45,000 units monthly and fill large orders.

Choose from 100 models of indoor and outdoor IR cameras and DVR kits, as well as network video servers and weatherproof and CCTV security cameras to update your product range. Or, you can have our R&D team create an entirely new device for you. To find out how you can profit from our surveillance products, call us today.
