

Confer with a metallurgical engineer for OEM understanding

Galvanized steel pipes with thread ends

Galvanized ERW pipes with grooved ends

Ideas in the pipeline? We'll bring them to fruition. Our foreign trade supervisor majored in metallurgical engineering and is well-experienced with 15 years on the job. He'll help with the finer details of your custom project. We offer seamless and welded pipes with 10mm to 630mm diameters – made from carbon and stainless steel with beveled, coupled or threaded joints. Everything we make carries ASTM, API, BS, DIN and JIS marks.

Our 20,000m² factory and 15 partner suppliers output up to 8,000 tons monthly. Orders take 14 to 30 days. Inquire today.
