

# Only 15 days to turn your ODM ideas into functional power banks

You don't have to wait long for your ODM ideas to materialize. Our seven engineers, who have five years of experience each, can have portable power bank prototypes – including ones for Apple's iPhones – made in just 15 days. Or for faster time-to-market, you can choose from the 500-plus models we have already developed. Our rapid ODM service is a major reason why Promate, one of the leading wholesalers in Dubai, sources from us.

We can meet your volume orders with a monthly production capacity of 1.6 million CE- and RoHS-marked units. However, with a minimum order requirement of just one piece, we're also an ideal partner for start-ups or small-scale companies. We can have orders ready to ship in just five days to ensure you'll never lag behind your competitors. To benefit from our fast service, contact us with your requirements today.
