

Cranes that helped the Burj Khalifa reach a new height

Global branches help facilitate trade – Germany, the US, Indonesia, Saudi Arabia, Nigeria and more

Tower crane

- Max. lifting capacity: 20t
- Max. working range: 70m

Serving famous global projects

Next time you see the Burj Khalifa, the tallest building in the world, think of our CMAX-brand construction equipment which helped to build it. We supply tower cranes with capacities ranging from 6 to 50 tons. Our crane range includes hammerhead tower cranes, topless tower cranes, luffing tower cranes and more. You can also find our construction machinery serving famous projects across South America, Asia and Eastern Europe. And we supply other CE-certified equipment including:

- PM hoists
- Suspended platforms
- Formworks
- Excavators
- Concrete pumps

Branches worldwide to better serve our customers

We are part of a network of 300 companies and factories that employs 120,000 staff members. And to better serve you in your region, we've expanded our sales network across the US, Germany, Indonesia, Russia, the United Arab Emirates, India, Saudi Arabia, Iran, Philippines and other countries. We export hundreds of pieces of machinery every year to each of these locations.

Offering you a full range of services

To help your project run smoothly, we also offer technical consultation, design, manufacturing, logistics, storage, installation, dismantling, maintenance and training services. Visit our Global Sources Online showroom to learn more.
