- patented scissor mechanism
- one-stop OEM/ODM solution factory

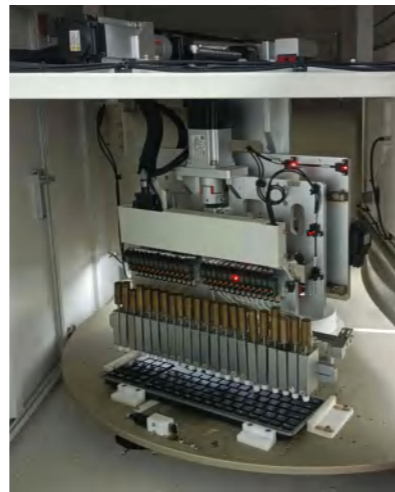

# Original Scissor Keyboard Manufacturer

## About our company

Space Key Technology has been manufacturing scissor key switches and modules since 2014, and established our own tooling workshop in 2016. In 2017, we set up a manufacturing factory, producing finished products for wholesaler and OEMs globally.

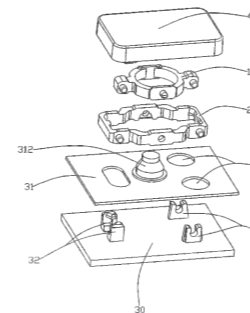

## Why us

We operate a scissor key module workshop, a tooling workshop, and an assembly factory in Dongguan. It ensures smooth integration from initial design to final production. Equipped with automatic keyboard testing equipment, one production line can produce around 2,300 sets of scissor keyboard each day. More than 40 models of scissor keyboard had been put into mass production. We maintain high-quality new product development every year.

## Innovative Patented Scissor Structure

We hold industry-leading patents for scissor switch manufacturing and design technologies. Unlike the regular scissor switches, our scissor switch can rotate 360° in any direction and has been granted an invention patent in China. Easier and quicker installation, with more convenient assembly. This scissor key design is more reliable, and provide a more balanced typing experience. Stable product quality also reduces customers' after-sales concerns.

## OEM/ODM customization

Space Key is dedicated to offering cost-effective products and services while creating value for our customers. The integrated manufacturing and cost advantages can add even more value to your product line. We aim to be a trusted supplier for well-known brands and global chain stores. Stay tunes for more new product updates.

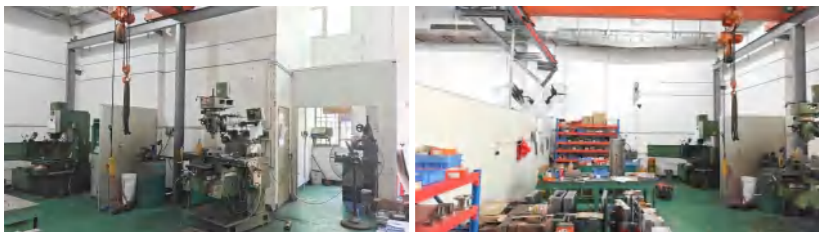

## Quality Control

Using advanced reliability testing equipments allows us to evaluate durability and categorize battery performance effectively.

## Mold Workshop

We have an in-house mold workshop offering complete ODM services for new tool development. It ensures seamless integration from design to production. All products are crafted using our exclusive, privately developed molds.

## Scissor Key Module Workshop

We are the original manufacturer of scissor key switches, with our own workshop to assemble both the switches and modules. Our testing process guarantees strict quality control, providing reliable and high-performance products.

15 LCD Customizable Keys

## Keyboard with Stream Dock

patented scissor mechanism

Version Available		
		
*	*	*

model: **KG689**

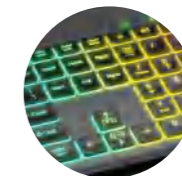

- \* HD LCD Keys: 15 customizable keys
- \* Stream Dock Software: Create macros, hotkeys, and scenes
- \* quiet scissor keystroke (patented structure)
- \* USB wired connection, adjustable tilt legs
- \* 7-color or white backlight (optional)
- \* Size: 439(L) x 128(W) x 22(H) mm
- \* Weight: 580g

**Easy Setup:** Assign unlimited actions to a single key and launch them all with a tap.

**15 LCD customizable keys:** Simply drag-and-drop actions onto keys, and assign ready-made icons or use your own.

**Control any workflow:** Simplify your work by using the Stream Dock instead of complicated keyboard shortcuts.

7-color or white backlight (optional)
