JIESHENG TECHNOLOGY

NINGBO JIESHENG TECHNOLOGY CO., LTD

Ningbo Jesen Technology Co., Ltd. was established in 2021, with its predecessor being Ningbo Xiapu Xinsheng Mold Factory. Initially, it was a specialized mold factory engaged in the design and manufacture of die-casting molds, plastic molds, and stamping molds. As the business grew, in 2006, Xinsheng Mold Factory established a stamping workshop and a machining workshop, focusing on the production and manufacturing of automotive stamping parts and automotive machining parts.

In 2010, we founded Ningbo Kaiminsheng Machinery Co., Ltd., entering the automotive drive shaft component industry. With the continuous expansion of our business, we have gradually developed into a high-end manufacturer in the automotive drive shaft industry and obtained certifications such as the IATF16949 Quality Management System, ISO14001 Environmental Management System, and ISO45001 Occupational Health Management System. At the same time, we were awarded the Level 3 Safety Production Standardization Enterprise Certificate and the High-tech Enterprise Certificate. Our clients include major domestic independent automotive brands and large foreign drive shaft factories, as well as Fortune 500 automotive parts companies.

In 2012, Ningbo Xiapu Xinsheng Mold Factory was renamed Ningbo Dingkai Machinery Co., Ltd., specializing in the production of stamping and welding parts for automotive seats and chassis components. Our main customers include Fortune 500 companies such as Marelli, Magna, Tesla, and well-known domestic auto parts factories.

In 2017, we established the Ergonomics Division, specifically providing OEM services for TV brackets and monitor stands for Ningbo Loctek Co., Ltd. In 2021, we founded Ningbo Jesen Technology Co., Ltd. After years of accumulation and development, Ningbo Jesen Technology has gradually formed a "one main and two auxiliary" industrial layout and development blueprint. The "main" refers to a full series of monitor stands ranging from low-end to mid-high-end, with product specifications including 7kg, 9kg, 11kg, 12kg, 13kg, 14kg, 15kg, 17kg, and 25kg. The "two auxiliaries" refer to mid-high-end TV brackets and height-adjustable desks as complementary, scenario-based products. Our goal is to provide users with a more comfortable, healthier, and stylish work and entertainment environment through ergonomically designed products, aiming to become a top scenario-based solution provider, designer, and manufacturer in the industry.

The company has a professional technical and R&D team, consisting of 25 R&D personnel, 20 quality personnel, and 130 front-line employees. The factory covers an area of approximately 27,000 square meters and mainly operates on an OEM and ODM basis. Our main products include monitor stands of various specifications, height-adjustable standing desks, mobile side tables, lecterns, artistic stands, mobile carts, TV brackets, and computer host brackets. These products are primarily sold to markets in the United States, Europe, and Asia. The company is equipped with comprehensive production and testing equipment and has passed the ISO9001:2015 Quality Management System certification. Additionally, we continuously obtain various product patents and certifications.

With excellent quality and best competitive prices as per our strategic plan., We warmly welcome all the customers to visit us to build the long-term & successful business relationships for mutual development and benefit !
Thank you !
