

Company Overview

Founded in Shanghai, Shanghai Jiasutong Trading Co., Ltd. leverages over a decade of expertise in chemical manufacturing and export, and has since expanded into the transportation business. Specializing in the production of intermediates, peptides, and various fine chemicals, the company exports its products to more than 30 countries worldwide. Adhering to the mission of Technology Leading Health, we are committed to innovation and the delivery of high-quality health products on a global scale.

Production Capacity and Quality Assurance

The company operates a 3,000-square-meter production facility, staffed by 60 dedicated employees, ensuring consistent high quality across all manufacturing stages. Quality control is overseen by three highly qualified inspectors, each with at least three years of experience, who conduct meticulous inspections at every phase of production. This rigorous system ensures that our products meet both domestic and international regulatory and customer standards.

Market Presence and Corporate Vision

Our products and services are well-regarded both in China and internationally. We have built a reliable partner network across the United States, Europe, Australia, Southeast Asia, the Middle East, and South Africa. With a strategic focus rooted in the domestic market, we continue to increase investment in R&D, prioritize scientific environmental protection, and pursue sustainable development. Our vision is to evolve into a modern, environmentally conscious, and technology-driven global enterprise that sincerely contributes to society.

Partnership and Service Commitment

By choosing us, clients gain a reliable long-term partner, high-quality products, fast and secure shipping, and worry-free after-sales support. We have established a dedicated technical and after-sales service team to respond promptly to inquiries and provide comprehensive assistance. We look forward to building mutually beneficial, lasting collaborations with clients around the world.

Core quality excellence

We supply 99% high-quality products (all kinds of quality products) directly from Chinese factories. The use of advanced biosynthetic technology combined with multi-species chemical engineering, ensuring the final structure, quality, activity and purity. The ownership specification is uniform and the quality is tested, which corresponds to the international business certification. High-efficiency distribution means that the area is full of scientific research, production of biological systems, and other industrial demand

**For Research.
For Discovery.
For Progress.**
