1. Enterprise overview

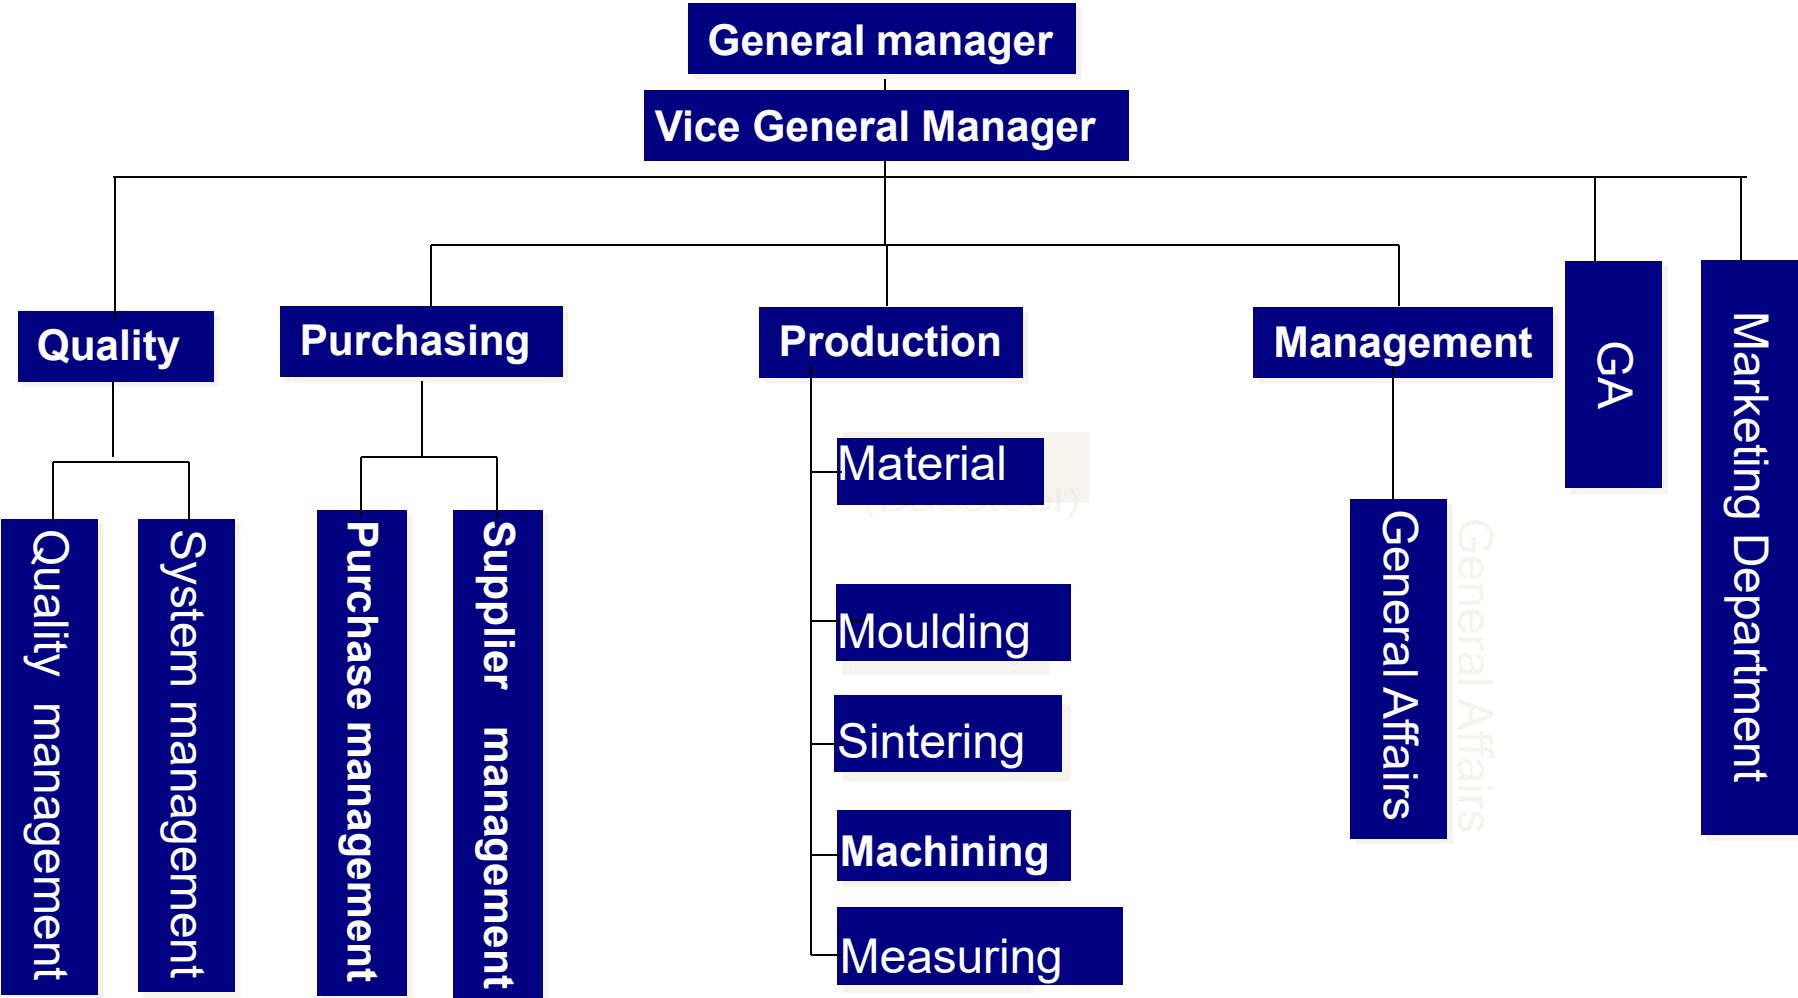

- Tianjin Yinghua New Material Tech Co., Ltd is a company engaged in new material special advanced material research and development. We supply material complete solution for all over the world. Our company is the company based on technology and in-depth visit in customer's requirements. All the products are designed according to special requirements of customers. We supply material for electronics, machinery, medical, and cell. The products series include kinds of new materials include Alumina, Aluminum Nitride, Zirconia and Boron Nitride Material are the main products in the list. Zirconia derivative products such as high purity zirconia, Yttria stabilized zirconia (YSZ or Y-TZP), and Magnesia stabilized Zirconia (MgO-PSZ), and Ceria stabilized Zirconia (CeO-PSZ).
- Tianjin Yinghua New Material Tech Co., Ltd is located in Tianjin City, China, which is the economic center of north China and with a convenient transportation and excellent business service.
- The company insists the spirit of Products Innovating, Technology Service and Customer Value, and wish to develop with the customers and suppliers. All customers and friends are welcome!

3. Qualification certificate

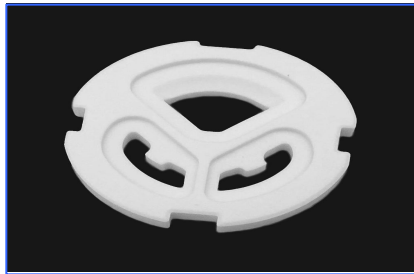

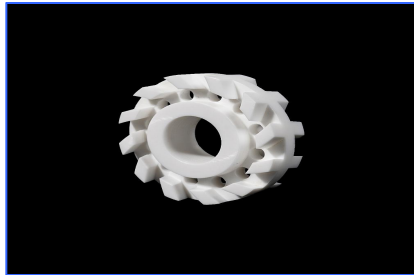

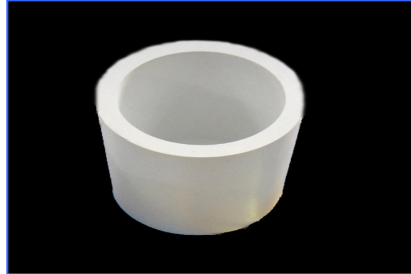

4. Organizational chart

1. Product introduction

	Zirconia Ceramics (Y-TZP) According requirements.
	AlN Ceramics
	Alumina (Al₂O₃) Ceramics

	BN Ceramics
	Si₃N₄ Ceramics
	MgO Ceramics

Production and management

2. Equipment and production capacity

	Device	Type	Manufacturer	Quantity
Moulding	Moulding Pressing	/	Wuxi Xingyu	5
	CIP	/	Wuxi Xingyu	1
Sintering	Sintering kiln	Rotary Kiln	Taizhou HuaWei	1
		Push plate kiln	Luoyang Yongtai	1
Machining	CNC	100000PCS/Month	Henan Bailing	2

Quality system

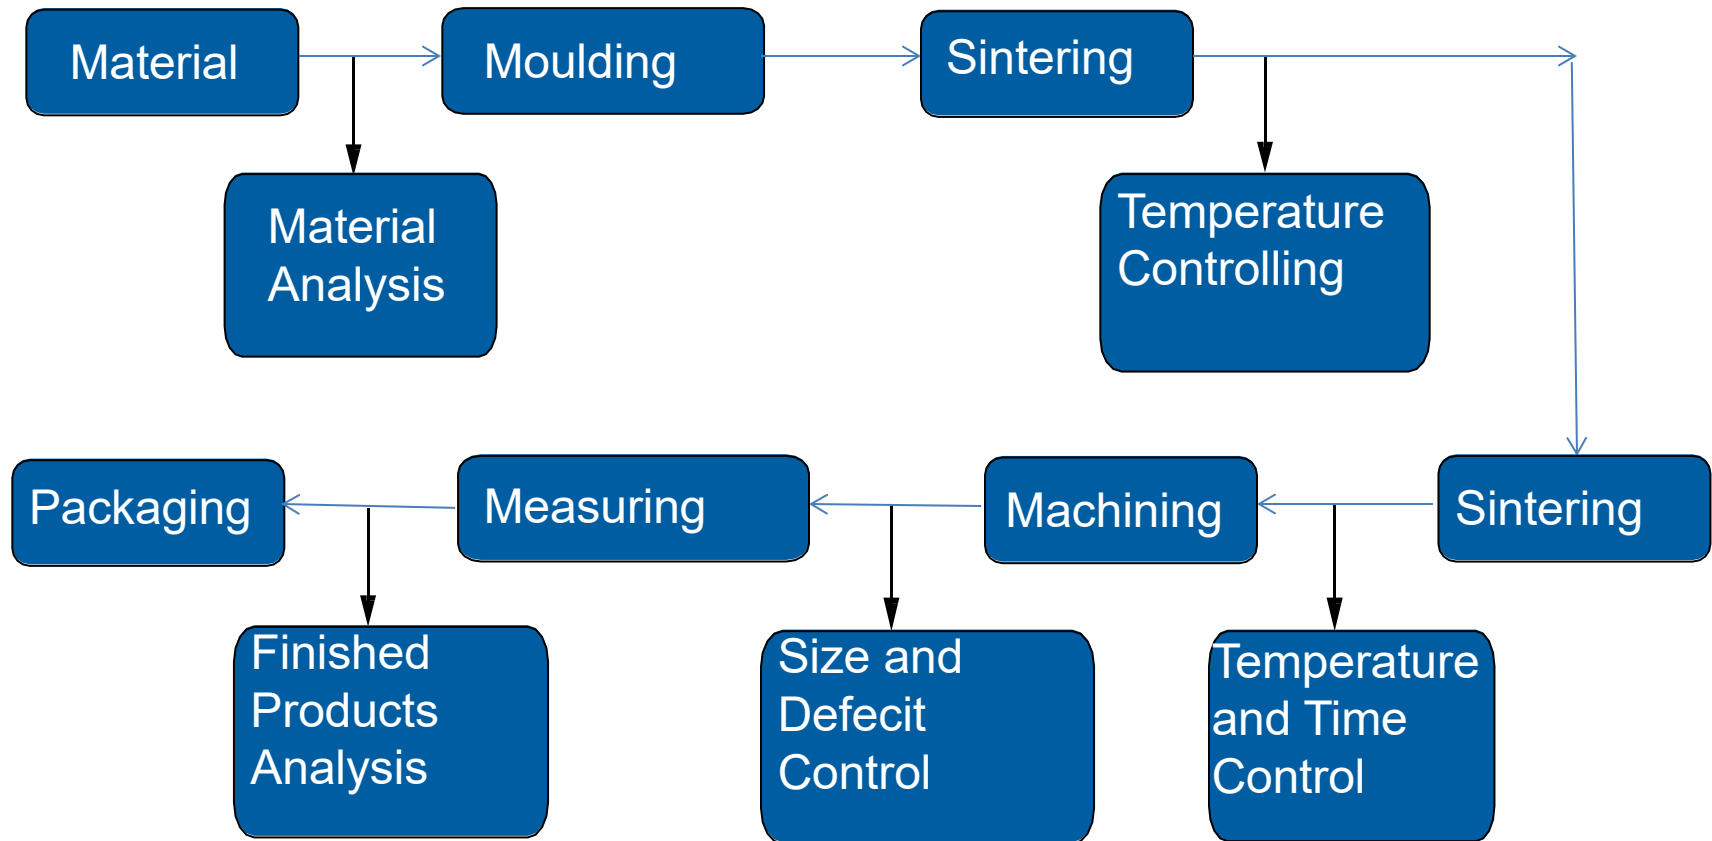

1. Main analysis and testing equipment

No	Instrument	Qty	Picture
1	Atomic Absorption Spectrophotometer TAS-990	1	
2	Pulse Infrared Thermal Conductivity Analyzer ON-3000	1	

No	Instrument	Qty	Picture
3	Laser Particle Size Analyzer BT-2003	1	
4	Auto Fast Specific Surface Area Analyzer BSD-BET400	1	

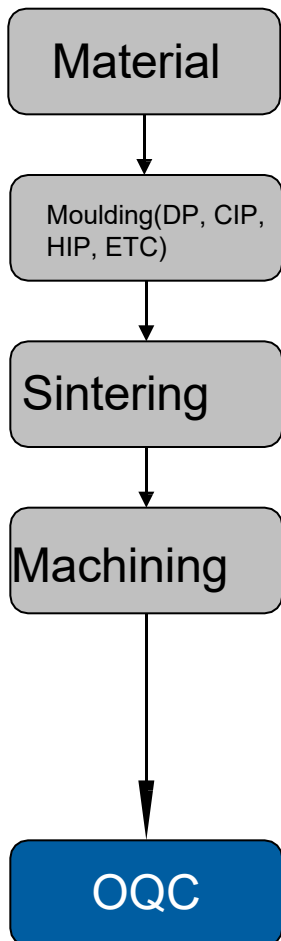

2. Production process and quality control

2. Production process and quality control

◆ **Test equipment:** Atomic Absorption Spectrophotometer, Pulse Infrared Thermal Conductivity Analyzer, Laser Particle Size Analyzer, Auto Fast Specific Surface Area Analyzer, etc.

◆ **Key points:** Chemical Composition, Physical properties;

3. Main customers

Based on technology and in-depth visit in customer's requirements With products of first rate quality, shortest delivery time and sincere service, our company is looking forward to serving you. We supply material complete solution for all over the world with great quality and competitive price.
