

Company Profile

Guangdong NESCOM Technology Co.,Ltd

OEM/ODM services|800+ workers|30 R&D engineers

A manufacturer of electronic solutions and production and sales, NESCOM Technology Co., Ltd. is a national high-tech enterprise and the world's leading AV/IT provider, specializing in HUB hubs, docking stations, data storage boxes, wireless chargers, mechanical cable cables, etc. Provide comprehensive product development, design, manufacturing and delivery services for global distributors. We continue to improve our core competencies in design, supply chain management and customer service to maximize customer value and build long-term partnerships.

For more than 20 years, our team members have been studying in this field. In order to better serve customers, NESCOM Technology Co., Ltd. was established in 2013, a research and development center and manufacturing and production facilities in Dongguan. In addition, we vertically integrate tool design and manufacturing, precision design and manufacturing, SMT and finished components to provide customers with turnkey services.

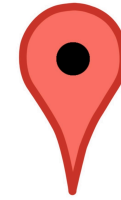

20+ Years of Experience / More than 30 Inspectors and 10 QC Auditors

Strict QC procedures are carried out by more than 30 inspectors. We have 10 injection molding machines, 6 automatic welding machines, 4 PCBA SMT lines and 5 automatic production lines. At the same time, there are 10 QC auditors with eight years of experience. The product has been tested by computer and 100% checked to ensure high quality. For your further assurance, our operations operate in accordance with ISO 9001: 2015 and ISO 14001:2015 guidelines, and all our products comply with CE, FCC, UKCA and RoHS, REACH standards.

Defect Track Back

What to Do ?

Plan to add date code or serial no. on connector inner molding.

Date Code or Serial no. record as below info.

1. BOM ver.
2. Production Date
3. Other info can be added depends on customer requirement

How to Track ?

When user has defect unit, provide serial no. to us.

We will track all record data and find out root cause.
