

Adjustable fan speed, height raise quality

Typical features

- 
- **Cover:** Locally sourced ABS and aluminum are the key materials used. The other options are EVA and PC. Makers turn to overseas providers only on request. Companies accept custom colors and patterns.
 - **Fan:** The majority of units come with two or three fans. Universal mini models suitable for tablet PCs use one big fan. Most local makers produce this part in-house.
 - **Add-ons:** Some double as speakers.
 - **Design:** High-end models come in foldable configurations for enhanced portability, and have adjustable height for ease of use.
 - **LED indicator:** Green or blue LED lights indicate power status.
 - **Base:** Entry-level laptop coolers have a plastic bottom, usually in ABS, EVA or PC. Upscale versions adopt aluminum or combination aluminum and steel alloy for better heat dissipation.
 - **Ports:** USB 2.0 is the typical interface. Most coolers have two ports, and high-end models up to four, including one for USB 3.0.

Price range (per unit)	Basic features
\$1.50 to \$2.50	ABS or ABS-PC cover and base; two, three fans; two USB 2.0 ports; in black or white
\$2.60 to \$5	ABS, aluminum or aluminum-steel alloy cover; ABS-EVA, ABS-PS or ABS-EVA-PS base; three fans; two USB 2.0 ports
\$5.10 & above	ABS-EVA, ABS-EVA-PC or aluminum cover; ABS-EVA, ABS-PS or ABS-EVA-PS base; three fans; two to four USB 2.0 ports, USB 3.0 optional; adjustable height; foldable design optional

Top trends

- **Improved thermal dissipation, user convenience:** Makers of laptop coolers in China continue to improve product performance to match powerful notebook PCs and adapt to various user habits. The latest releases have adjustable fan speeds for better heat dispersion. Some have height settings to ensure comfortable use even during long periods.
- **Anti-skid design:** To prevent laptops from sliding, suppliers add nonwoven strips or a rough mesh, especially to high-end coolers with adjustable height. They also include foldable racks or hooks to secure the device in place.
- **Price forecast:** Quotes will remain steady in the months ahead. Manufacturers expect no change in raw material costs, particularly fans and LEDs. The mature technology in making laptop coolers is also a contributing factor to this stability.
- **Export projection:** Companies are anticipating revenue from international trade will achieve about 5 percent growth. They will continue to send the bulk of output to the US, Europe and the Asia-Pacific region, which are China's computer accessories industry's strong markets.
