

Company profile

ABOUT US

Shenzhen NewSun Material Technology Co., Ltd is the overseas business branch affiliated with Yunsa Power (Ningbo) Co., Ltd., also serves as the oversea business platform for the Special Battery Industry Alliance. Established in 2021, Yunsa Power (Ningbo) Co., Ltd is an innovative enterprise dedicated in the research, development and production of large tabless cylindrical batteries. Focused on the 46XX ultra-fast charging batteries, Yunsa is committed to supporting respectable customers with faster charging and cost-effective solutions.

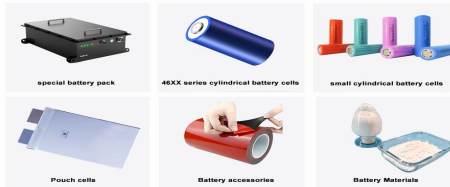

Dongguan Large Electronics Co., Ltd., established in 2002, with the support of Yunsa Power and other cell factories, is focused on the customized special lithium-ion packs, serving special applications, such as construction machinery, oilfield equipment, medical devices, solar energy storage, security facilities, emergency power supplies, and ultra-low temperature energy storage. Large is a leading packer in China's special battery field.

Shenzhen NewSun Material Technology Co., Ltd is taking care of the oversea sales of Yunsa Power (Ningbo) Co., Ltd, also authorized to manage the oversea business of Large and its related products, serving the outstanding customers globally.

Our advantage

Our vision is to be a leader of the fast-charging power battery. With 20+ years of experience in the lithium ion battery industry, the team has strong R&D and manufacturing capabilities. The significant progress has been made in the structure and process development of the tabless 46XX batteries, markedly improving the battery's rate performance, low-temperature performance, and high-temperature performance. Products are well-used in the fields such as eVTOL, construction machinery, electric vehicles, electric bicycles, and energy storage, especially in applications with extreme requirements such as fast charging, rapid discharging, or ultra-low temperatures.
