57 units Plastic Injection Machines

2 Toshiba Precision Injection Machines

Painting

1 Curved Surface Printer

1 Epson Stylus Pro 7908+curved surface printer

1 Painting Workshop

Assembly

4 Assembly lines

268 Workers

Aging Test

* Cloud WiFi Digital Photo Frame - 8 Hours

* Laptop - 6 Hours

* Tablet PC / Dash Camera - 4-6 Hours

Packing

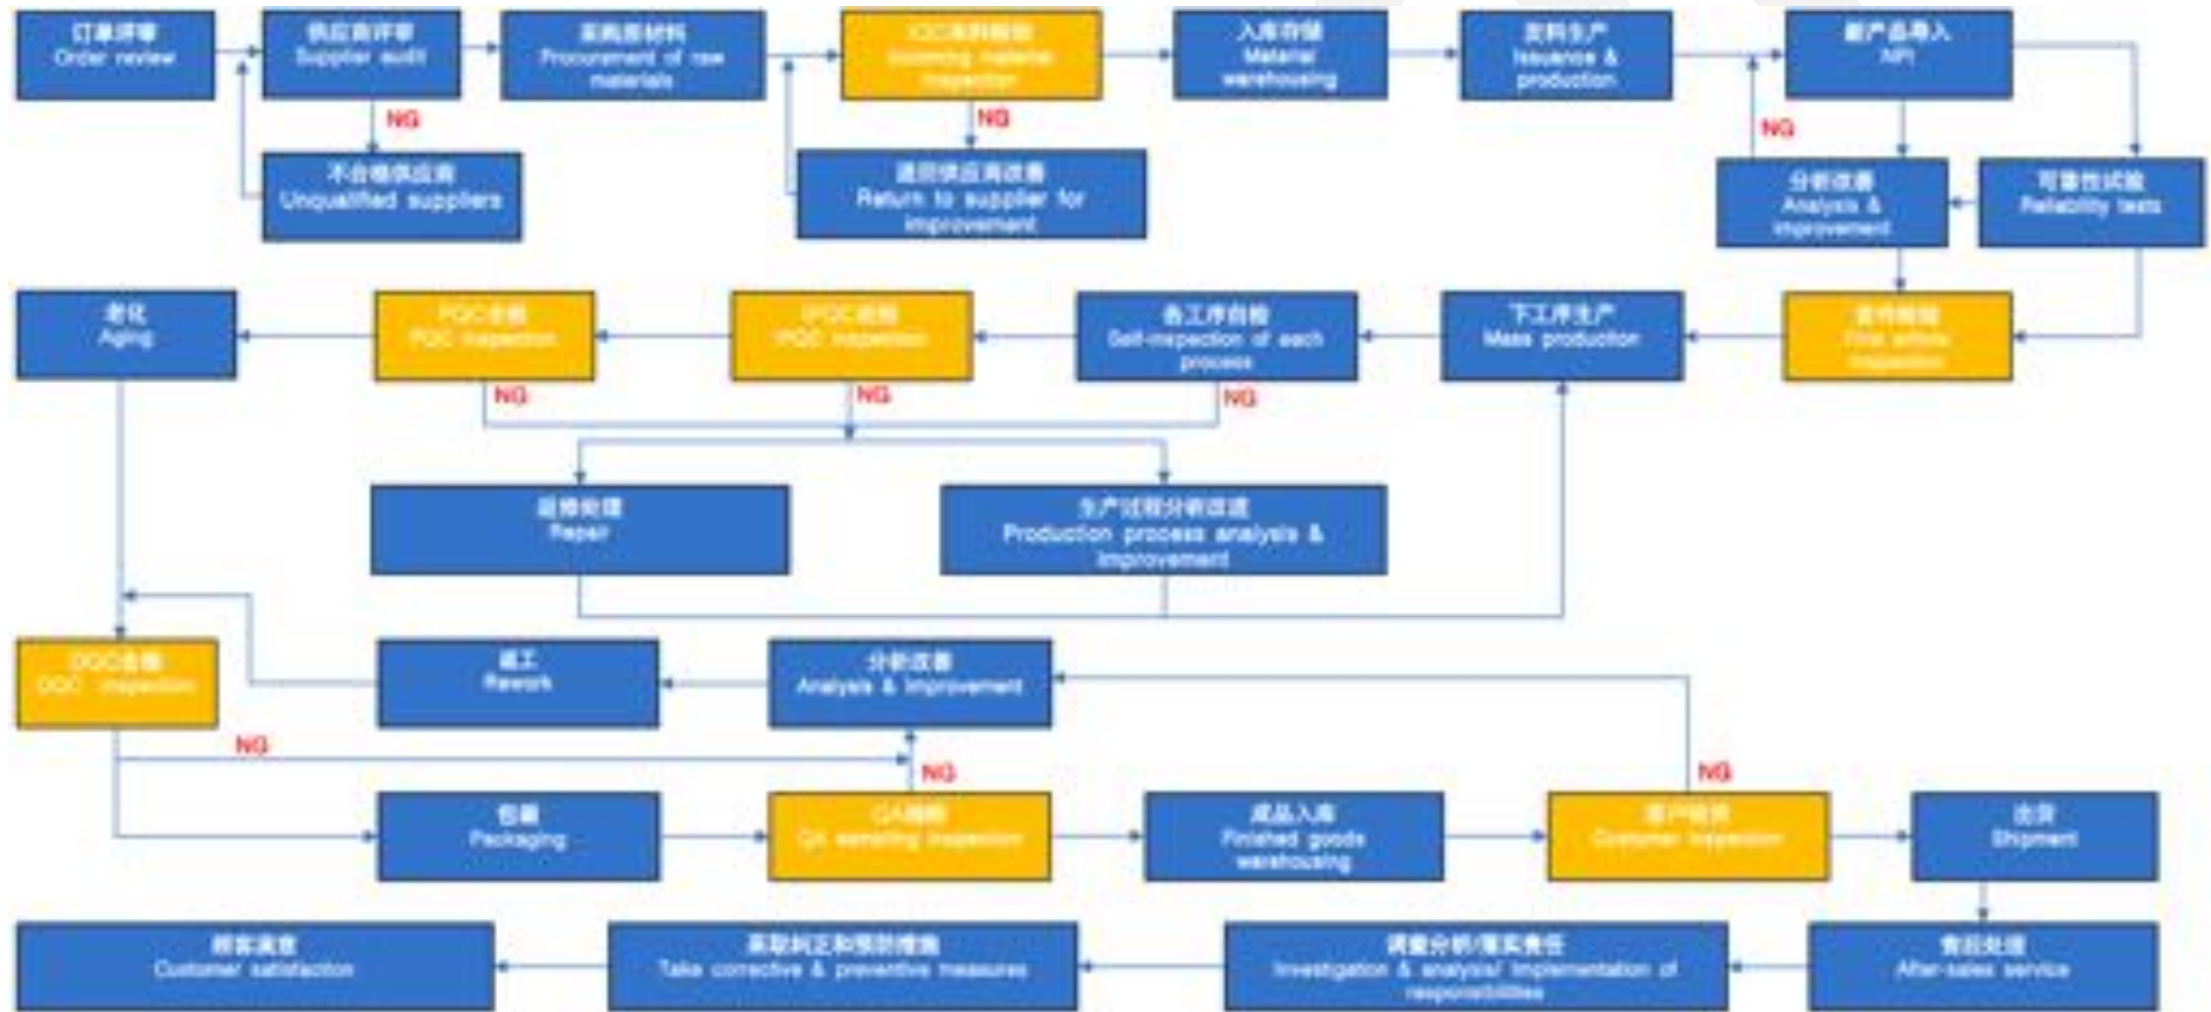

2 Shrink Wrapping Machines

1 Laser Marking Machine

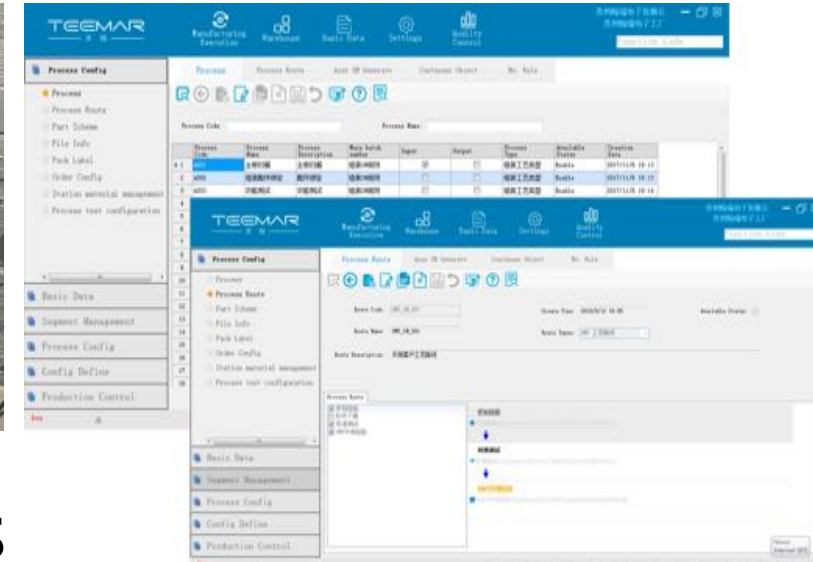

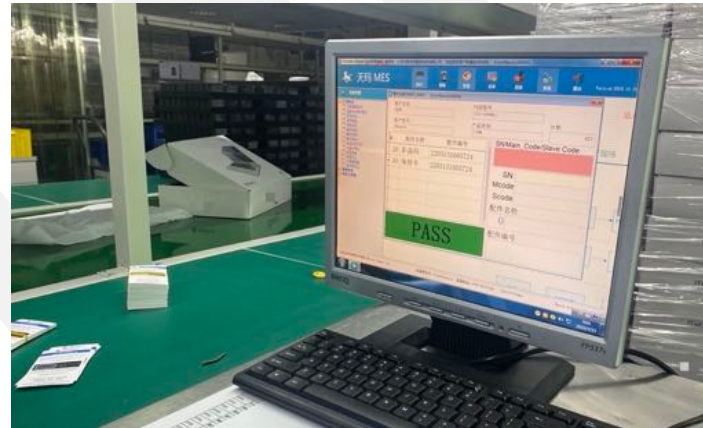

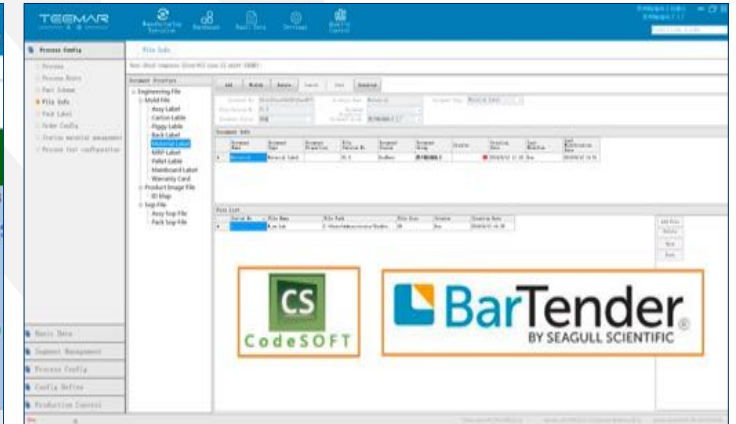

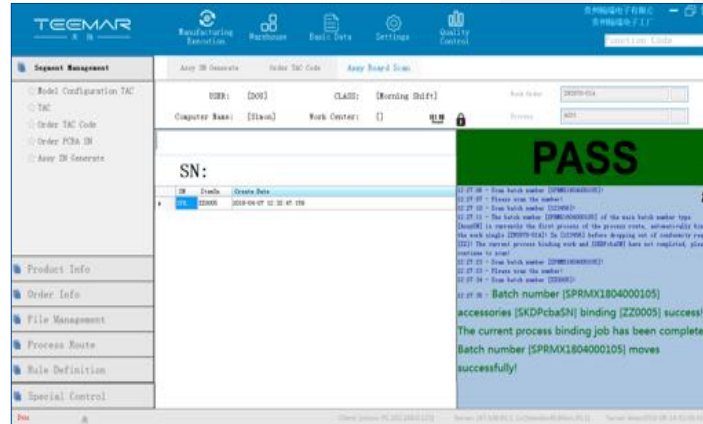

2 Packing Lines

Quality Control Flowchart

QC System

Manufacturing Execution System for Orders

Testing Equipments

Luminous Flux Meter	GPS Signal Repeater	Digital Sound Level Tester	ESD Generator
	ESD Generator	RoHS Tester	DTV Signal Generator
Electronic Microphone Tester	Audio and Sweep frequency signal generator	Speaker Auto Polarity Tester	Microphone Auto Polarity Tester

Temperature & Humidity Testing Chamber	Battery Capacity Tester
	Salt Spraying Tester

Quality Goal

1. One by one each pieces inspection on incoming main material : PCBA,TP and Screen,etc.
2. *100%* inspection after assembling, checking device one by one ,to make sure every function and material works well.
3. *100%* aging test with 4-8 hours for each unit.
4. Full inspection by QA again after aging testing.
5. In packing process, we have to make final testing again on each device .
