

SY GROUP LTD

SY Group has modern injection molding workshops, production and assembly workshops, and a standard BIFMA testing platform.

SY Group mainly engages in high-end ergonomic chair design, accessory production, finished product assembly and global sales.

Corporate Vision - **Innovator Of Office Chair Enterprises, to become a new star in the industry** and promote the development of the entire industry.

Supply Chain Integration

Core Strengths 1: From raw materials to finished product assembly, all are researched, developed and completed in our own factories, Stable quality and cost advantages

1

raw material

We have our own factories and R&D capabilities We have developed new environmentally friendly materials that comply with the latest ROHS2.0 and EU SVHC regulations. The quality is stable, which is different from the recycled materials used in the industry.

2

injection workshop

Implementing the highest quality standards and cost control. Quickly adjust the delivery time according to the orders.

3

office chair factory

Implementing the highest quality standards and cost control. Quickly adjust the delivery time according to the orders.

Raw Material

Core Strengths 2: Advanced Polymer Composite, “APC”

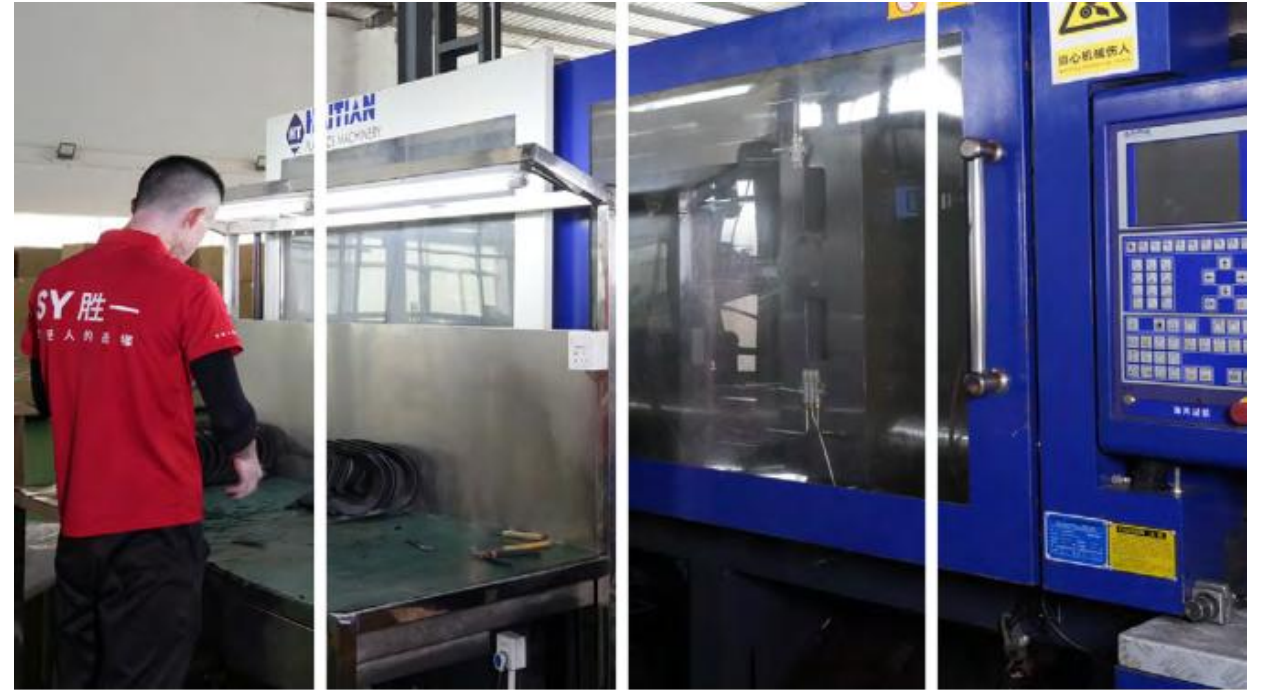

1.The founder, who graduated from Sun Yat-sen University and Sichuan University with a doctor's degree and a master's degree in polymer chemistry and physics respectively, successfully developed new advanced polymer composite materials (Advanced Polymer Composite, referred to as "APC" materials) that comply with ROHS2.0 and EU SVHC regulations by virtue of his professional polymer material background and university research and development resources, **replacing the tradition of using recycled plastics in the office chair industry.**

2.Advanced Polymer Composite, ("APC" material) is a new environmentally friendly material with excellent mechanical properties and outstanding comprehensive cost. It complies with the latest ROHS2.0 and EU SVHC regulations. It replaces the outdated mode of using recycled materials in the industry, better meets modern consumers' pursuit of health, and promotes the development of the entire industry.

Why SY-ERGO

1

Signing agreement customers

set up independent production lines.offer services to ensure quality and output.

2

Strategic Partner

Jointly develop new products .
Carry out collaborative development according to the market challenges.

3

Exclusive Sale

customize exclusive products for specific suppliers, ensuring exclusive sales rights to avoid vicious competition.

Offer different versions

1

GZ CIFF in March

2

Shanghai Pongdong Fair

3

Chicago Neocon 2024

4

Malaysia MIFF 2024

5

Lagos Nigeria 2024

6

Tokyo ORGATEC 2024

7

Canton Fair 2025

8

Mexico Fair 2025
