

Qingdao Anlone Biotechnology Co., Ltd.

COOPERATION CREATES VALUE

The Pioneer and Leader in China's Self-Heating Products Field.

**COLD ON THE LEFT,
HOT ON THE RIGHT.**

COMPANY PROFILE

QINGDAO ANLONE BIOTECHNOLOGY CO., LTD.

Qingdao ANLONE Biotechnology (established in 2009) is a pioneer and leader in China's self-heating product sector, focusing on winter warming, summer cooling, home care, and health and wellness products. The company participates in the formulation of multiple industry standards, holds qualifications such as ISO9001 and high-tech enterprise certification, and possesses dozens of patented technologies.

We adhere to 'creating value through cooperation, ' have a complete **left-cool, right-warm** product line, and continuously invest in research and development, launching new products every year to help our partners expand profit growth opportunities.

▶ ▶ ▶ CHRONICLE

2025

Invited to become one of the drafters of the industry standards for Chinese steam eye masks, and a company revising the standards for Class II medical heat patches. Expanded a 3,000 m² medical-grade clean workshop and a 4,000 m² multi-level unmanned warehouse, bringing the total factory area to 20,000 m².

2019

The company was awarded as a specialized and innovative SME in Qingdao for its products (technology), and has been continuously developing more series of products.

2014

Invited by the China National Institute of Standardization, became one of the main drafting units for the industry standards of Chinese heat patches.

2010

Successfully developed the country's first three-row automatic warming patch machine, laying the industrial foundation for large-scale production of domestic warming patch products.

2006

Invested in the research and development of self-heating products, becoming one of the earliest companies in China engaged in the production and R&D of self-heating products.

2021

Approved for the production registration license of Class II medical devices, adding the moxibustion heat patch product series. The company has been awarded the High-Tech Enterprise certification.

2017

A new factory covering 30 acres has been built, with a plant area of 12,000 square meters, achieving a new production capacity of 1.6 million units per day.

2012

Successfully developed a dedicated multilayer breathable composite material for self-heating products, enabling domestic warm patch products to gradually meet international standards in terms of technical parameters and performance.

2009

We have spun off the relevant business unit and established it as a separate entity named Qingdao ANLONE Biotechnology Co., Ltd.
