Professional metal supplier for 15 years

COMPANY PROFILE

**Creating
Promising
Future**

Shandong YINGYI is one of the leading manufactories with ISO 9001 certificate who is specializing in manufacturing & exporting various kinds of steel pipes, steel plate, steel coil, round bar, flat bar, angle bar, H beam and other steel products in China. We owned the complete production technique and related equipment. Meanwhile, we have reached the production technique's completeness and systematicness at the modern steel industry. The company's annual sales amount is more than 100 million yuan.

Our company aims to provide customers with high-quality and low-price steel products and strives to create value for customers. We have advanced processing equipment and powerful logistics distribution system, which can meet customers' various needs at any time.

We adhere to the principle of "customer first" to provide our customers with high-quality services. Our company has won the trust and praise from customers with the business advantages of complete specifications, cheap price and fast transmission, and the service concept of keeping promise and focusing on quality.

vision

Become a leading foreign trade enterprise in China's steel industry.

Develop markets in North America, South America, Europe, Southeast Asia and Central Asia.

mission

Committed to providing customers with high-quality products and first-class services.

Contribute to the development of the global steel industry.

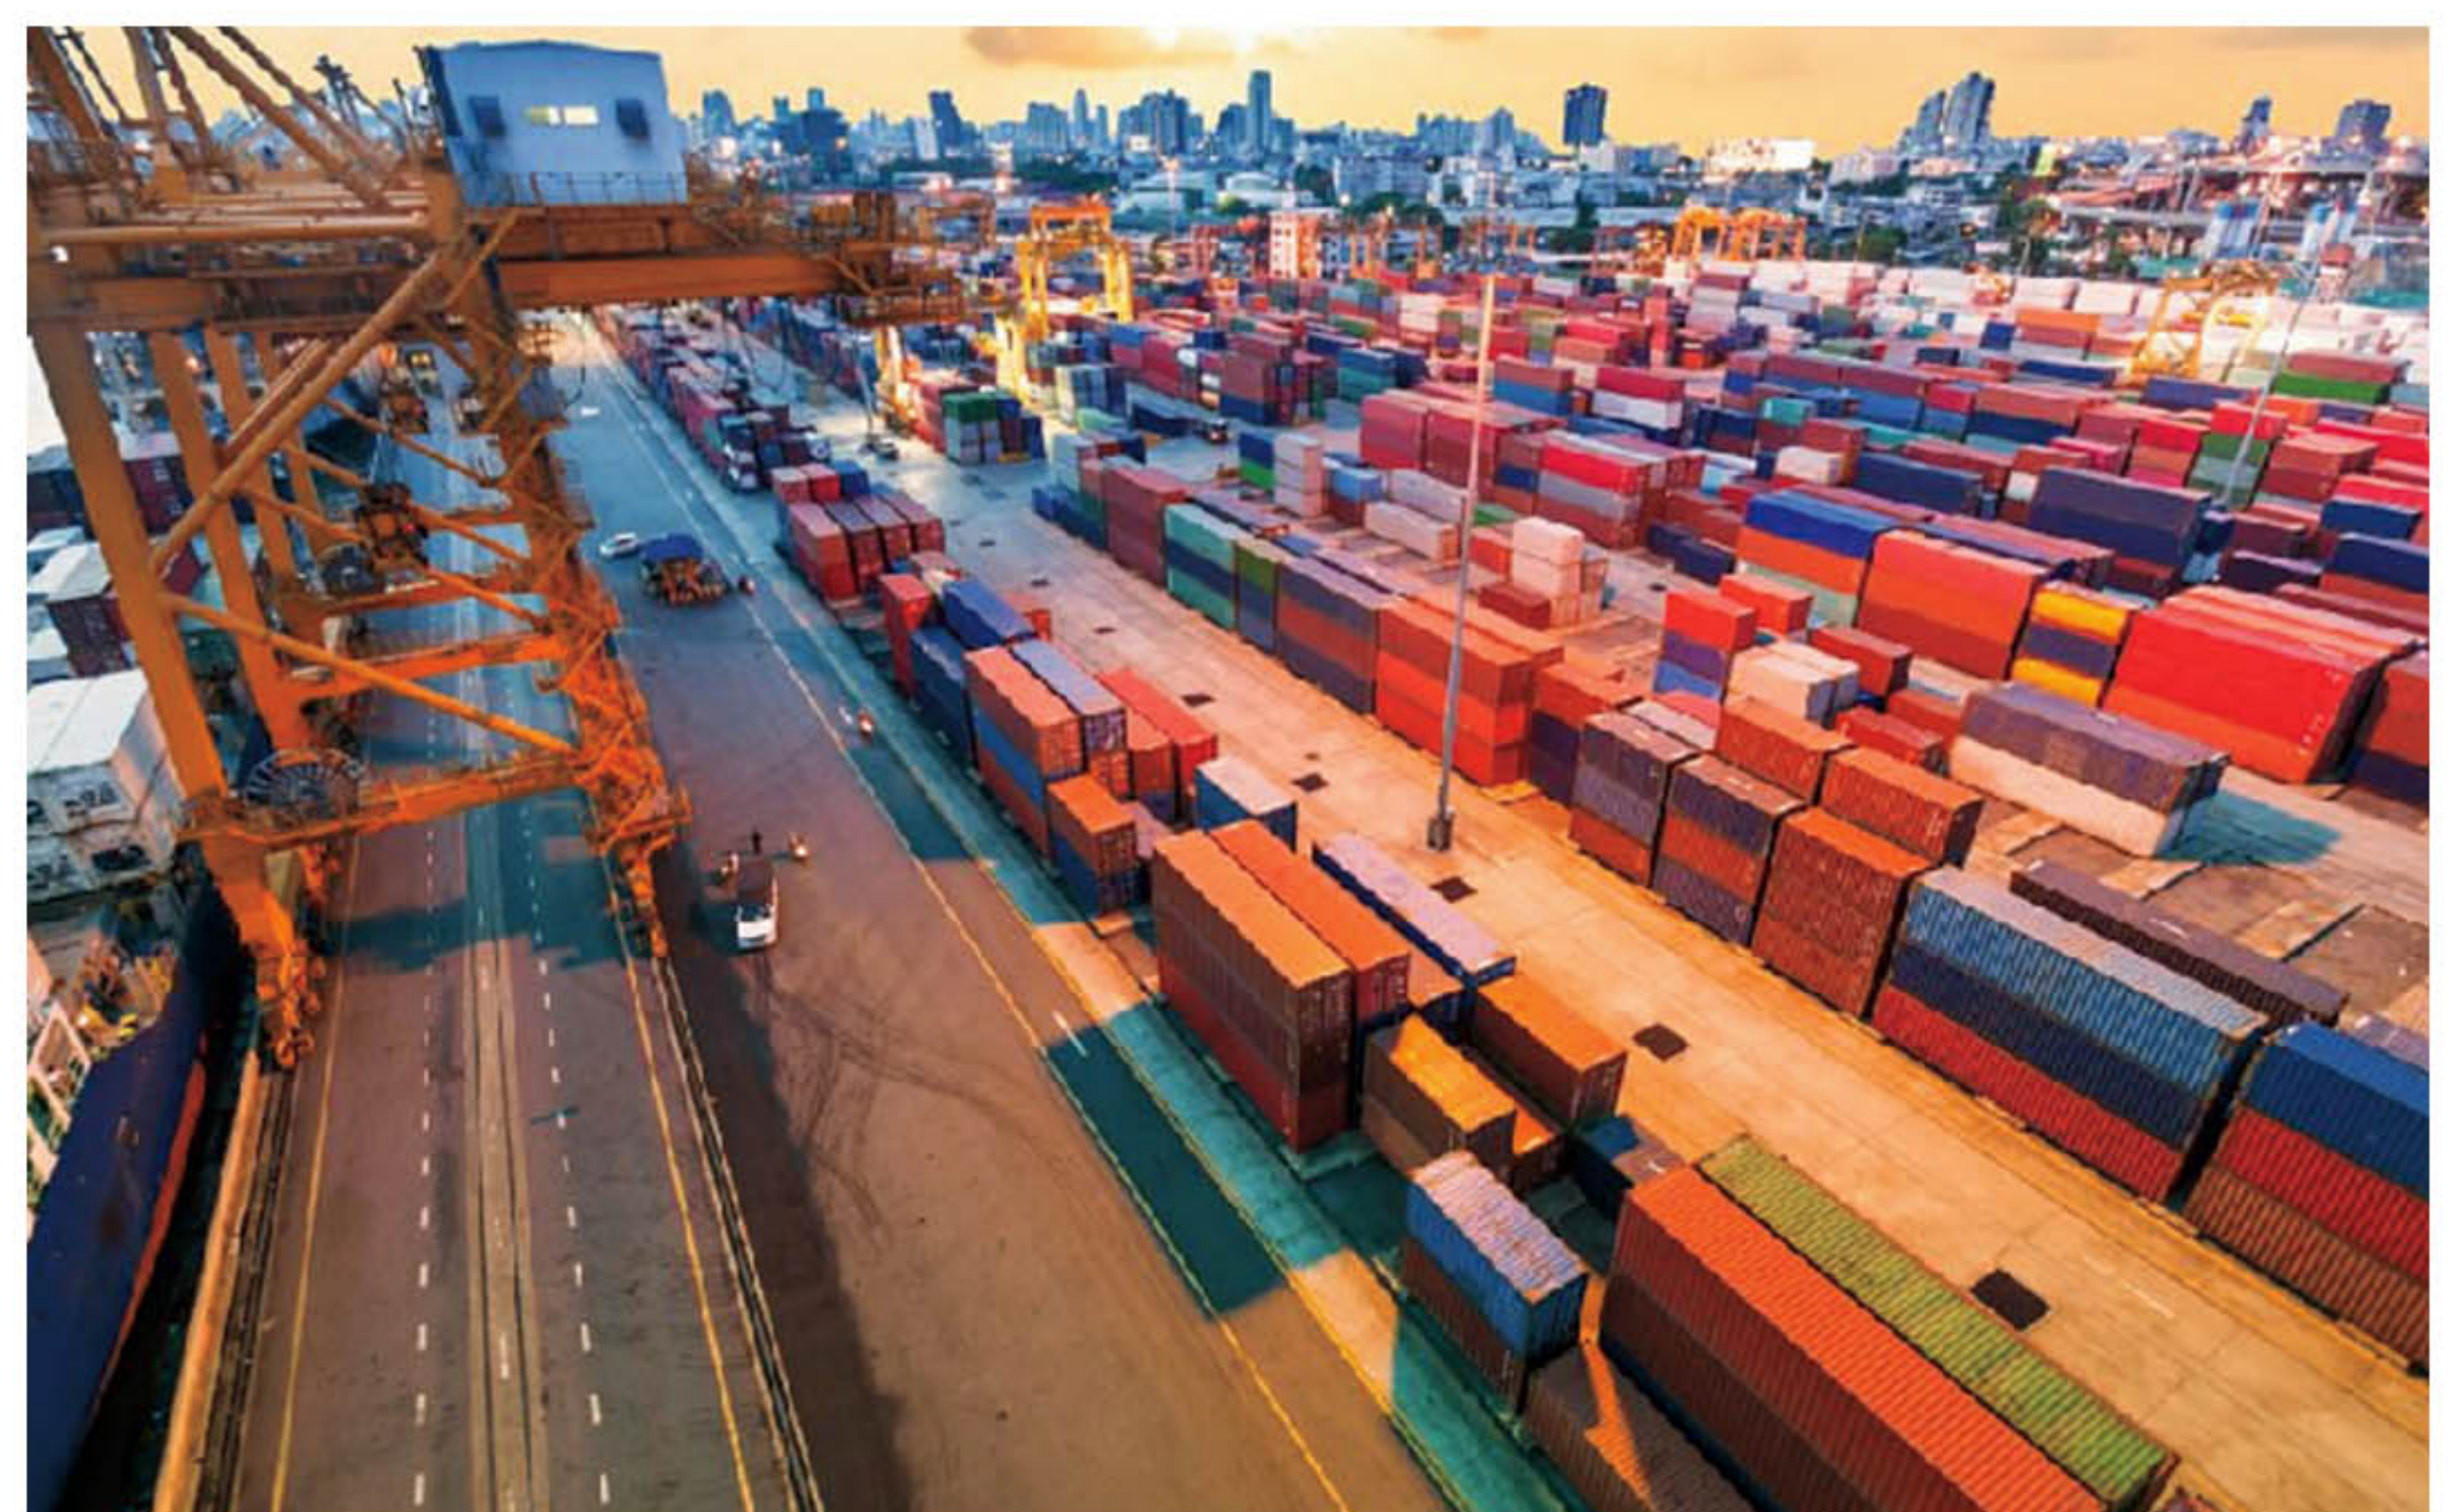

BUSINESS QUALIFICATION

ENTERPRISE DISPLAY

Our company Mr. Cao visited China Baowu Steel Group Co., Ltd

Our company made a deal with an international company in Europe.

01 Steel Pipe

PRODUCT OVERVIEW

According to the cross-sectional shape, it is divided into circular, square, rectangular and special-shaped steel pipes; according to the material, it is divided into carbon structural steel pipes, low alloy structural steel pipes, alloy steel pipes and composite steel pipes; According to the purpose, it is divided into pipelines, machinery manufacturing, etc., and according to the production process, it is divided into seamless steel pipes and welded steel pipes, among which seamless steel pipes are divided into two types: hot rolling and cold rolling (drawing).

Seamless Steel Pipe

Welded Steel Pipe

Galvanized Steel Pipe

Rectangular Steel Pipe

02 Carbon steel

PRODUCT OVERVIEW

Carbon Steel Sheet

Carbon Steel Coil

Carbon Steel Pipe

Carbon Steel Bar

Carbon Steel Material

According to the application, carbon steel can be divided into three types: carbon structural steel, carbon tool steel and free-cutting structural steel. Carbon structural steel can be divided into engineering construction steel and machine manufacturing structural steel.

03 Stainless Steel

PRODUCT OVERVIEW

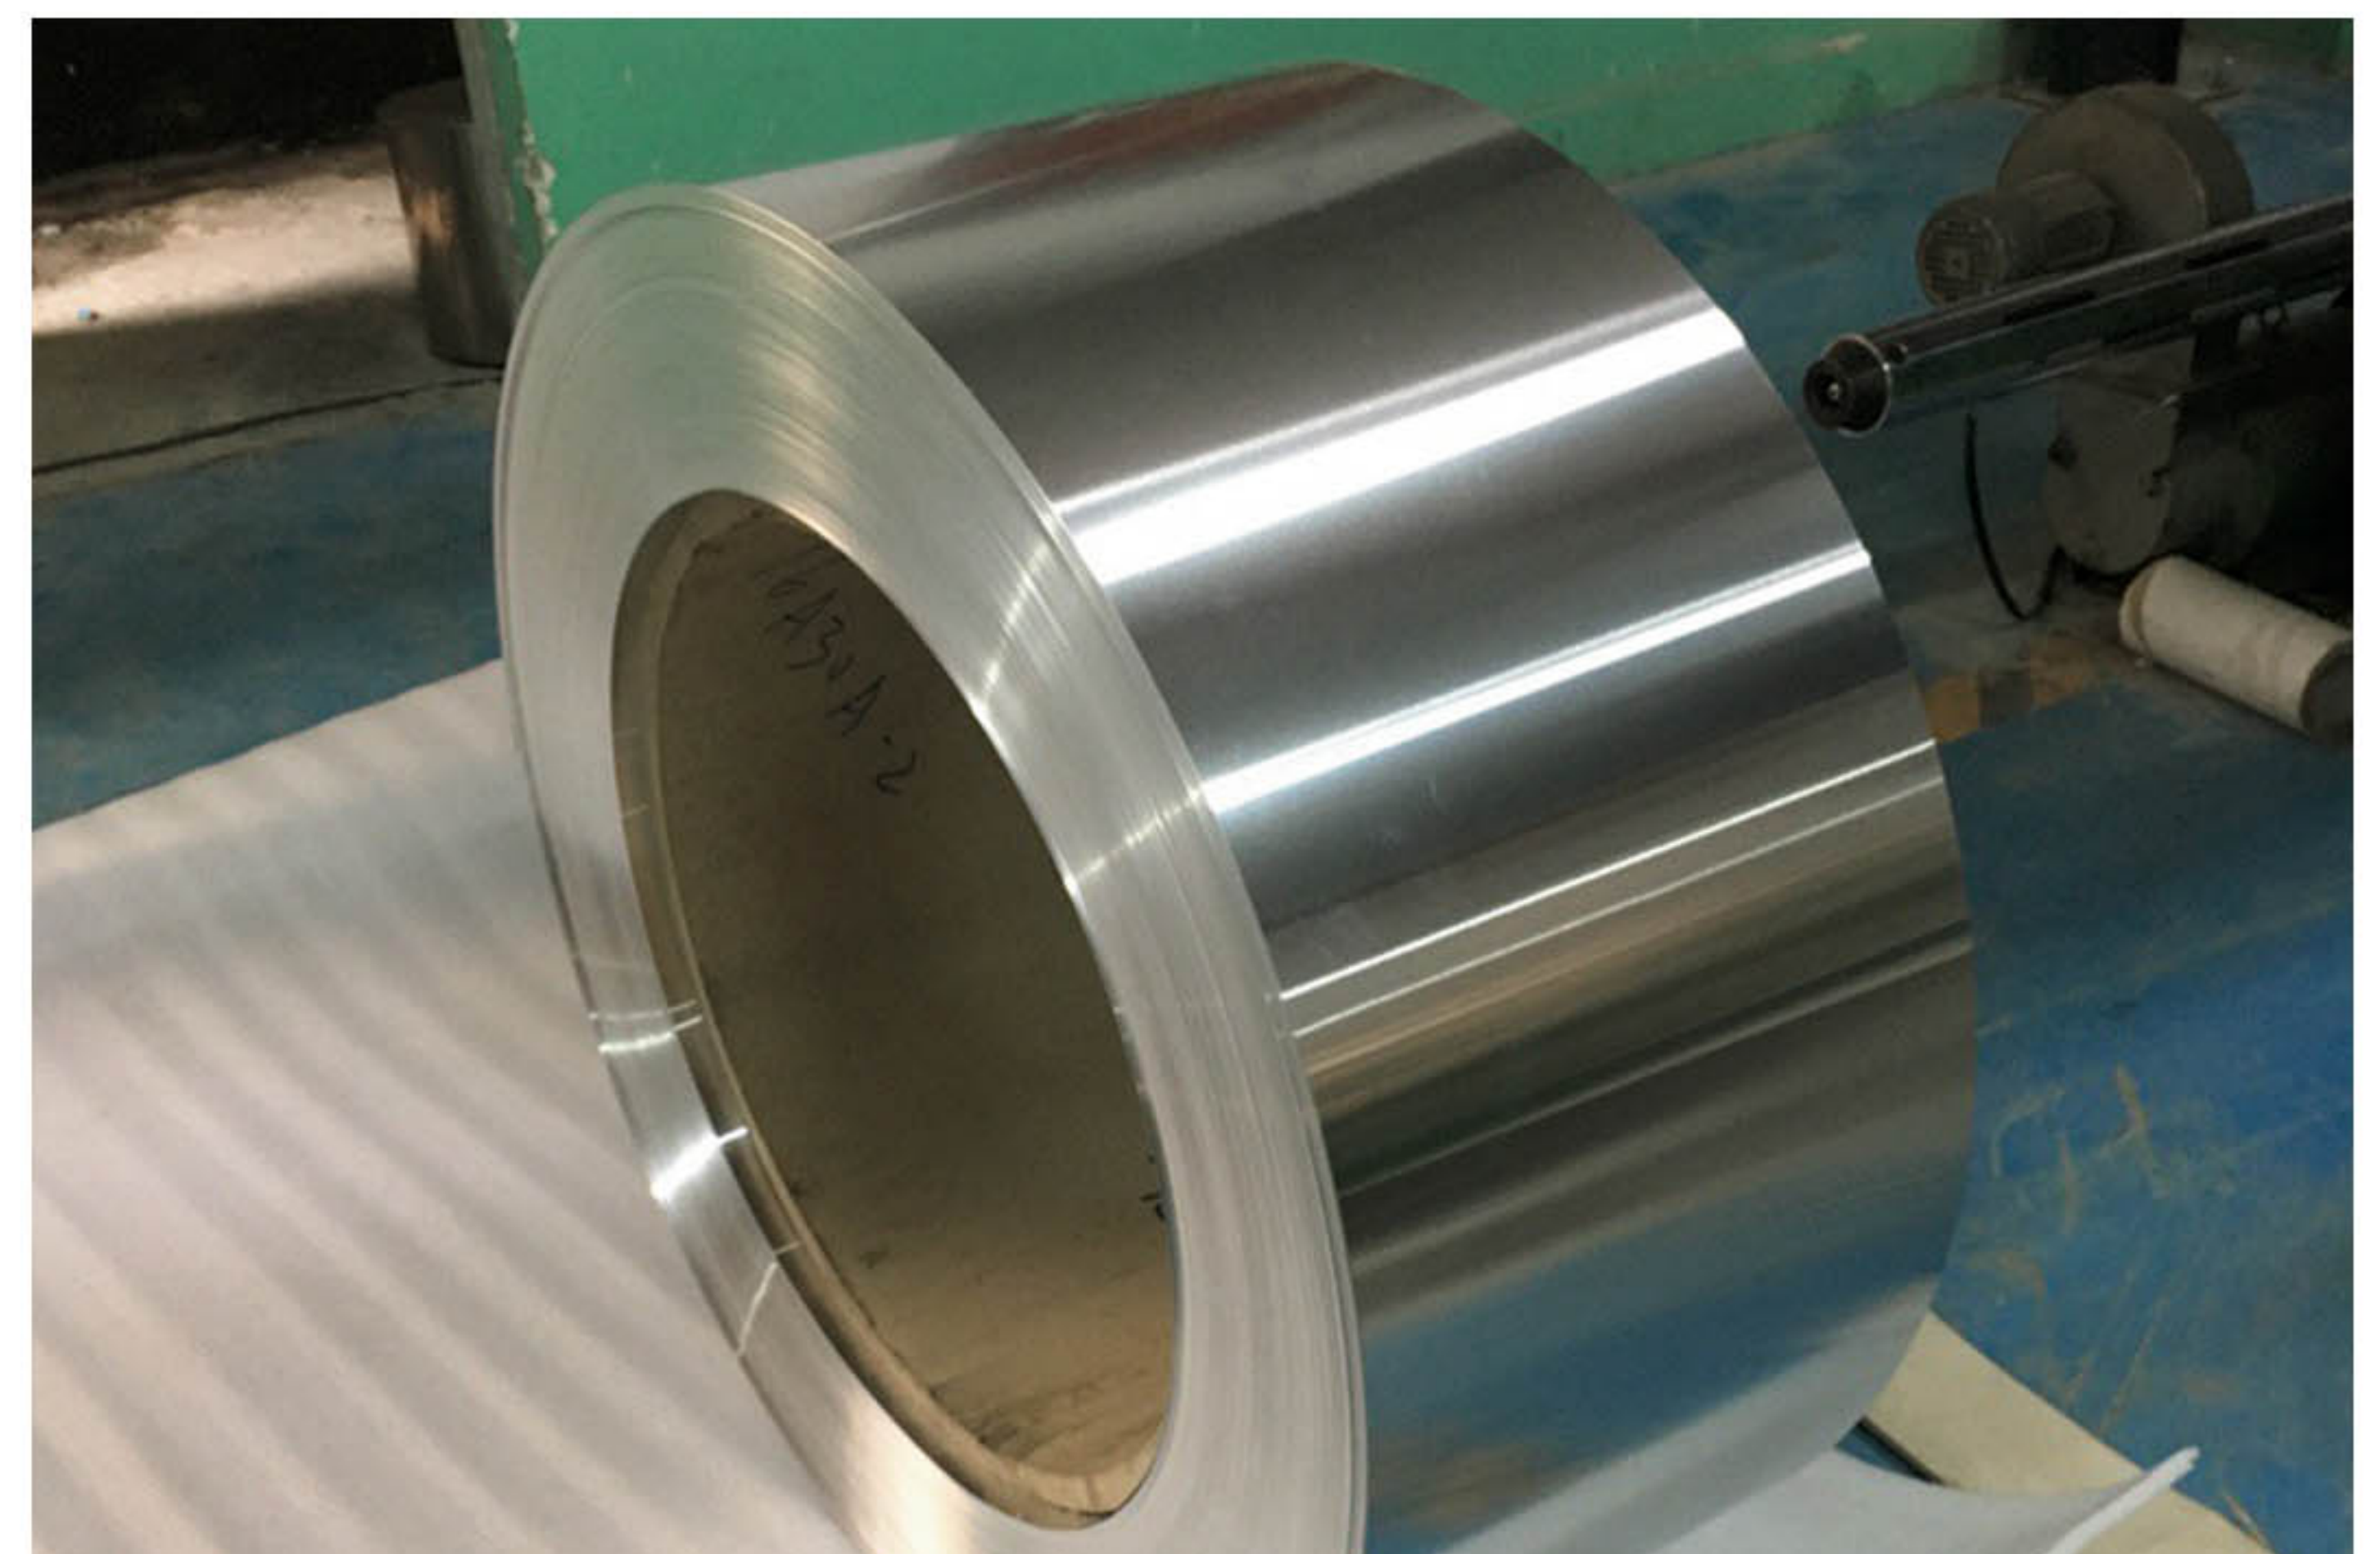

Stainless Steel Plate

Stainless Steel Rod

Stainless Steel Pipe

Stainless Steel Coil

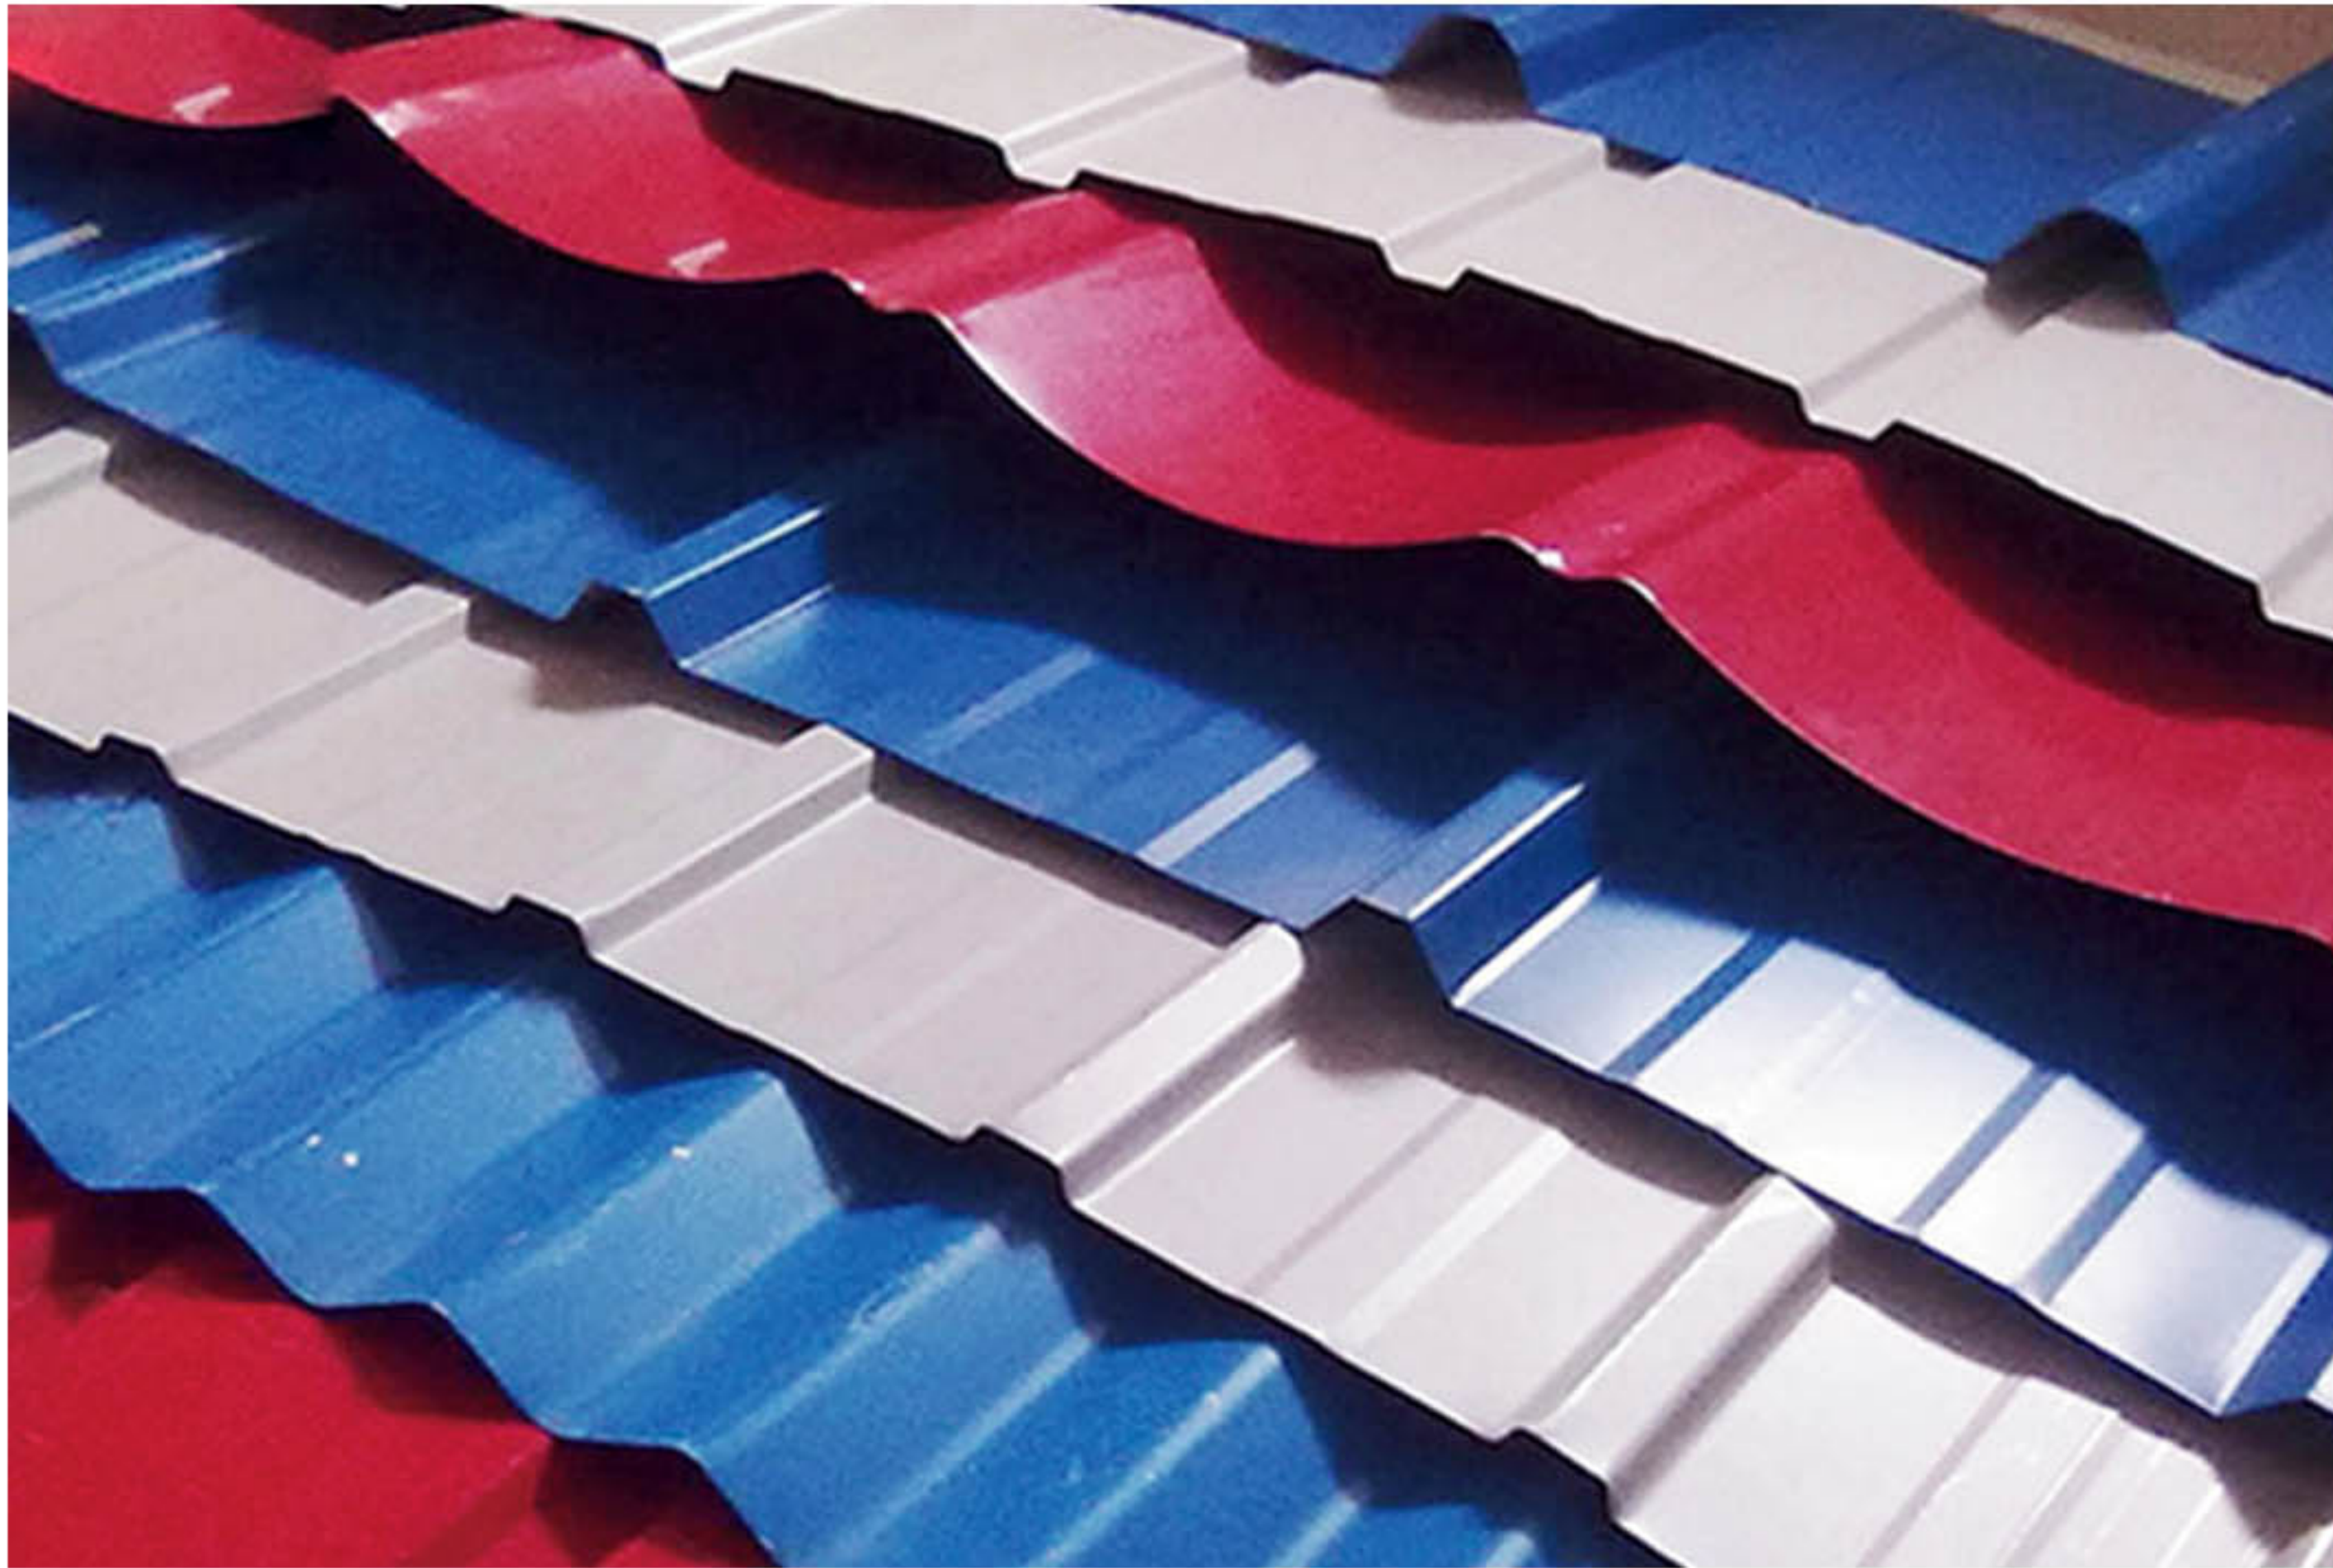

Mainly widely used in petroleum, chemical, medical, food, light industry, mechanical instruments and other industrial pipelines and mechanical structural parts. In addition, under the same bending and torsional strength, it is light in weight, so it is also widely used in the manufacture of mechanical parts and engineering structures. It is also commonly used as furniture and kitchenware.

Stainless Steel Wire

04 PPGI

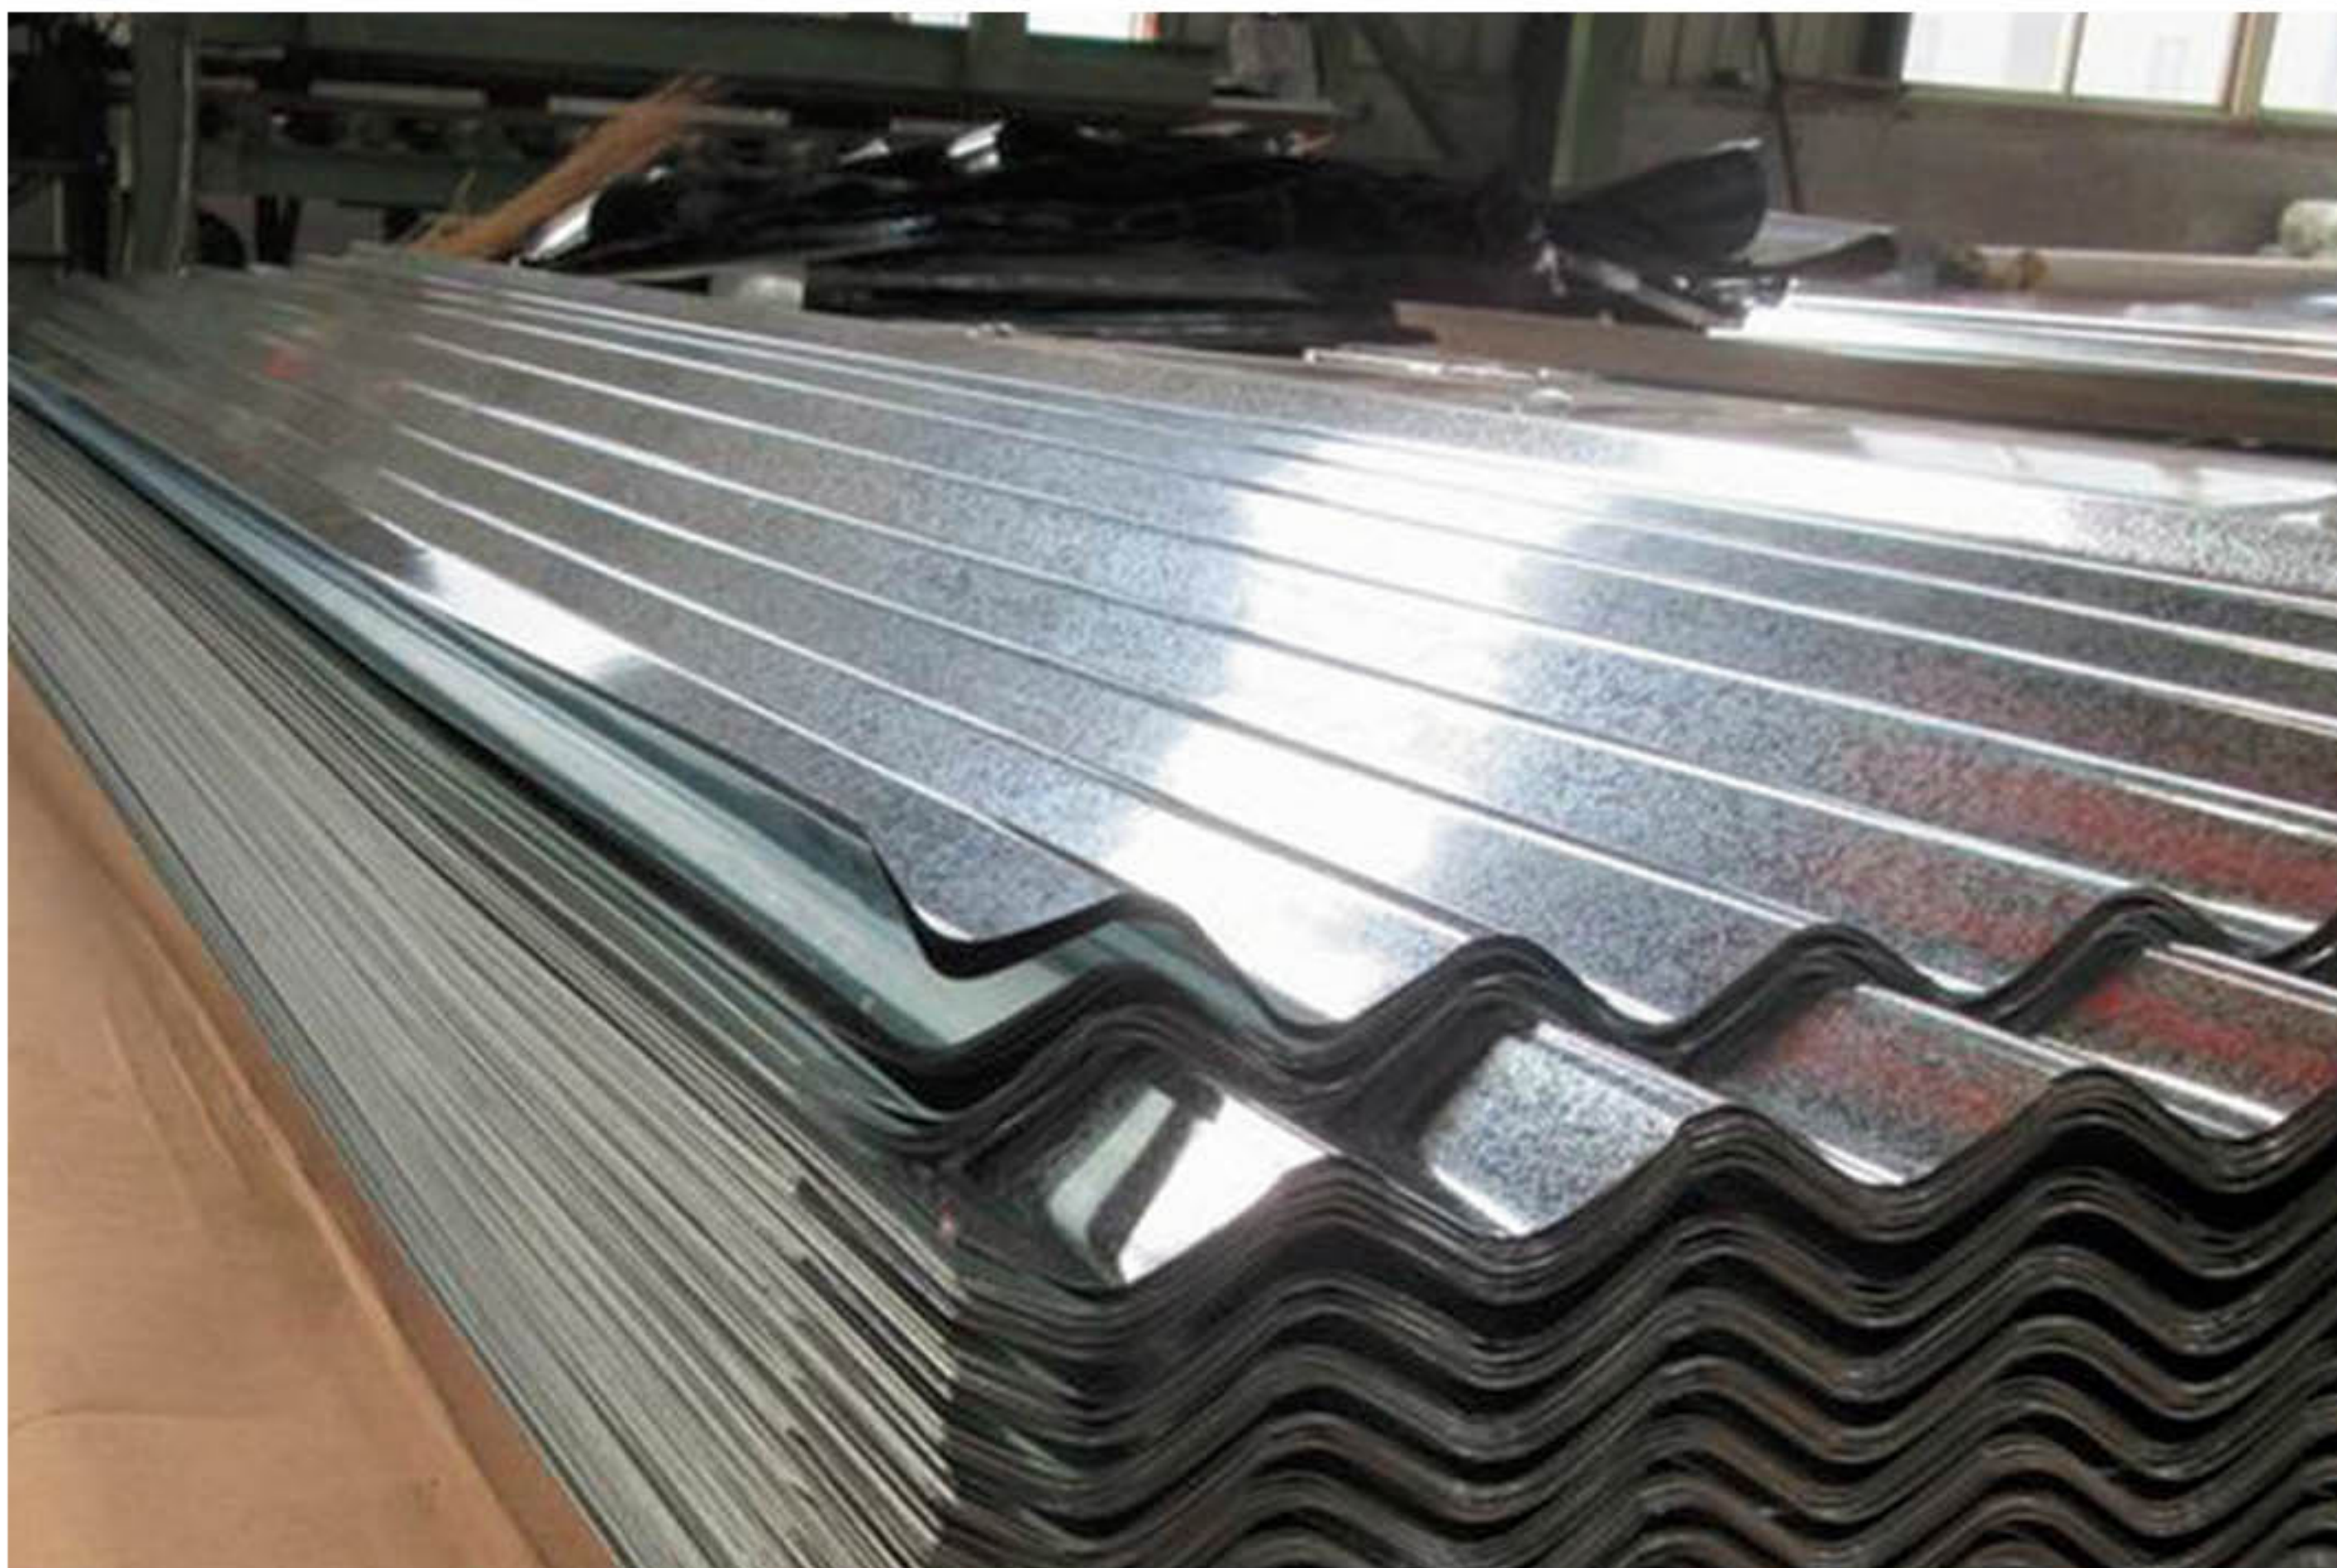

PRODUCT OVERVIEW

Color-Coated Steel Sheet

Color Coated Coil

Carbon Steel Pipe

Color-coated coil is based on hot-dip galvanized sheet, hot-dip galvanized sheet, electro-galvanized sheet, etc. After surface pretreatment (chemical degreasing and chemical conversion treatment), one or several layers of organic coatings are applied on the surface, and then A product that is baked and cured. The organic coating on the zinc layer plays a covering and protective role, preventing the steel strip from rusting, and its service life is about 1.5 times longer than that of the galvanized strip.

05 Aluminum

PRODUCT OVERVIEW

Aluminum Sheet

Aluminum Rod

Aluminum Coils

Aluminum Ingot

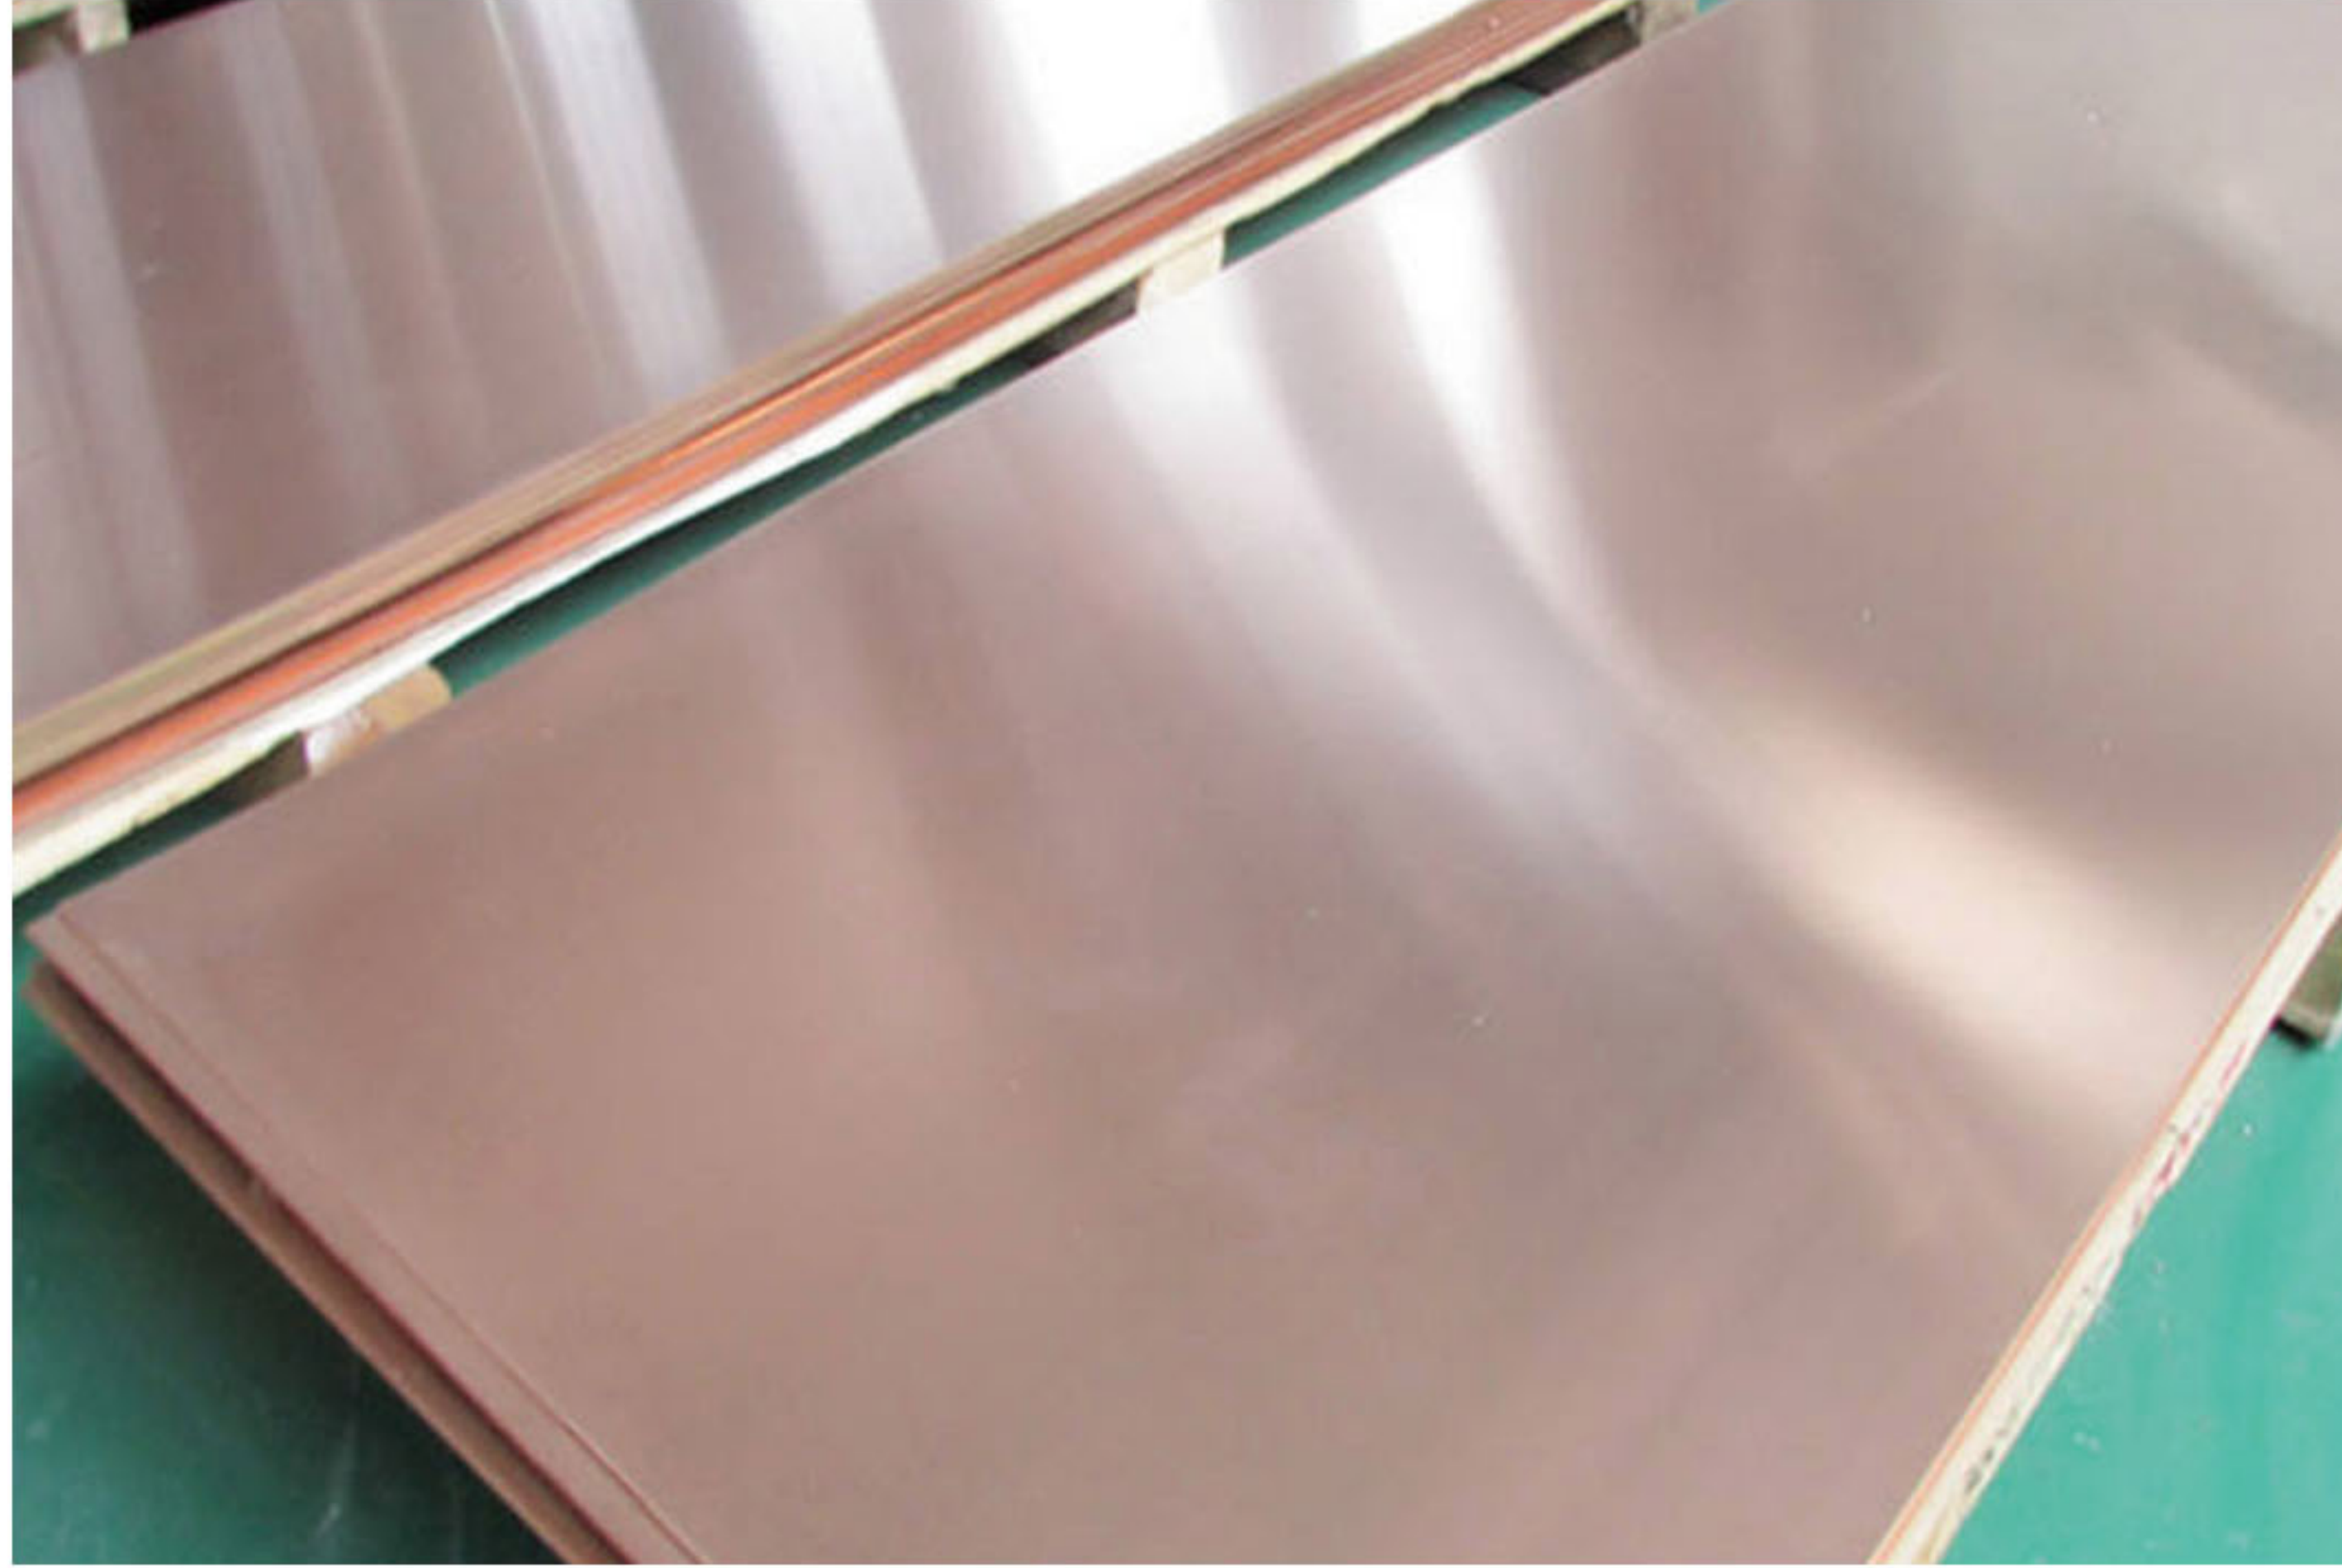

Aluminum Strip

Aluminum Tube

06 Copper

PRODUCT OVERVIEW

Copper Plate

Copper Rod

Copper Wire

Good ductility, high thermal conductivity and electrical conductivity, so it is the most commonly used material in cables and electrical and electronic components. It can also be used as a building material and can form many kinds of alloys. Copper is also a durable metal and can be recycled many times without loss of its mechanical properties.

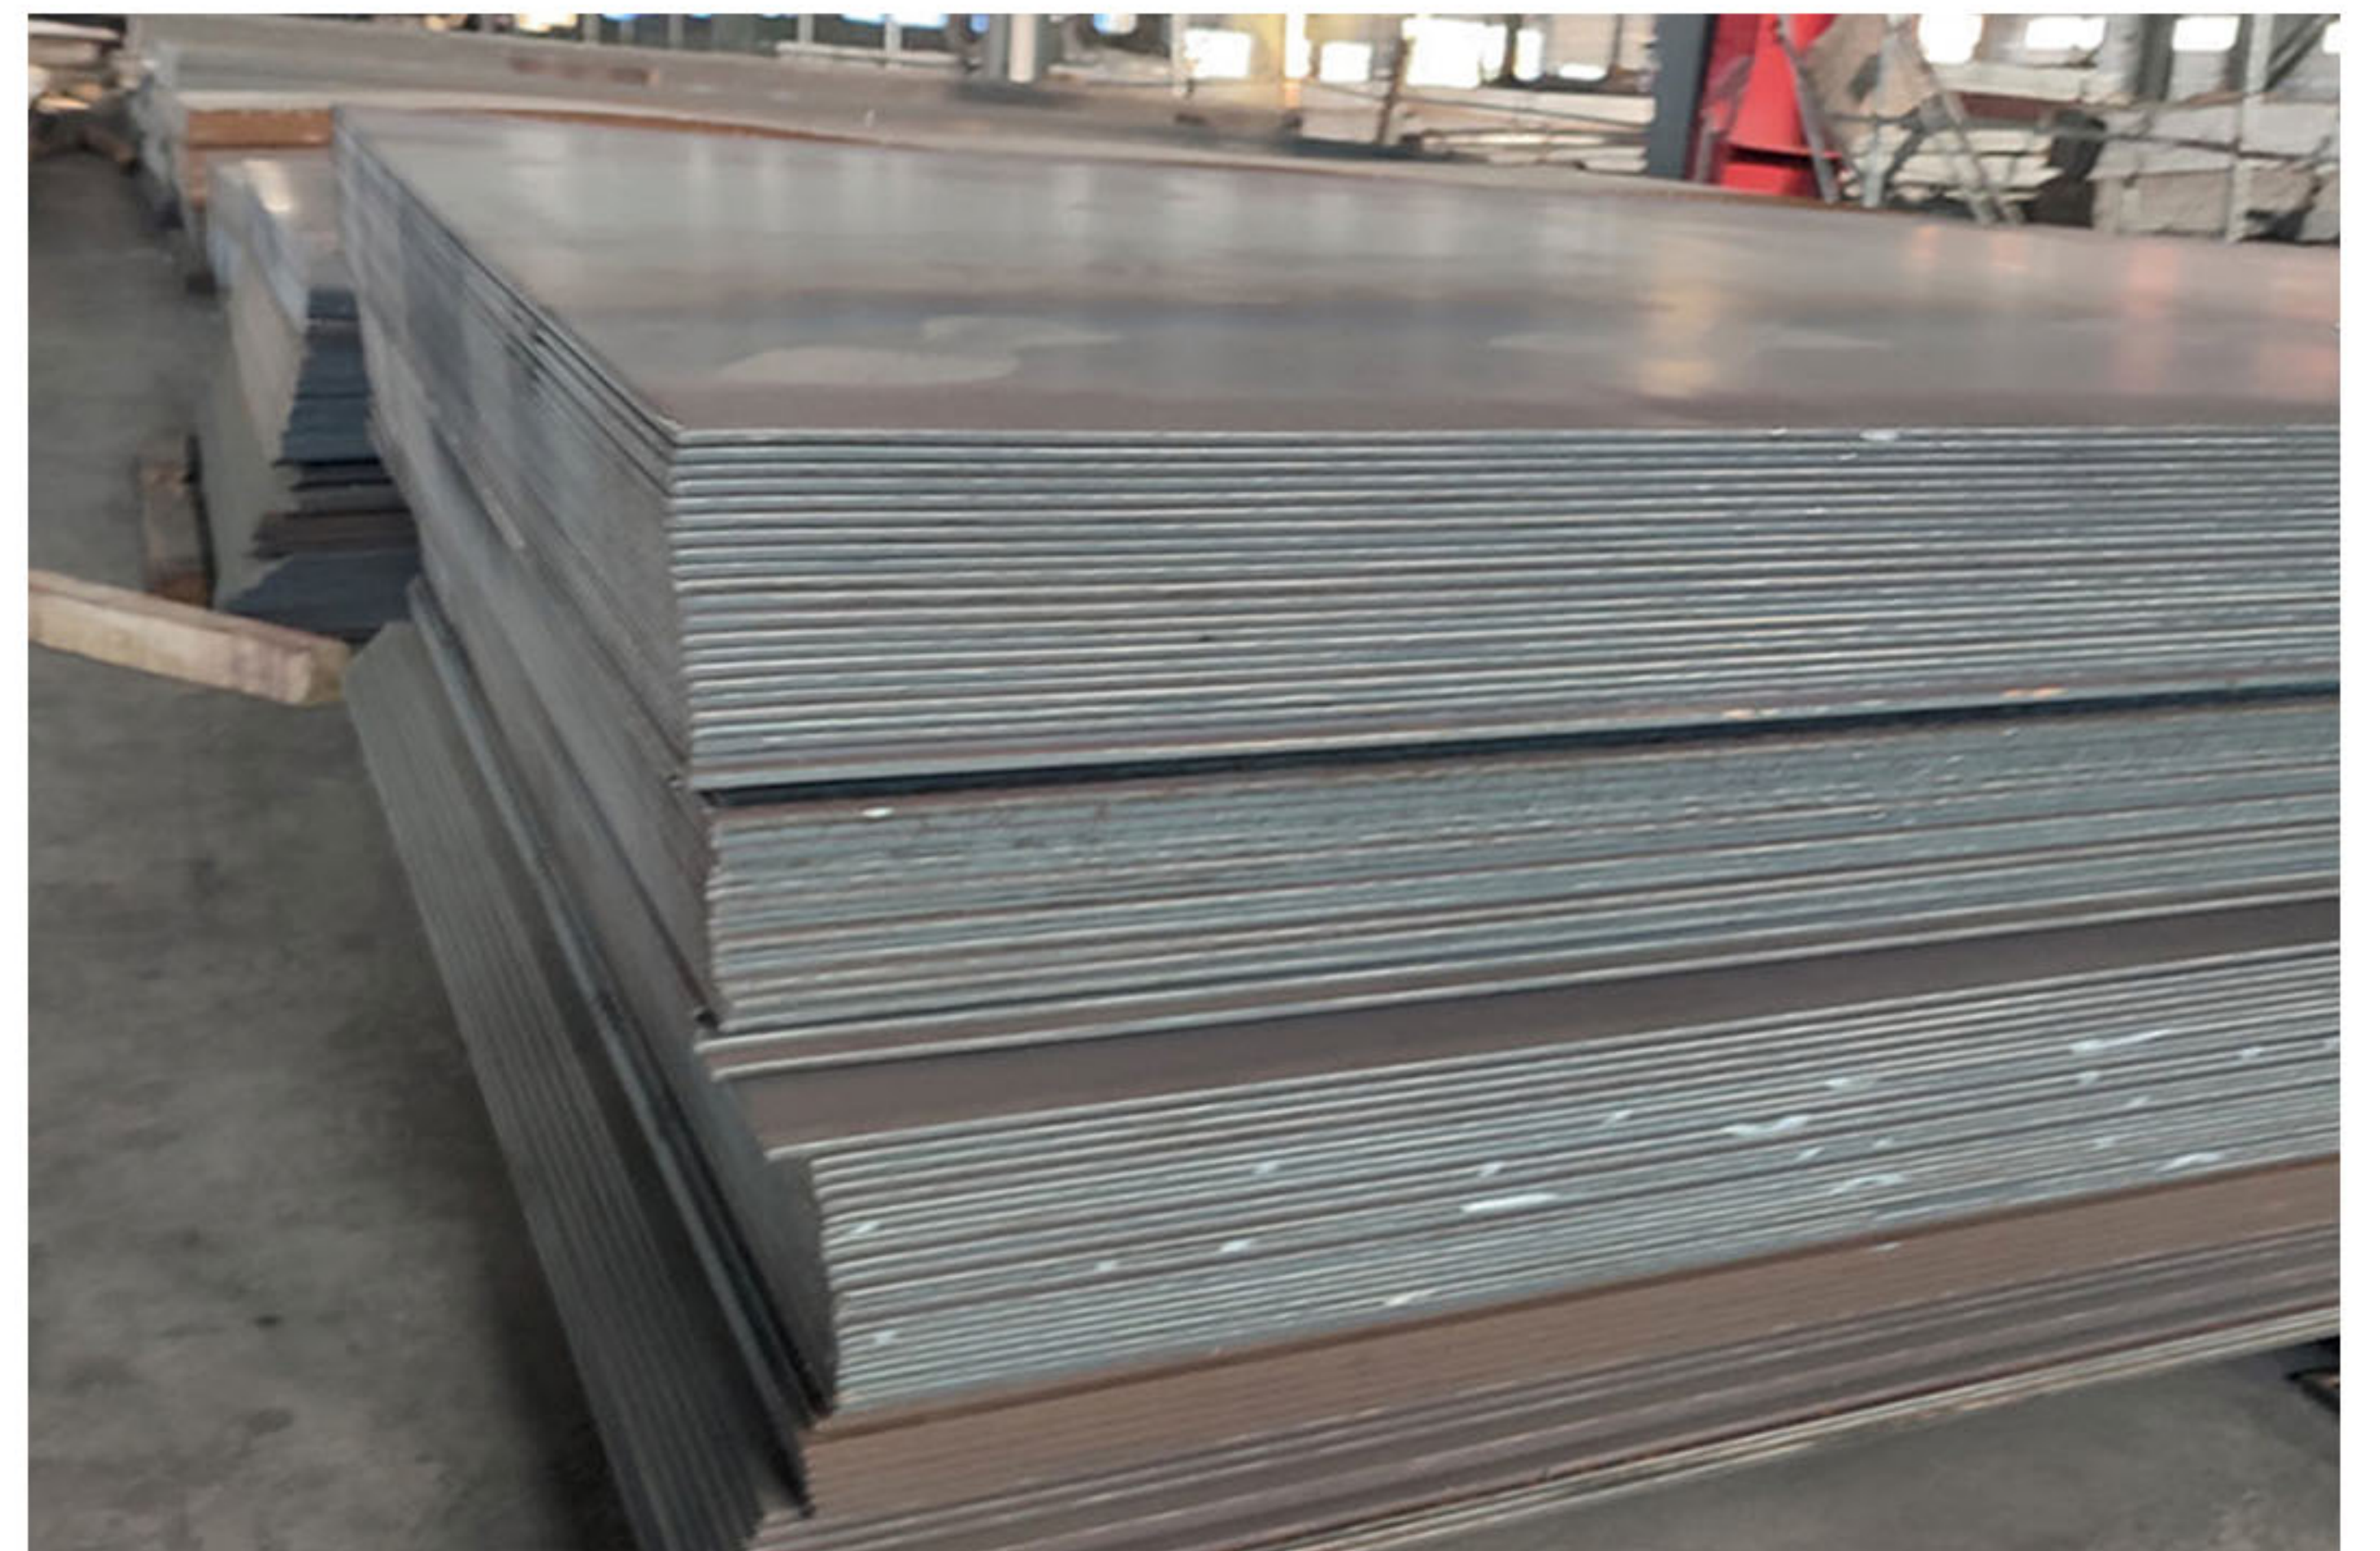

07 Plate

PRODUCT OVERVIEW

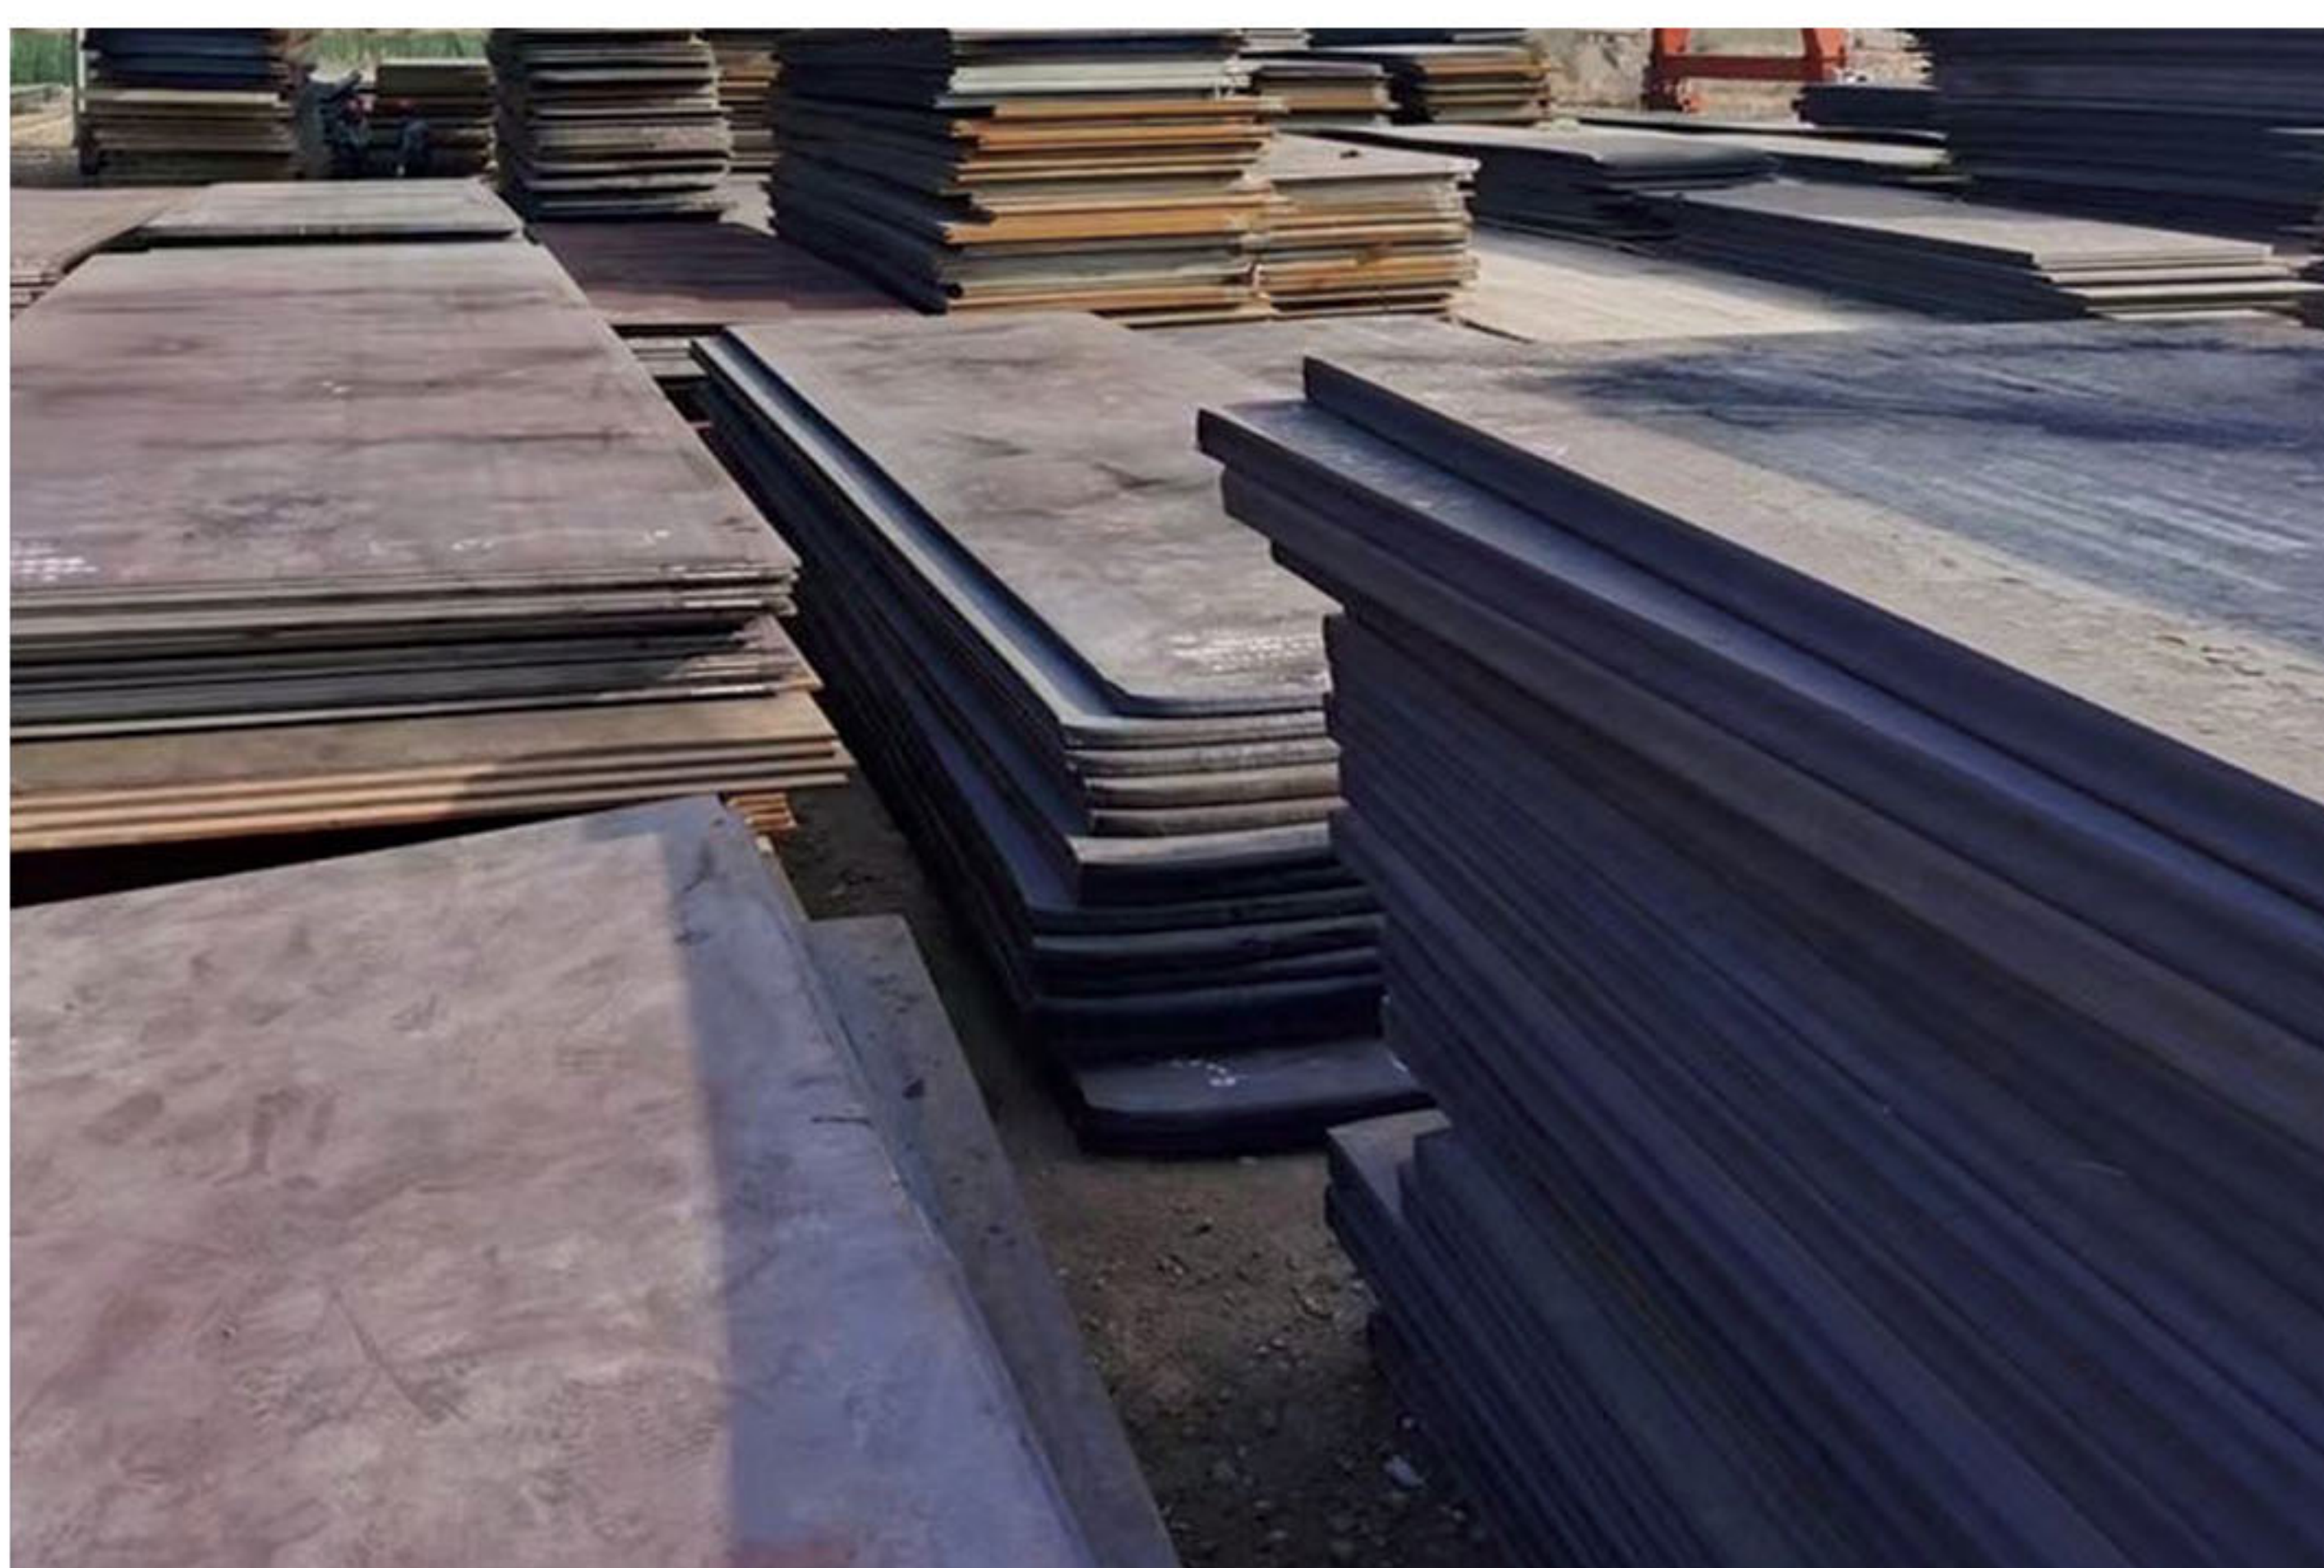

The hot-rolled coils are pickled in the workshop, and the cold-rolled coils are chilled coils, whose surface finish and toughness are superior to other brands. Hot-rolled coils are cold-rolled coils (annealed) after pickling, cold rolling, cover annealing, and flat annealing. The yield strength of the cold-rolled sheet is greater than that of the cold-rolled sheet roll (annealed state), which makes the cold-rolled sheet roll (annealed state) more conducive to stamping. So the factory default state of our CRC is annealing.

Galvanized Sheet

High Strength Steel Plate

Wear-Resistant Steel Plate

Wear-Carbon Steel Plate

08 Steel coil

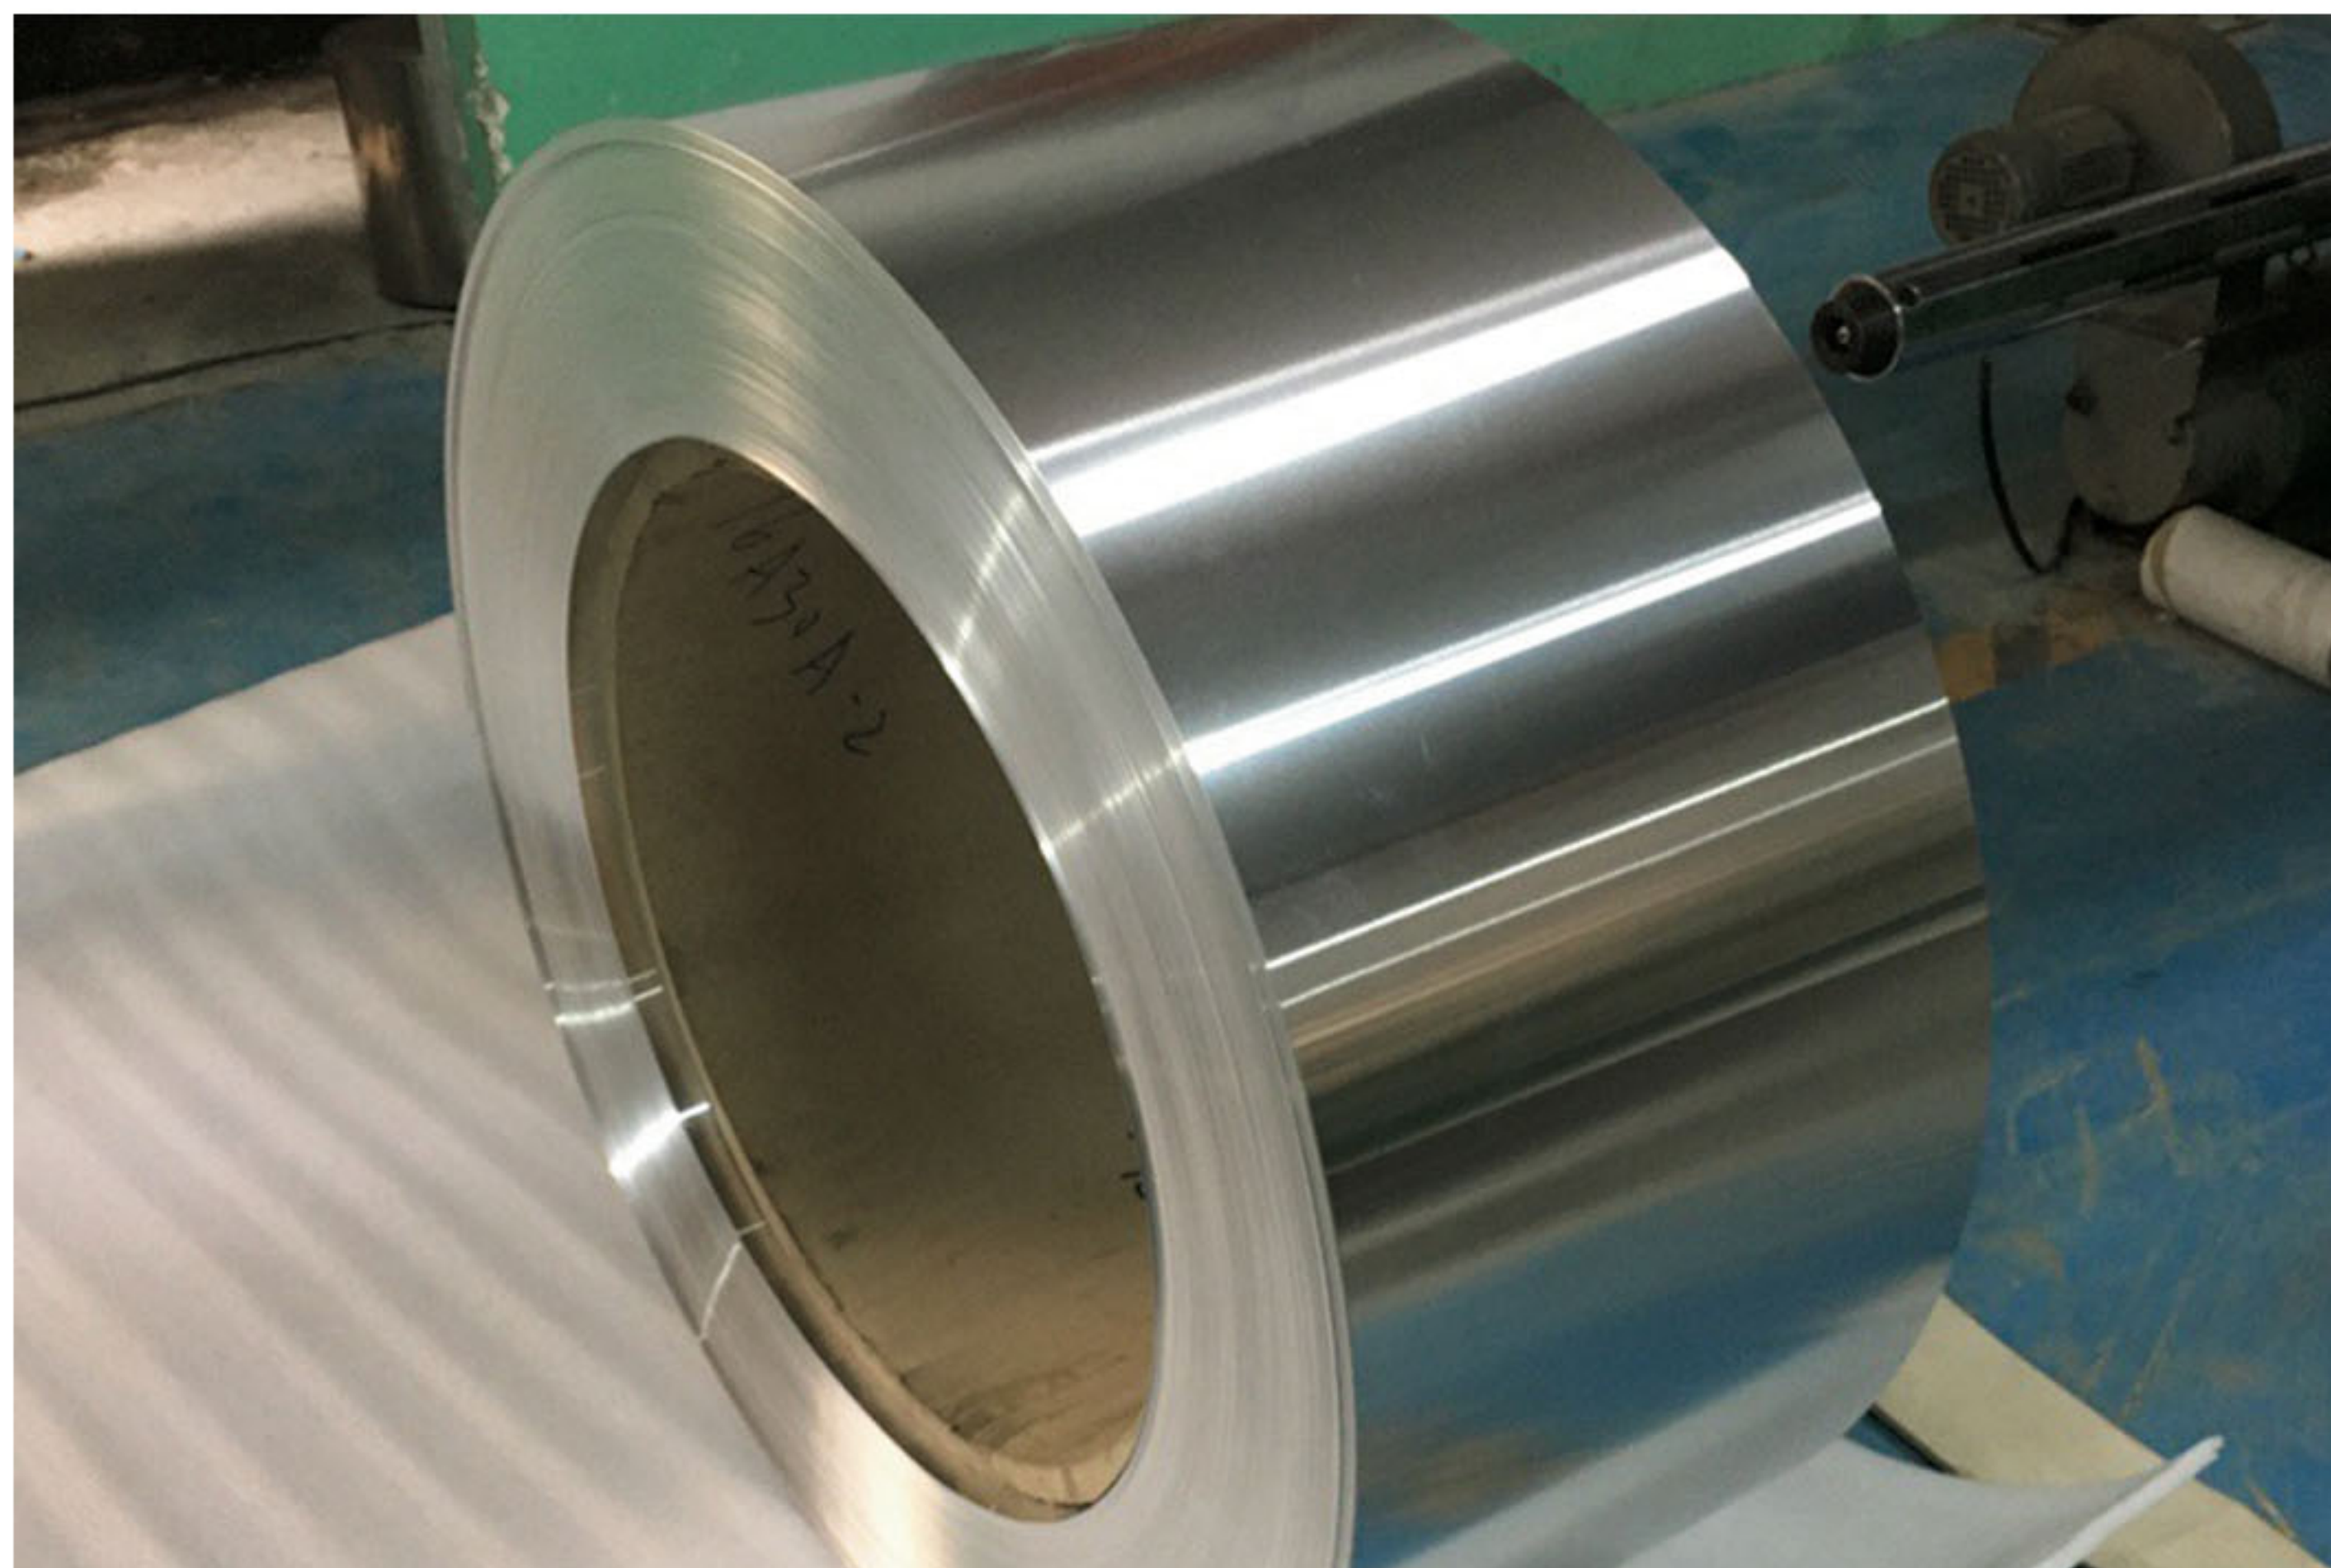

PRODUCT OVERVIEW

Galvanized Steel Coil

Carbon Steel Coil

Stainless Steel Coil

Color Coated Coil

Aluminum Coils

The steel is hot-pressed and cold-pressed into rolls. In order to facilitate storage and transportation, it is convenient for various processing (such as processing into steel plates, steel strips, etc.).

09 Steel Structure

PRODUCT OVERVIEW

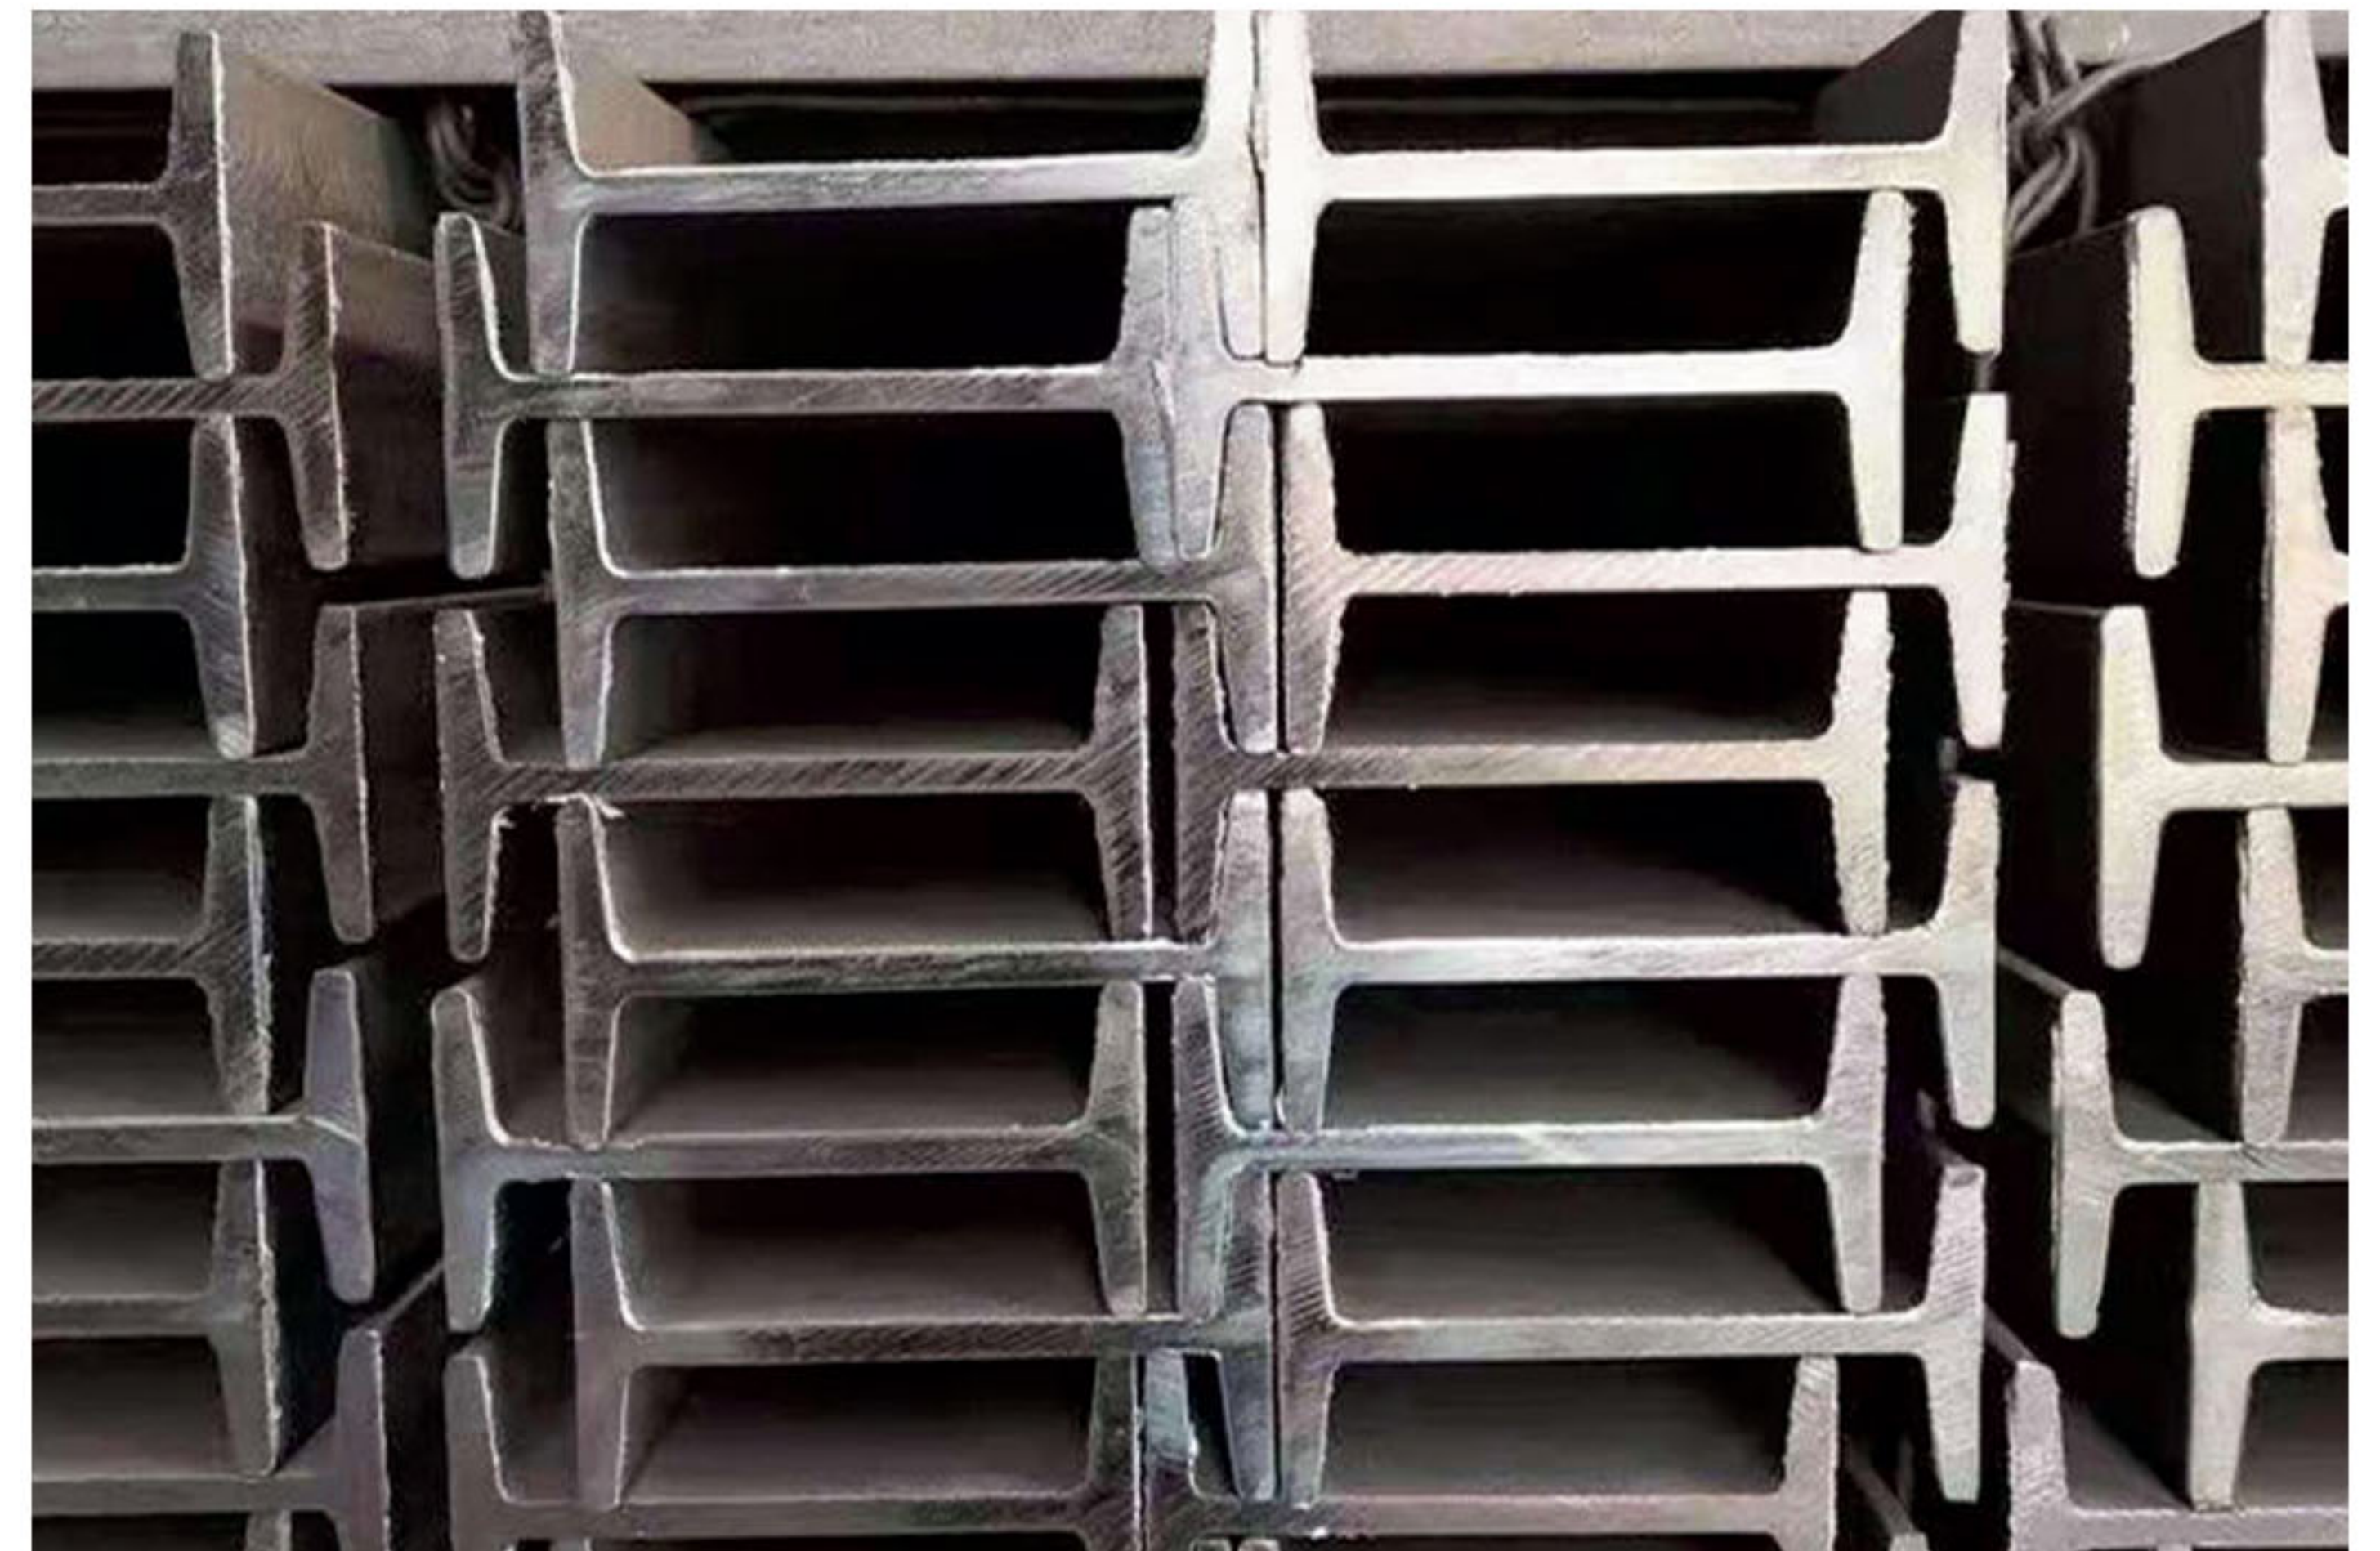

H-beam

Channel Steel

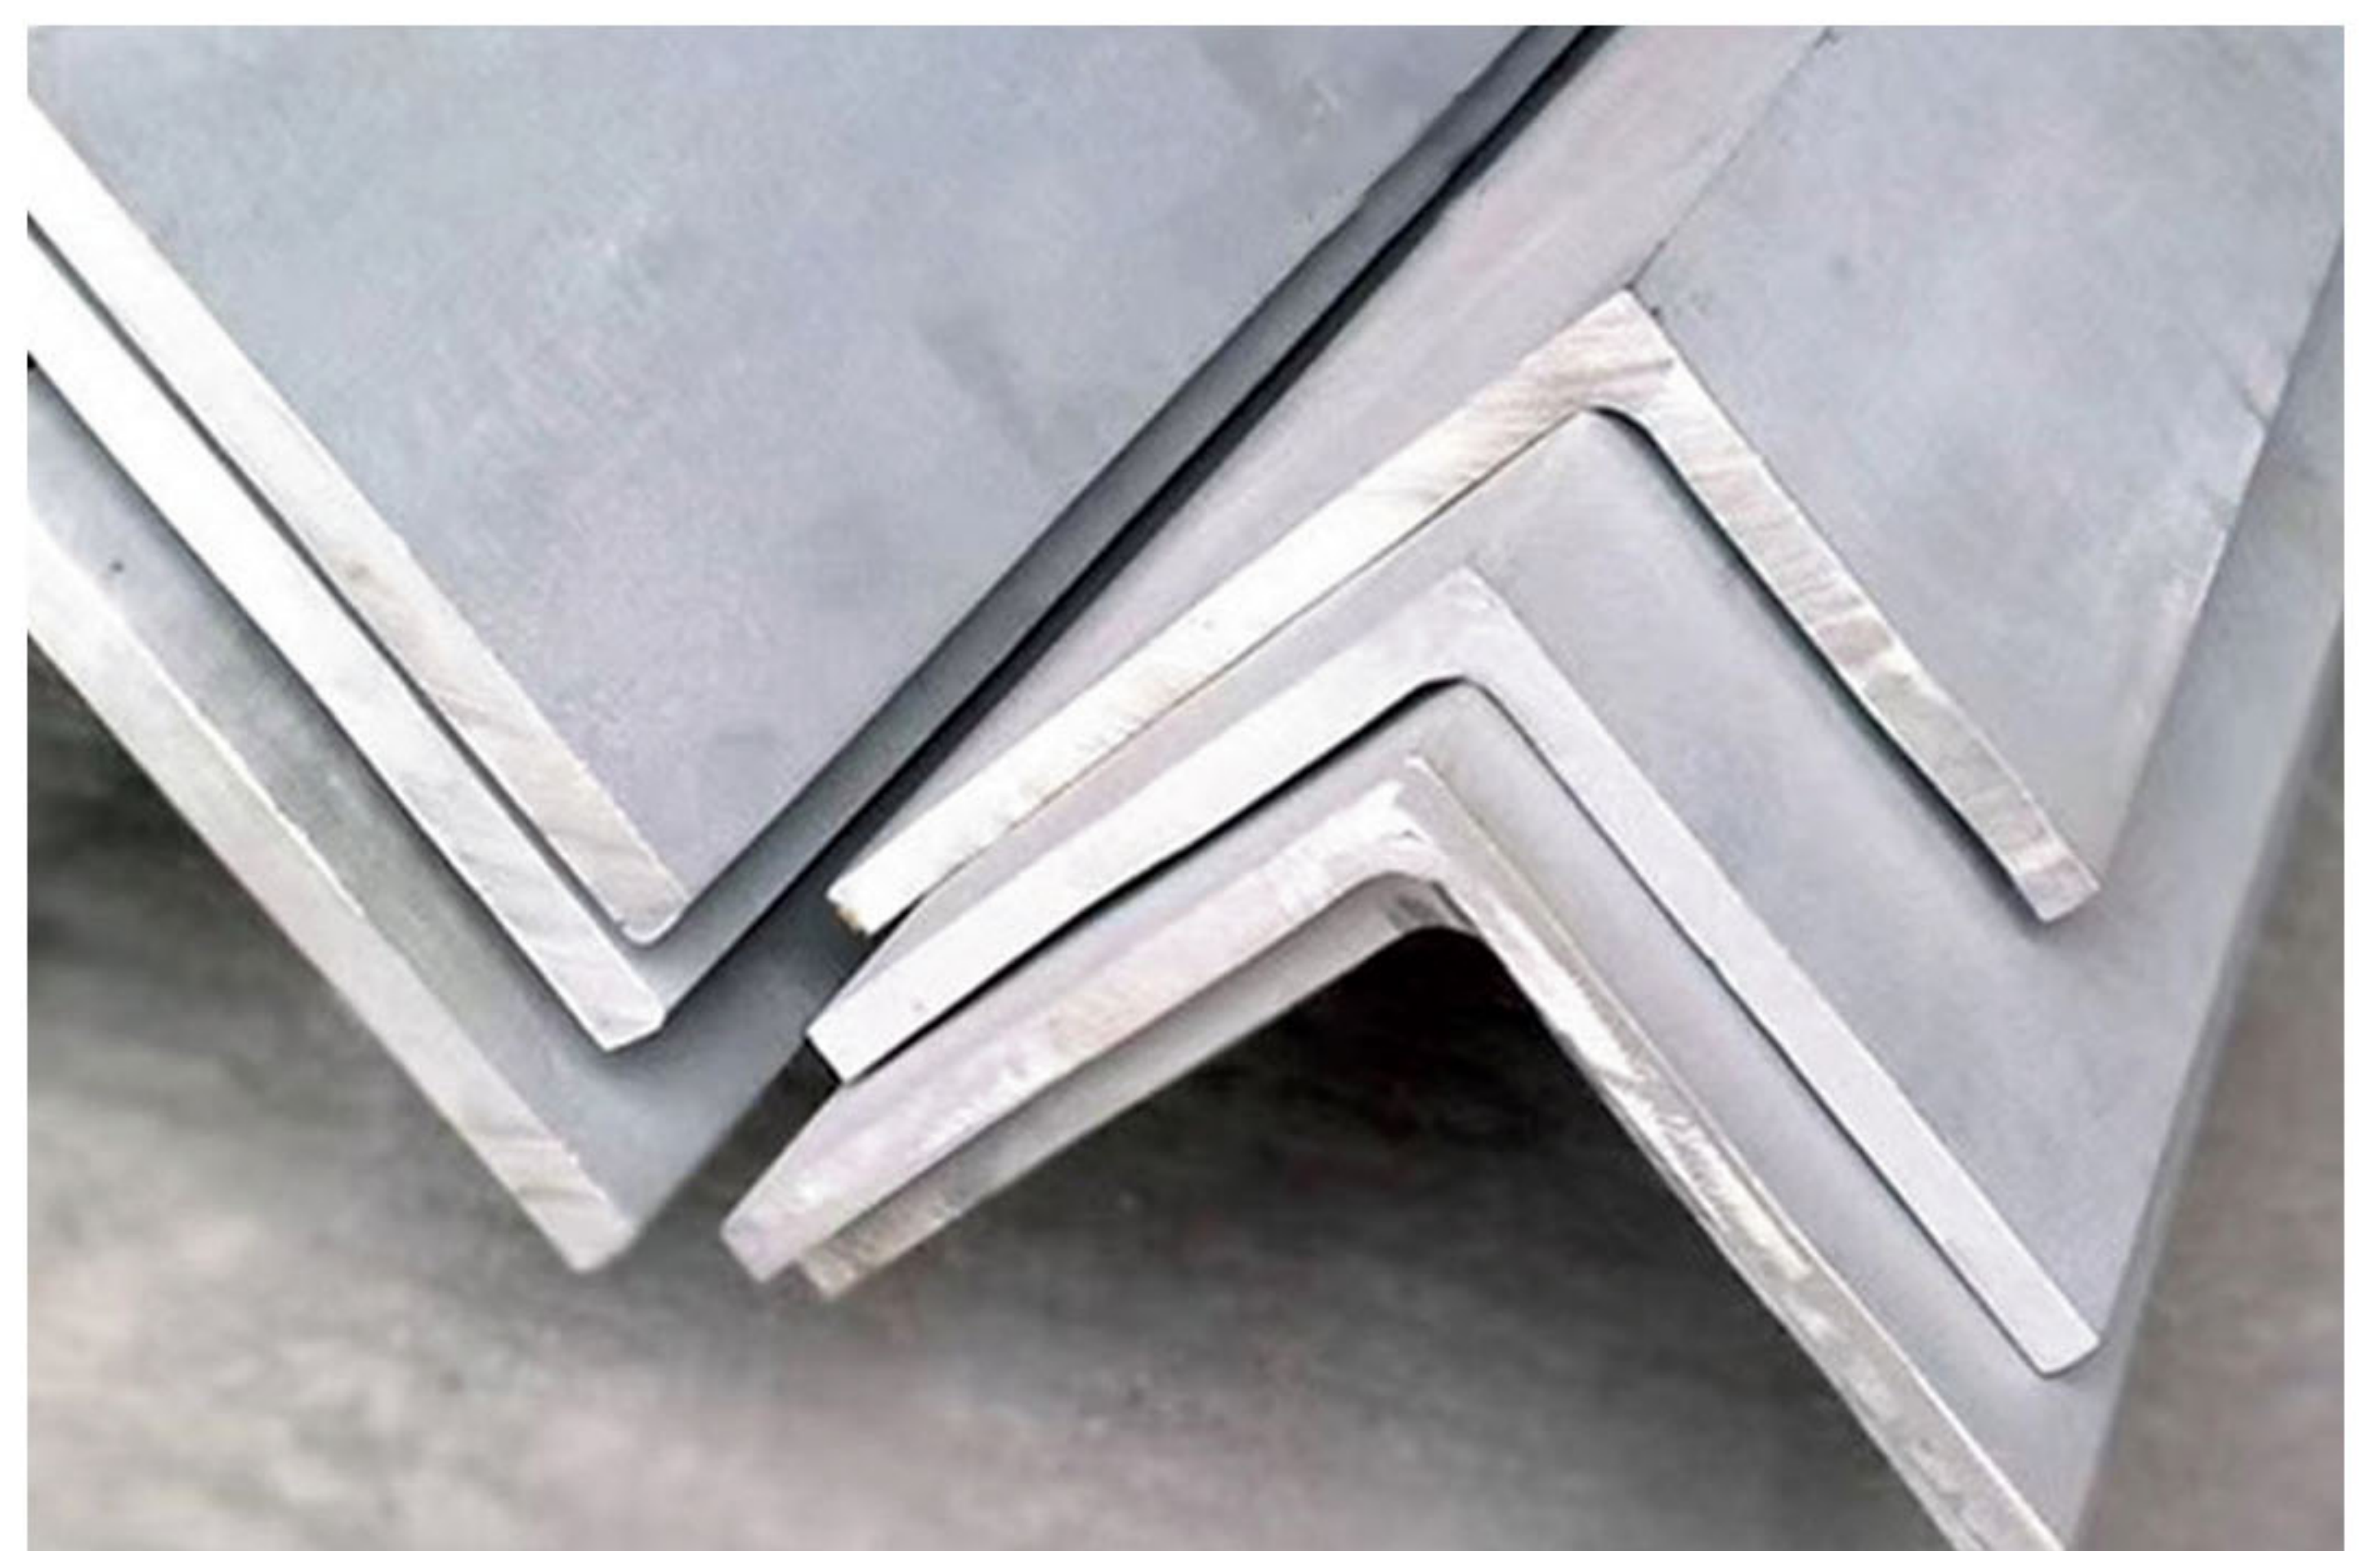

Steel Rails

I-beam

Light weight and simple construction, it is widely used in large factories, venues, super high-rise buildings, bridges and other fields. Steel structures are prone to corrosion. Generally, steel structures need to be derusted, galvanized or painted, and they need to be maintained regularly.

Angle Steel

10 Other

PRODUCT OVERVIEW

Galvanized Rod

Rebar

Steel Wire

Round Tube

Steel is an essential and important material for national construction and the realization of the four modernizations. It is widely used and has a variety of varieties. According to the different cross-sectional shapes, steel is generally divided into four categories: profiles, plates, pipes and metal products. It is also divided into heavy rail, Light rail, large section steel, medium section steel, small section steel, steel cold-formed section steel, high-quality section steel, wire rod, medium and thick steel plate, thin steel plate, silicon steel sheet for electrical purposes, strip steel, seamless steel pipe steel, welded steel pipe, metal products, etc.
