Our Products

1. Power strip

Our power strip provides overload protection to your appliance. We have tower type, octopus type and snake type, especially for the snake-like and octopus-like type, because of its flexible structure, it can be bended to fit every sized plug or adapter without wasting a single outlet. That means no more plug traffic jams or blocked outlets—even those big ol' power bricks are welcome.

2. Surge protector with USB ports

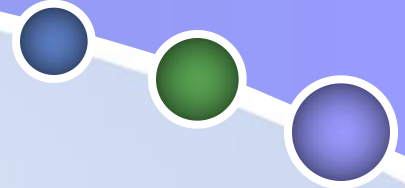

Our surge protector can provide USB ports, ideal for home and office charging devices such as the Apple® iPad® and many more devices, what's more, your device can be charged faster with larger output current.

3. Wifi surge protector

Our wifi surge protector together with free App can help you realize wireless control to your household appliances and electronics anywhere anytime. A real convenience to you.

4. Wifi surge protector with USB ports

This is the perfect combination of all the above surge protector. Thinking that you have a wifi surge protector with USB ports which you can control as you want, and it can be bended to make full use of your room space and the outlets. Take it.

**Lonpower is your trustworthy
OEM&ODM
manufacturer of intelligent and surge
protector, Power strip.**
