LCD charge indicator:

With 18 years of R&D experience, we are continuously enhancing our collection of the latest mobile phone accessories by creating six new models every year. We have hundreds of items available, such as our featured OEM smart desktop twin chargers with LCD indicators.

We've recently invested over \$1 million in R&D equipment that many SMEs in mainland China simply don't use. It helps us to continually improve the design quality of the nearly 1 million units we produce each and every month. Because major buyers like Walmart, Target and Panasonic value this kind of quality, they source Bluetooth®-compliant devices and more from us.

But that's not all. Our in-house capabilities include rigorous multistage testing of our products in order to maintain qualification rates of higher than 99.9 percent. And these items ship with CE, TÜV and UL marks – so you know they can be confidently used by customers in your market. Small, mixed OEM/ODM orders are welcome. Contact us today.

- BT16**
 Compact Bluetooth 2.0 headset,
 noise-canceling models also available
