COMPANY PROFILE 企业简介

安平县顶之选金属丝网制造有限公司位于河北省安平县城南工业园区，是一家集生产、加工、销售、安装为一体的先进金属防护网企业。我们经过多年的研发，产品不断推陈出新，大力发展多样化产品。始终坚持技术创新、科学管理、诚信经营、的经营理念服务社会，注重引进先进的生产技术设备，推行标准化生产，从原料采购、生产管理产品检测等关键环节严格把关，做到每批原料检测后生产，每批成品检测后出厂，确保了产品质量，赢得了客户的信赖，与国内外多家企业保持着长期稳定的合作关系。

本公司专业生产金属护栏网、体育场围网、铁马护栏、移动护栏、水库隔离网、锌钢护栏、道路护栏、基坑护栏。我公司生产的产品广泛用于公路、铁路、或者高速公路、桥梁两侧作为隔离栅使用，可以作为防护绿化带、机场、港口、码头的安全防护、市政建设中的公园、草坪、动物园、池湖、道路、住宅区的隔离与防护、宾馆、酒店、超市、娱乐场所的防护与装饰等。我公司可根据客户需求订做不同规格的金属丝网产品。

我们一直是以“质量精良、交货及时、价格合理、服务周到”的宗旨来为广大客户服务。并且是本着“质量求生存，信誉谋发展”的生产原则，赢得了广大新老客户的好评。诚恳广交天下朋友，为服务社会携手并进，共创辉煌。

Anping Allgood Wire Mesh Manufacture CO.,LTD located in the south industrial park, Anping county, Hebei province in China. Which is a advanced metal fence enterprise provide service from production, processing, sales to installation. After years of research and development, our products are got rid of the stale and continue to creative efforts. Always adhere to business philosophy of technological innovation, scientific management, good faith management serve the society, pay attention to the introduction of advanced production technology and equipment, implement standardized production, maintain a strict standard from raw material procurement, production management, product testing and so on, make every batch of raw material inspection before production, each batch of finished products tested before send out from the factory, to ensure the product quality, won the trust of customers, maintain a long-term and stable relations of cooperation with a lot of companies in domestic and foreign country.

Allgood specializes in the production of metal mesh fence, chain link stadium fence, crowd control barrier, temporary fence, reservoir safety fence, steel pipe fence, road fence, construction pit fence. Our products are widely used in highway, railway, Bridges both sides, can be used as a protective barrier for green belts, airports, ports, docks safety protection, municipal construction of parks, lawns, zoo, pool, river protection, roads, residential area, hotel, hotels, supermarkets, entertainment protective and decorative. Different customization specifications of wire mesh products according to customer demands are acceptable.

We always serve our customers based on the purpose of "excellent quality, timely delivery, reasonable price, thoughtful service". And in line with the principle of "quality of survival, reputation for development", won the majority of new and old customers. Sincerely wish to make friends with the clients from all over the world, to serve the society hand in hand, create brilliant.

CHAIN LINK FENCE

Edge type	Twisted-Twisted, Knuckle-Knuckle, Twisted-Knuckle
Color	green, white, black, brown, blue, etc.
Customization specification is acceptable	

Galvanized chain link mesh PVC coated chain link mesh Stainless steel chain link mesh

- ADVANTAGE Colour—coated varieties Durability
- Quick installation
- Security Ease of maintenance and repair
- Cost Effectiveness Comes with a variety of design options

Chain link fence is made from galvanized or PVC coated steel wire, to fix with posts, brace and fittings to build a chain link fence system in the courtyard,park, tennis court, airport and other places. Also can be used for animal breeding. Chain link is mainly divided into galvanized, PVC, PE-coated three finishing chain link fence with easy construction and maintenance, bright colors, which are the preferred products to beautify the urban environment .Also can be stainless steel material for commercial area fencing system.

Fencing of lakes, pools, rivers, etc Fence for Stadium, basketball court, football field, tennis court and other stadium

SPECIFICATION

		1.5"		2-3/8"		
Aperture	25mm	40mm	50mm	60mm	75mm	100mm

CHAIN LINK FENCE ACCESSORIES&PARTS

The chain link fence parts like below drawing includes post caps, rail ends, sleeves, tension bars,tension bands, brace bands, tie wires, tighteners, clamps, barbed wire arms, and any other chain—link fence parts you might need. Gate Parts

Once you have the fence, you need the gate. We offer versatile and comprehensive gate parts packages, including the basics, like bolts, as well as hinges, latches, sliding gate rollers, elbows, and swivel gate wheels. These gate parts work for cantilever gates, swing gates, double gates, barrier gates, and more.

PVC POWDER COATED FITTINGS

APPLICATION

CHAIN LINK MESH CONSTRUCTION BARRIERS

The Orange highly visible diamond mesh construction barriers, extremely stable, suited for civil, construction and infrastructure sites. With size 2.2m long x 1.25m high, It' s ideal for controlling and directing pedestrians, employees and contractors or to warn of hazards to isolate work zones. Diamond mesh Construction Barriers — High —vis orange, fully galvanized tube for extended life outdoors with interlocking lightweight tubular steel. Low profile — removable feet minimise trip hazard and allow easy storage and is designed for rapid deployment.

SPECIFICATION

Frame: 20mm , 25mm, 32mm, 38mm (Customization size is acceptable) Wire: 3mm, 3.5mm,4mm (Customization size is acceptable) Mesh:40x40mm, 50x50mm,60x60mm, 70x70mm etc.

Wire Material: galvanized wire or PVC coated wire

APPLICATION

CHAIN LINK MESH DOG KENNEL

Chain link dog kennel is a rust—resistant galvanized steel construction. Modular easy—sembled panels. The kennel legs allow for easy cleaning when the unit is placed on a hard flat surface. Square corners at the bottom of each panel and gate better contain small pets. No holes to dig, concrete to mix or wire to stretch. Portability helps to prevent lawn damage.

FEATURES

Super strong and durable galvanized heavy duty steel frame
Raised off the ground make it easy for sanitary cleaning
Perfect for dogs, cats, chickens or other small animals
Lockable gate latch cannot be opened by your pet
Powder-coated finish
and no sharp edges
Well-suited for yards,
patios and decks
Simple to assemble &
no-tools required
Pre-assembled gate include

358 ANTI-CLTMB FENCE

As an anti-climb & anti-cut through barrier, 358 welded wire security fence is designed with maximum security in mind. It is ideally suitable for electronic alarm and detection systems, fencing in prisons, military sites, and airports, industrial and commercial properties, warehouses, power plants, laboratories, secure hospitals, schools, parks, leisure and recreational areas. 358 fence will give them a long lasting and secure perimeter protection with attractive appearance.

APPLICATIONS

Bridge anti-climb guarding & guard safety screening
Psychiatric hospital security fencing
Prison security fencing
Factory machine guards

Walkway security fencing
Airport security fencing Shipping Port
Security fencing
Electrical sub-station fencing
Gas pipelines security fence
High security living area and private field fence.

AU TEMPORARY FENCE

One of our most popular wire mesh fence product is temporary fencing. There is a wide range of temp fencing including:

Perfect for civil construction projects

Public Events

Temporary Pool Fencing

Toilet Hire

Event Flooring

Large building and commercial construction,

Sporting events and environmental protection areas;

It can also be used in small quantities to restrict access around safety hazards on site or in the public domain.

TEMPORARY FENCE SYSTEMS:

Including temporary Fencing Panels, temporary fence feet, temporary fence clamps and stays, which is very stable, versatile and cost effective.

TEMPORARY FENCE STAY BRACE:

Uses: support the temporary fence in high wind areas.

Australian Standard

Each Stay: 2 Clamps and 1-3 Plastic Feet.

SPECIFICATION

APPLICATIONS

- Mainly used in highway and railway bridge on both sides of the protection zone.
- Airports, ports, terminals security.
- Municipal building in the park, lawn, zoo, pool lake, roads, and residential isolation.
- Guest Houses, hotels, supermarkets and entertainment protective.

3D WELDED FENCE TOP WITH ROLL TRIANGLE

3D welded fence top with roll triangle also called 3d curved mesh fence, 3D fence panel, welded wire fence, BRC fence, PVC fence, powder coated wire fence, fence panel, Garden Fence or safety fence.

3D WELDED FENCE TOP WITH CIRCLE

3D welded fence top with roll circle also called 3d curved mesh fence, 3D fence panel, welded wire fence, BRC fence, PVC fence, powder coated wire fence, fence panel, Garden Fence or safety fence.

APPLICATIONS

Mainly used in highway and railway bridge on both sides of the protection zone. Airports, ports, terminals security. Municipal building in the park, lawn, zoo, pool lake, roads, and residential isolation. Guest Houses, hotels, supermarkets and entertainment protective.

APPLICATIONS

Mainly used in highway and railway bridge on both sides of the protection zone. Airports, ports, terminals security. Municipal building in the park, lawn, zoo, pool lake, roads, and residential isolation. Guest Houses, hotels, supermarkets and entertainment protective.

SPECIFICATION

Material: low carbon steel wire, galvanized wire and stainless steel wire.

Characteristics: welded, anti—corrosion, durable, easy to withstand outdoor exposure, corrosion—resisting, etc. Surface

Treatment: Hot—dip galvanized ,galvanized +PVC power coated ,black carbon steel wire+PVC power coated.

8/6/8f16/5/611-N4ffi*ž

8/6/8 ANE 6/5/6 DOUBLE WIRE FENCE

Double Wire Fencing, also called twin wire mesh fence, 868 fence panel, 656 fence panel, with its flat panel, using double horizontal wires and vertical wires to form rigid mesh. The surface treatment is coated by hot dipped galvanized or polyester powder coated. Double Wire Fencing is popular in Europe market,using for parks,industrial sites, residents etc.Stopping people from cutting through or climbing over your fencing system is essential for schools, sports grounds and many other public places.

12

13

CROED CONTROL BARRIER

Crowd Control Barriers have been designed for use at events that need to accommodate for a larger crowd. Crowd control barriers (also referred to as crowd control barricades, with some versions called a French barrier or bike rack in the USA, and mills barriers in Hong Kong, are commonly used at many public events. They are frequently visible at sporting events, parades, political rallies, demonstrations, and outdoor festivals. Event organizers, venue managers, and security personnel use barricades as part of their crowd management planning.

TEMPORARY POOL FENCE

The portable pool fence panel is installed surrounding the swimming pool, so that it can supply the completed security until the construction ended. As a decorative fence, Steel fences share many of the benefits of wrought iron and aluminum fences without their drawbacks. Steel fences can give you almost the same look as wrought iron and aluminum, but it is much stronger and more durable. Steel can be great for both residential and commercial settings and makes a great security fence for all properties. Steel fence, using vertical steel pipes, pickets and horizontal rails to make into the the fence. The surface treatment of steel fence is coated by galvanized + powder coating or hot dipped galvanized. The fittings of the steel fence pickets are metal clamps . Steel fence is particularly used in the United States, Australia, with its Decoration function, and it is also popular in most countries and areas.

WELDED STEEL FENCE PANELS FOR RESIDENTIAL**SPECIFICATIONS**

Panel Size:	2300mm (L) x 1350mm (H)	Customization acceptable
Pipe Frame:	32mm OD	
Top / bottom pipes:	25mm OD	
Vertical pipes:	14mm OD	
Finish:	Hot dipped galvanized	

ADVANTAGE

Easy to install and dismantle
 Having minimum impact on the ground
 Strong and secure

APPLICATION

WELDED WIRE MESH PANEL

The welded wire mesh panel has thicker wire diameter from 3mm to 8mm and larger opening sizes from 30x30mm to 200x200mm, for high security applications, such as prison fencing, factory fencing and other site security fencing. The welded wire mesh panel is made of black steel wire, low carbon steel with galvanized or PVC coating surface and stainless steel wires. All of them has excellent corrosion resistance performance and durable life except black steel wire.

//V/JN{

Stainless Steel Welded Wire Mesh Panel

APPLICATION

RAZOR BARBED WIRE CONCERTINA COIL

Razor Barbed Wire Concertina Coil has been utilized as a part of high—security areas, for example, borders, air terminals, railway stations and so forth however generally it has increased extraordinary popularity and is currently utilized as a part of all manufacturing businesses to prevent encroachment and subsequent thefts.

Razor Barbed Wire is also named concertina coils,concertina wires.It made by hot—dipped galvanized blade or stainless steel blade, high tensile strength core wire(steel wire with 1200mpa tensile strength or stainless steel wire).The surface also can be with plastic coating and to be different colors.

APPLICATIONS

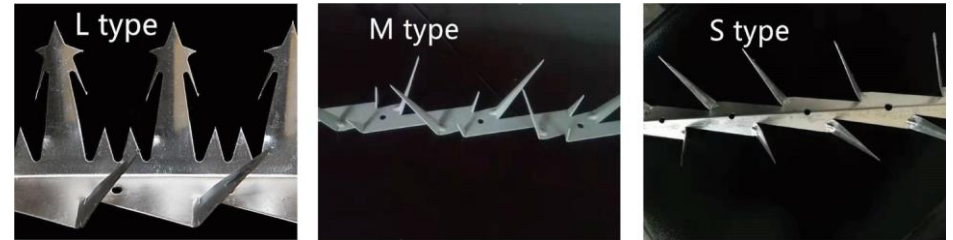

- Railway Stations, Airport Security.
- Military Security, Border Security.
- Restricted areas like Nuclear Plants. Oil Refineries, Thermal plants Research Organizations.
- Automobile companies
- General Fencing - Household Fencing etc.

BARBED WIRE

It is a type of steel fencing wire developed with sharp edges or points arranged at intervals along the strand. Barbed wire is twisted and woven by fully automated barbed wire machine, it' s commonly know as tribulus, thorn wire in folk. The finished products is divided into single strand barbed wire and double strand barbed wire.Barbs are diagonally cut in order to provide sharper points; they may consist of one or two pieces (two or four points) and are generally spaced at intervals of 4 to 5 inches (10 to 13 cm). Surface treatment process: electric galvanizing, hot galvanizing, PVC plastic coating. There are blue, green, yellow and so on.Application: used for boundary protection of grassland, railway, highway, etc

The Razor Spikes are similar to cactus in shape - having sharp spikes on their body. also called Wall spikes, it' s a simple yet effective anti climb method of enhancing the security of an existing wall or security fence and are a suitable alternative to Razor Wire. These Spikes have pre formed holes for fixing to the wall or fence. The length usually can bel 2m, 1.25m or 1.5m.

Based on the shape of the sharp spike, there are Large type spikes, Middle type spikes, Small Type spikes.

HINGE JONT WOVEN WIRE FENCE

This woven wire fence is known by a lot of names: box wire, woven wire, non—climb,field fence,horse fence, cattle fence,sheep fence,goat fence,chicken fence,farm fence ,etc. We will use the term woven wire to describe any fence that has vertical and horizontal wires connected to form a grid. These grids can be many different sizes depending on the distance between the wires.

APPLICATION

It' s usually be used for field fence,horse fence,cattle fence,sheep fence,goat fence,chicken fence,farm fence.

A119Ed

FIXED KNOT WIRE FENCE

Fixed Knot Fence also named deer fence, it' s a High Tensile Fencing, is the strongest metal fence type on today's market for deer and cattle management.Livestock owners choose this type of metal

deer fence to keep-in large livestock animals including bison and cattle and trust that it will protect animals because of its high tensile strength.

Fixed Knot Fence

Fixed knot fence, made of high tensile, wire or mild steel, is the strongest field fence formed by tying a third wire to conjunction to enhance holdin; strength.

22

STUDED T-POST

Steel Studded T—Post is rugged and easy to drive into any terrain, this T—Post is suitable for both agricultural and lawn and garden fencing posts. It' s also named tee posts, steel post. This steel Tee post especially welcomed by USA Canada Germany market.

A119Wd ANPING ALLGOOD WIRE MESH MANUFACTURE CO.,LTD

Y POST/STAR POST

Y fence posts are metal star pickets popularly used in Australian and New Zealand market, also known as Australia Fence Post. There are 4 types of surface treatment: Bright Hot—dip galv. star picket post or electro galvanized, or black bitumen coated , or black, Green and other colors PVC—coated steel post.

A119Wd ANPING ALLGOOD WIRE MESH MANUFACTURE CO.,LTD

SPECIFICATIONS

- Material: galvanized steel, aluminum alloy and stainless steel.
- Width: 4-3/4", 7", 9-1/2", 11-3/4", 18-3/4" and 24".
- Channel height: 1-1/2", 2", 2-1/2" and 3".
- Plank thickness: 14G, 12G and IOG. Other thickness can be customized.
- Clear span: 2', 26", 3', 3'6", 4', 4'6", 5', 5'6", 6', 6'6", and 7',8', 10'.

Diamond safety grating plank has different diamond quantities to suit different applications. Commonly, it can be 2-diamond, 3-diamond, 4-diamond, 5-diamond, 8-diamond and 10-diamond.

23

PUNCHING ANTI SLTP GRATING

Punching anti slip Plank Grating usually be used for rooftop walkways, catwalks, stairs, and other surface applications when safety is critical.Made by forming and punching metal, Plank Grating comes in a variety of materials including Aluminum, Carbon Steel, Galvanized Steel and Stainless Steel. Different construction types consist of Plank, Walkway (both with heavy—duty options), Interlocking, Extruded Interlocking and Heavy—Duty Plank.

A119•d

DRAINAGE TRENCH GRATING COVER

Drainage trench grating is made of carbon steel and stainless steel suit different applications of customers. Carbon steel grating is the most economical grating among the two types and the stainless steel grating has unique chemical stability, it is the ideal products to be used in the acid or alkali environments and keep a long service life. Steel bar grating is a widely used grating type. It can be used in the trench and drainage system as the trench and drainage cover to ensure the excellent drainage performance and secure the pedestrians safety.

A119Wd

STEEL STAIR TREADS

welded steel bar grating stair treads, manufactured in accordance with NAAMM (National Association of Architectural Metal Manufacturers) standards, are made to your size requirement. Bar Grating Stair Treads from Direct Metals are ideal for many different applications. Bar Grating Stair Treads are available in carbon steel, or stainless steel. Stair treads in each of these metal grating types are available with plain and serrated surfaces.

FEATURES

- Easy to install and uninstall. It doesn't need any complicated skills. Welding and bolts connections types for choice.
- Good ventilation of light, air and water. Large holes of stair treads make it easy for light and air ventilation.
- Slip resistance. Serrated surface and nosing added can improve the slip resistance performance.
- High strength and high load carrying capacity. Riveted steel grating stair treads supply high load carrying capacity.
- Corrosion resistance. Aluminum steel grating and galvanized steel grating can ensure the outstanding corrosion resistance of stair treads.
- Alkali and acid resistance. Stainless steel stair treads has excellent chemical stability for long service life.
- Low maintenance cost. It is easy to clean the dust and dirt and cost less.
- Good drainage. The large holes of stair treads make it easy to drain water and keep the stair treads dry.
