

Manufacturing small kitchen appliances for more than 12 years

Electric frying pan with nonstick coating and adjustable thermostat

A reliable manufacturer is of the utmost importance when sourcing kitchen appliances – after all, responsible companies want to make sure that any product they sell to their customer is safe and dependable. That's why big names like Metro, Taurus, Dollar General and Aldi have come to us for their small kitchen appliances needs for over 12 years. You can feel safe using our products in the kitchen, as they come with CE, GS, EMC, RoHS, UL, ETL, SAA, LFGB, CB and REACH marks.

Our strength lies in customization. Ninety percent of our orders are OEM requests, and the rest are ODM. You can therefore trust us to get your orders right. Our products include pizza pans, electric skillets, grills, griddles, pancake makers and other kitchenware, with an annual turnover exceeding \$10 million.

Each stage of the production process – R&D, assembly and molding, hardware pressing, painting, and packaging – is done in-house in our 20,000m² factory. Call today.
