MOON STAR SEEDS
THE NAME YOU CAN TRUST

SPICES (08 PRODUCTS)

AJWAIN (CAROM) SEEDS

Carom (Ajwain) Seeds Strongly pungent and aromatic, ajwain seeds are one of the popular spices commonly feature in Pakistan , Indian and Middle- Eastern cuisines. Botanically, the spicy seeds belong to the family of Apiaceae (Umbelliferae), of the genus Trachyspermum.

ASALIYA SEEDS

Asaliya seeds (Lepidium sativum), sometimes referred to as garden cress to distinguish it from similar plants also referred to as cress, is a rather fast-growing, edible herb. Garden cress is genetically related to watercress and mustard, sharing their peppery, tangy flavor and aroma. In some regions, garden cress is known as mustard and cress, garden pepper cress, pepper grass, pepperwort or poor person's pepper. Garden cress or aliv or halim is a green, cool-season perennial plant used as a leafy vegetable, typically used as a garnish. When mature, garden cress produces white or light-pink flowers, and small seed pods. It has long leaves at the bottom of the stem and small, bright-green, feather-like leaves arranged on opposite sides of its stalks at the top. The seed contains arachidic and linoleic fatty acids.

DILL SEEDS (SOYA)

Dill Seeds have a much more potent flavor, similar to a combination of anise and celery. The flat, yellow flowers umbels of late summer give way to the seeds in fall. Dill seed has a camphorous, slightly bitter flavor and has a delicate flavor.

FENUGREEK SEEDS

Fenugreek (Trigonella foenum-graecum) is an annual plant in the family Fabaceae with leaves consisting of three small obovate to oblong leaflets. It is cultivated worldwide as a semi-arid crop, and its seeds are a common ingredient in dishes from the Asia Subcontinent. Fenugreek has three culinary uses: as a herb (dried or fresh leaves), as a spice (seeds), and as a vegetable (fresh leaves, sprouts, and microgreens). Sotolon is the chemical responsible for fenugreek's distinctive sweet smell.

FENNEL SEEDS

Fennel seeds start off green, turning to a greyish brown as they age. The freshest kind are pale green and are used for culinary uses. The seeds have a light, sweet, anise-like taste, very similar to licorice, and are usually used to add a warm fragrance to various dishes.
