

Dongguan Haolong Tec. Co.,

Company Introduction

Established in 2016, Dongguan Haolong Technology Co., Ltd is located in Chang'an Town, Dongguan - the heart of the Pearl River Delta. Our facility spans over 5,000 square meters and enjoys strategic access to multimodal transport, enabling efficient delivery of products via sea, land, and air to clients across China and overseas.

We specialize in providing integrated precision injection molding solutions, including:

- * Injection mold design and fabrication
- * Plastic injection molding
- * Engineering and manufacturing support
- * Plastic parts assembly

Equipped with more than 50 precision injection molding machines and backed by a seasoned team - including 2 senior product designers and 6 engineers with over 10 years of experience - we have extensive expertise in producing components for electronics housings, mobile phone and iPad cases, communication devices, automotive parts, container lids, cosmetic pumps, and more. We primarily serve brand partners through ODM/OEM collaborations.

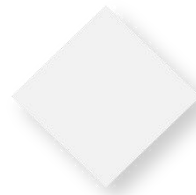

From development, design, and production to assembly and shipping, we offer reliable one-stop service tailored to our customers' needs.

At Haolong Technology, we operate under a "Quality First" principle. Through strict factory management, we embed quality objectives into every production stage. Each position follows rigorous inspection procedures, with detailed records and evaluations to ensure consistent, high-standard output.
