**Holding 18 Years of Experience**

Fuxin Electronics Co., Ltd was established in 2004, with a gardenesque work environment of 6,000m2, specializing in R&D and manufacturing of communication parts and IT peripheral accessories, such as network cables, patch cords, telephone cables, and more.

**High-speed Sample Making**

Our seasoned R&D professionals can quickly design and make new product samples for worldwide customers, and this can shorten lead time and move up the launch time of your new products.

**ISO 9001-certified Factory**

We conduct business operations in conformity with ISO 9001. 5M1E has been strictly controlled throughout the whole managerial process, and the quality principle, not accepting nonconforming products, not producing nonconforming products, and not releasing nonconforming products, is fully implemented without compromise or concession.

**Supplying Products with RoHS, CE, EMC, and other certificates**

We control hazardous substances of products in strict accordance with QC080000 (RoHS/WEEE), and we have some products certified to CE, EMC, and more.

**Punctual Delivery Date**

Each customer order is carefully reviewed at the contract review meeting, and the decisions of the review will be carried out, all these make punctual delivery dates feasible.

**Reasonable Price**

Because of the strict control over product quality and product legitimacy, the nonconforming product rate is relatively lower, and production efficiency is relatively higher. Surely, we can offer a reasonable and attractive quotation for you.
