Welcome To Travelnota

Based in Shanghai, Travelnota specializes in crafting and manufacturing luggage for clientele across Australasia, North America, and Europe. Boasting over 10 years of expertise, Travelnota stands as your premier destination for all your luggage needs.

About Travelnota

Travelnota is committed to the research and advancement of sustainable and innovative luggage designs, in addition to providing consulting services. With a team comprising more than 10 professionals specializing in research and development, design, sales, and after-sales support, Travelnota delivers prompt, adept, and personalized solutions to a diverse clientele, both domestic and international.

Our Vision

01

Straightforward

Whether it's streamlining business processes or designing products with precision, simplicity is at the heart of our work. We focus on what truly matters and eliminate unnecessary complexity, ensuring clarity and efficiency in everything we do.

02

Sustainability

Our future success hinges on sustainability, not just in our final products but in every step of our journey. We are dedicated to cultivating long-lasting and sustainable relationships, ensuring that our commitment to the environment and our community is at the core of all we do.

03

Partnership

Partnership with our suppliers and customers is essential. We believe in growing together, fostering collaborative relationships that drive mutual success and long-term growth.

Innovation

The wheels take inspiration from skateboards and are crafted from top-notch raw materials. Their primary features include durability, smooth operation, and a high level of aesthetics. Notably, the wheels can be easily replaced manually whenever needed.

Our Facilities

Our 60,000 m² factory is located in Jiangsu, an eastern coastal province of China, with convenient transportation links. The nearest port is Shanghai, 300 km away, and it takes just 2 hours to reach the factory from Shanghai via the high-speed railway.

We specialize in manufacturing hard and soft side luggage, laptop bags, hiking bags, roller cases, garment bags, and trolley backpacks. Our in-house capabilities include injection molding, blistering, sheet cutting, fabric cutting, sewing, gluing, assembly, and packing. Our production focuses on sustainable and recycled materials, including ABS, PET, and polycarbonate.

Quality is at the forefront of what we do. We have inspectors stationed at every stage of production to ensure the highest standards. We adhere strictly to production plans and meticulously control materials and processes to minimize defects. Additionally, our own testing room allows us to closely monitor raw and auxiliary materials, semi-finished products, and test samples.

We have implemented a lean production system architecture in our management, along with 5S management, visual management, and time management. Our aim is to achieve the "Seven Zeros": zero conversion working hours, zero inventory, zero waste, zero defects, zero failures, zero stagnation, and zero disasters.

What our customers say

Bonny Wong, Senior Merchandiser for Oculas

I am very happy to work with Travelnota, Sunny and her team. We are not only business partnership and also friends. Communication & Cooperation; Responsible & Reliable; Helpful & Honesty; Suggestions & Solving problems; I am so lucky to work with Travelnota, Sunny and her fabulous team.

Emma Bryan, Regional Sourcing Lead for John Lewis

"If it weren't for Sunny and her team, we would never have developed and grown our own brand luggage business so successfully. Without in-house design capabilities for this product, Sunny's assistance has been invaluable in developing successful ranges that we can hardly keep in stock."

Katarzyna, Manage Director for SONET

Professional and Efficient is Sunny team's work style. Working with this amazing team makes our work easy and enjoyable. It is a pleasure to work with this company for nearly 10 years, and our business has grown rapidly for each other.
