Rpet Bag/PLA Bag/Bamboo Fiber Bag

PET, is a type of plastic resin as well as a form of polyester. It can be fully recycled, in which case it becomes recycled polyethylene terephthalate, or Rpet. For Rpet material, we can use to do Rpet non woven, Rpet Polyester, Rpet cotton and so on. For Rpet non woven bag, we usually do outside lamination, then it can make the bag colorful and fashionable. Rpet polyester and Rpet cotton are also used very commonly at present. Usually we do it with screen or sublimation printing. All of them are suitable for shopping and promotion.

Cotton Bag

Cotton is a natural fiber harvested from the cotton plant. It is one of the oldest fibers under human cultivation. Usually we have 80–500gsm different thicknesses. Jute bag is made of Natural Fiber that is extracted from the bark of the jute vegetable plant. It is soft and shiny fibre, which is one of the strongest fibres in the world. For both kinds of bags, we can do many different kinds of printing, such as screen printing, heat transfer printing, offset printing, sublimation printing, even Embrodiery and so on.
