▲ Silicone Chopstick Holder.....	43-45

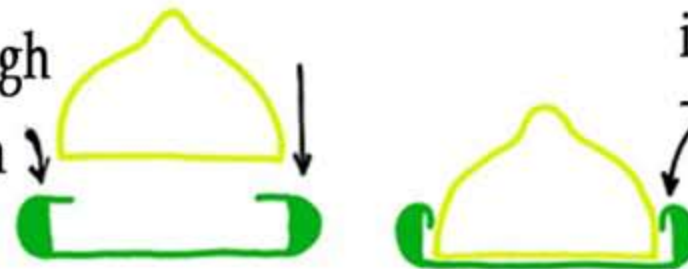

Silicone Food Huggers

HOW IT WORKS

Produce pushes through
the flexible rim

The rim stretches and molds
itself around the produce
-creating a light seal

The cut face sits flush against the silicone bottom to
seal in juices and prevent moisture loss

Just press your fruit or vegetable cut side down into the hugger.
This seal helps prevent air circulation which causes food to spoil or dehydrate.
Pls contact Hoosam to get more information.

Silicone Pastry Brush

A pastry brush, also known as a basting brush, is a cooking utensil used to spread butter, oil or glaze on food. The unique silicone bristles feature circular gaps in the center bristles that hold liquids for easy transport and spreading.

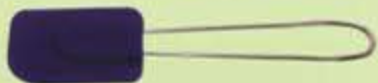

Silicone spatulas set

Multipurpose silicone spatula is ideal for use with nonstick cookware. Silicone is durable enough to withstand heat up to 600°F, yet soft enough that it won't scratch your cookware as you use it for scraping bowls, folding, stirring and mixing food.
