

## FOUR MODES

Gentle

Quiet Cleaning

Powerful

Powerful Cleaning

Precision

Deep Cleaning

Manual

Free Cleaning

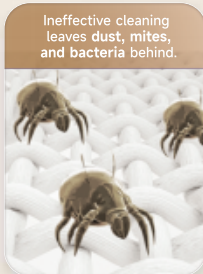

## PAINPOINT

Pet hair everywhere – keeping upholstery clean is a constant battle.

Manual cleaning is too much trouble to stick with daily.

Ineffective cleaning leaves dust, mites, and bacteria behind.

## PETS. LOVE. BLISS.

## SIMPLIFY YOUR CHORES

- Smart Automation -

### Auto-Cruising & S-Shape Path

S-Shape path planning for true auto-cruise. Ensures maximum bed coverage with 0 missed spots.

### Smart Detection & Edge Detection

Smart edge recognition by 9 proximity sensors. Moves safely along beds and sofas, eliminating the risk of drops.

## VERSATILITY WITHOUT COMPROMISE

- Full-Coverage Cleaning -

### Daily Freshness

Unlike bulky handheld devices, No complex setup. Just a 3-second operation and one tap to a better life.

### Cyclonic Power

14AW hurricane suction with a cyclonic roller brush and multi-airway design. Instantly captures debris, prevents clogs and hair wrap for visibly results.

≥99.9%

### Deep UV-C

Four 270nm deep-UV lamps achieve ≥99.9% sterilization. Precision sensors ensure they deactivate within 0.2s of lift-off to prevent leakage.

1500C/min

### Rapid Beating

15,000 beats/min at full power. Evenly cleans every inch, leaving no hiding place for mites or hair.

# World's NO.1 Bed Cleaner Robot

# ABOUT US

## Xin'angda Pet Technology (Guangzhou) Co., Ltd.

At Xin'angda Pet Technology (Guangzhou) Co., Ltd. we are dedicated to revolutionizing home and bed cleaning with innovative solutions. Before our break-through, only manual dust mite vacuums were available. We've developed the X1 Robot Bed Vacuum, which uses automatic deep cleaning to remove dust mites, bacteria, and pet fur, ensuring a cleaner, allergen-free sleep environment.
